Welcome to Carowinds!

We are glad you are here. At Carowinds, we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at North Gate Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of a larger or smaller size, guests who have a history of heart, back or neck trouble, guests who are pregnant or have had recent surgery, guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Carowind’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience, and our evaluation of each ride using our experience of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to to visit North Gate Guest Services or speak to a member of the Operations Supervisory team to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.
CAROWINDS RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>1 Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>2 Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>3 Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>4 Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>5 Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

- Ambulatory
- Accommodates Wheelchair
- Transferable
- Must be accompanied by supervising companion, of proper height to ride
- Must be accompanied by a child to ride/participate
- Must be at least this height to ride.
- Maximum Speed of Ride
- Life jacket is required
- Cannot be any taller than this to ride/participate
- Maximum Height of Ride
- Maximum Water Depth
- Prohibited for guests with back trouble
- Prohibited for guests who have had recent surgery
- Prohibited for guests with neck trouble
- Prohibited for pregnant guests
- Prohibited for guests with heart trouble or high blood pressure
PLEASE RIDE SAFELY

Under SC State law Section 41-18-35: Requires riders to obey all posted signs and warnings and instructions and to behave in a manner that will not cause or contribute to injuring themselves or others. Riders must report all injuries before leaving. If you have any questions please see attendant before exiting attraction.

This includes people who are behaving in an unruly fashion or giving the indication of being under the influence of alcohol or chemical intoxicants.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seat belts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Carowinds is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES

Carowinds Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates are our #1 priority at Carowinds. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services or First Aid to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended
to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or Autism Spectrum Disorder (ASD) to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit) in order to avoid crowds and waiting in the regular queue. Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit). Guests can then choose to rest comfortably away from the queue area, visit a shop, see a show or play a game until their boarding time.

Information on where guests access the ride is posted on each Ride’s Rider Safety Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

Here’s How It Works
• The guest with a mobility impairment or ASD should visit Guest Services upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.
• In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.
• The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.
• The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
• Guests may not accumulate more than one boarding time at a time.
• Due to the nature of the attractions in Carolina Harbor, Alternate Access and Boarding Passes are only available at Coastal Currents via the exit. Boarding Passes, however, are required for SCarowinds Mazes if the Maze has a line.

ADDITIONAL INFORMATION AND SERVICES
We are trying to make Carowinds as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

- **Assisted Listening Devices**
  Assisted listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss.

- **Braille & Large Print Guides**
  Braille and large print guides of the Park Map and Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-serve basis.

- **Campground Shuttle Buses**
  An ADA accessible bus is available for transportation from the campground to and from the park. Stop by the Campground Store for assistance.

- **Family Care Center**
  A Family Care Center is located in Camp Snoopy next to Woodstock Express for parents to feed young children and for lost children. Family restrooms are also located inside the center.

- **First Aid**
  Located in Carolina Boardwalk, across from Goldrusher, is staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid. In addition, a First Aid station is located in Carolina Harbor near Harbor House. This location is open during Carolina Harbor operating hours. Emergency medical care is available for overnight guests.

- **Parking for Guests with Disabilities**
  Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Parking is available on a first come, first serve basis. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification.

- **Interpretive Services**
  If requested at least one week in advance, Carowinds will provide American Sign Language Interpretation at live show venues.

To arrange for sign language interpreting services, please call **704.588.2600**. Live show braille or printed scripts are
available at each show venue upon request and must be
returned at the end of the show.

**Restrooms**
Private restroom facilities for guests needing the
assistance of another guest are available at all restrooms with
the exception of the restrooms located inside our Palladium
Restrooms. Wheelchair accessible stalls are located at
all restrooms.

**Special Dietary Needs**
Although outside food and beverages are not allowed
in the park, individuals who have special need/diet items
due to a medical condition may bring small coolers to
accommodate such needs.

**Service Animals**
Service animals are welcome at Carowinds.
A service animal is defined as a dog or miniature pony that
has been individually trained to perform tasks for a person
with disabilities. Service animals must be controlled with a
restraining device and must display appropriate observed
behavior at all times while on our property. There is a limit of
one service animal per guest. A relief area is located behind
North Gate Guest Services.

Due to the nature of most rides, service animals must remain
with a non-riding member of your party. We are not permitted
to take control of your service animal. Service animals may be
taken on the Carolina Skytower, Grand Carousel, Plants vs.
Zombies Garden Warfare 3Z, and Snoopy’s Junction. Service
animals are not permitted in water attractions, wet decks,
wading pools or lazy rivers. Guests may take advantage of
our Rider Swap policy for staying with the service animal.
Visit Guest Services for more information.

**Wheelchair, Stroller and ECV Rental**
A limited supply of wheelchairs, electric convenience
vehicles (ECV), and strollers are available for rent at all park
entrances. However, since wheelchairs, ECV’s, and strollers
are rented on a first-come, first serve basis and cannot be
reserved in advance, we urge guests to bring their own.
Quantities are limited. For those guests who choose to use
a battery-powered vehicle or wheelchair, we require a safe
speed be maintained while traveling in the park. Wheelchairs,
ECV’s, and strollers may not be taken out of the park gates or
to the parking lot. However, a park associate will be happy to
provide any assistance you may need at that time. For any guest
using a personal Segway, please stop by Guest Services.

**DEFINITIONS**
Every ride entrance lists height requirements and special
instructions regarding the ride. Carowinds uses the
following terms:

**Ability to hold on or brace:** Ability to use one’s arms to
maintain a grasp on an assist bar and support one’s body
during normal and emergency procedures on a ride and to
use one’s legs to brace to maintain a seated position during the
forces of the ride.

**Supervising Companion:** A supervising companion is
someone who meets all the requirements to ride the ride
themselves, is 14 years of age or older, and demonstrates
appropriate observed behavior. Supervising companions are
responsible for ensuring that the guest remains seated properly
where applicable and follows all rules and regulations. The
supervising companion must be seated in the same seat (row)
as the guest who needs accompaniment and can accompany
the number of riders for which the seat is designed. For
example, if a seat is designed for three people, the supervising
companion can accompany two riders.

**Hand-held Infant:** Hand-held infants are children who are
unable to independently walk or maintain independent seated
postural control and will only be able to ride the following rides
with a supervising companion: Grand Carousel (in a chariot),
Carolina Skytower, Snoopy’s Junction, Coastal Currents,
Myrtle Turtle Beach, Tidal Wave Bay (water depth may be
restricted), and Surf Club Harbor (water depth may be
restricted). Hand-held infants and their supervising companion
may also enjoy Pirates Landing, Kiddy Hawk Cove, and Seaside
Splashworks, but may not participate on elevated sections of
the attractions.

**EVACUATIONS**
Evacuations may be required due to such causes as a
mechanical problem, weather conditions, or a power
interruption. If an evacuation is required, guests may need
to maneuver across catwalks, from the highest point of the
ride, and down steeply inclined catwalks or steps. Ride units
may also stop at the top of lifts or on the ride course due to
mechanical reasons. Certain evacuations may require guests
to use additional safety equipment during the process. Remain
seated until given instructions.

In Carolina Harbor guests may be asked to evacuate pools as
quickly as possible using stairs or ladders.

If an evacuation from a ride/attraction is required, for safety
reasons, we may evacuate ambulatory guests prior to
evacuating those guests using wheelchairs. If so, you accept
any risk due to delayed evacuation of if we need to physically lift
or lower you. If your wheelchair can be safely accommodated
on a ride, you are responsible for it being able to withstand the movement of the ride.

**GUESTS OF LARGER SIZE**

All passenger restraint systems, including lap bars, shoulder harnesses and seat belts, must be positioned and fastened properly to allow guests to ride.

Due to rider restraint system requirements, guests of a larger size (in terms of height, weight, and/or body proportion) may not be accommodated on some of our rides.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit. Test seats are located at the ride entrance of Fury 325, Nighthawk, Plants vs. Zombies Garden Warfare 3Z, Intimidator, and Copperhead Strike.

The manufacturer requires a maximum rider height on the following rides: Kiddy Hawk, Nighthawk, Sling Shot, Southern Star, and Copperhead Strike.

**GUESTS USING WHEELCHAIRS**

Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of Carolina Skytower where one wheelchair can be accommodated, and Plants vs. Zombies Garden Warfare 3Z where four wheelchairs can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride.

Almost every ride is wheelchair accessible. Wheelchair lifts are available at Fury 325, Intimidator, Afterburn, Vortex, Hurler, Nighthawk, Carolina GoldRusher, and Copperhead Strike to transport a guest in a wheelchair to our 2nd story ride platforms. Please use the doorbell/phone at the base of the lift to request service. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Carowinds personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Services.

**HEALTH RESTRICTIONS**

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Recent Surgery
- Neck Trouble
- Pregnancy
- Heart Trouble/High Blood Pressure

If you are in doubt about your ability to safely experience a ride or would like more rider information, please request our Guest Assistance Guide at North Gate Guest Services.

**HEIGHT REQUIREMENTS**

Height Requirements and specific rider instructions are posted at the entrance to each attraction. Children may be “officially” measured at the Height Check station near North Gate Guest Services. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process. For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required.

For example, a child is not permitted to wear platform shoes to help meet a height requirement. Carowinds reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated. In Carolina Harbor, height measurements are taken in bare feet at the Waterpark entrance near Zephyr. There is a separate height wristband system for Carolina Harbor.

**LOOSE AND LARGE ARTICLES**

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc.

Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a
non-rider. Carowinds is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the rider’s body.

On Copperhead Strike and Fury 325, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-rider.

For safety reasons, cell phone usage, taking pictures and filming on rides is prohibited.

Glasses must be secured on all rides. On Afterburn, Drop Tower, Fury 325, Intimidator, Nighthawk, and Copperhead Strike glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water in Carolina Harbor. Please take necessary precautions to protect hearing devices on all rides.

**LOST AND FOUND**

All items found at Carowinds are turned in to North Gate Guest Services. If you lose an item on a ride we will search for the article as soon as possible. In order to keep the ride in operation an immediate search may not be possible. Please log onto and complete the form on carowinds.com/help/lost-and-found to ensure the item is returned to you if it is found.

**PHOTOSENSITIVITY/STROBE LIGHTING**

Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Afterburn, Boo Blasters on Boo Hill, Fury 325, Intimidator, Plants vs. Zombies Garden Warfare 3Z, Ricochet, Wilderness Run, WindSeeker, Woodstock Express, and Goldrusher.

**PREGNANCY**

Guests who are pregnant may only ride Carolina Skytower, Grand Carousel, Snoopy’s Junction, Plants vs. Zombies Garden Warfare 3Z and Mountain Gliders and participate in the Campground Pool, Tidal Wave, and Surf Club Harbor.

**PROPER ATTIRE**

Most rides require proper riding attire including shirts and shoes. Shirts and shoes are required in queues and all park pathways at all times. Swimwear is not permitted on rides outside of Carolina Harbor. For your safety, loose clothing (including scarves and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride system. On all roller coasters, scarves will be required to be removed in their entirety. Loose fitting shoes may be removed before riding on Afterburn, Charlie Brown’s Wind Up, Drop Tower, Electro-Spin, Kiddy Hawk, Kite Eating Tree, Ripcord, Sling Shot, YoYo, and Zephyr.

**PROSTHETICS**

Guests with any type of prosthesis should not ride the following attractions unless they can ensure the device is properly secured and will remain in place during the ride: Charlie Brown Wind Up, Kite Eating Tree, Drop Tower, Electro Spin, Kiddy Hawk, Nighthawk, Slingshot, Vortex, Yo-Yo and Zephyr.

Prosthetics are NOT permitted on WindSeeker (a rider with more than one lower body prosthetic is not allowed).

Leg prosthetics are not permitted on Afterburn, Fury 325, or Intimidator. In order to ride, guests must remove their prosthetic and have a below the ankle amputation (below the knee at Afterburn.) Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to see if they are eligible to ride without the prosthetic.

Guests with a single amputation above the knee may ride Afterburn, Intimidator, and Fury 325 with the use of a separate three-point harness, provided the guest has remaining leg and arm remnants to be secured by the separate three
point harness. Guests should check with Guest Services to
determine if they are eligible to use the three point harness.
All riders must be able to maintain the proper riding
positioning. Additionally, prosthetic devices with exposed
metal parts are not permitted on most Carolina Harbor
attractions. Guests with prosthetics enjoying their day
at Carolina Harbor should consult with a member of our
Aquatics Supervisory team. Guests should visit Guest Services
or speak with an associate prior to waiting in line or riding to
ensure a safe riding experience.

**RIDE DEVICES FOR GUESTS WITH DISABILITIES**
Transfer devices, when requested, can be used to assist a
rider out of a wheelchair and into a ride unit. The following
rides are equipped with a transfer device: Carolina Cyclone,
Flying Cobras, Hurler, Wilderness Run, Ricochet, and
Woodstock Express. Boo Blasters on Boo Hill and Snoopy’s
Junction have one car equipped with a removable door which
can assist a rider out of a wheelchair and into the ride unit.
Body Harnesses, when requested; allow certain riders with
disabilities the ability to ride if they meet the ride criteria. The
following rides are equipped with a body harness: Afterburn,
Intimidator, and Fury 325.

Please see an associate at each ride for assistance.

**RIDER CRITERIA**
Carowinds Ride Admission Policy is designed to allow our
guests to participate in the enjoyment of our park as much as
possible. The policy was developed by analyzing the physical
and mental attributes required to safely ride each particular
ride. It is our policy to allow anyone to ride who meets all these
requirements and is not a hazard to himself or others. We
continue to evaluate and update our Ride Admission Policy
as necessary.

**Ability to hold on with one functioning arm.**
A functioning arm is an upper extremity or prosthesis
exhibiting good grip control, the ability to brace, and
strong enough to allow the guest to maintain the proper
riding position throughout the duration of the ride. Any arm
prosthesis must remain properly secured under the dynamic
forces of the ride. Due to manufacturer requirements, some
rides may exclude prosthetics.

**Ability to hold on with two functioning arms.**
Ability to hold on with two functioning arms as
defined above.

**Ability to brace self with one functioning leg.**
Riders must have one functioning leg to be used for bracing
the body during the course of the ride. A functioning leg
may be a normal leg or a prosthesis which can be used for
bracing. Any leg prosthesis must remain properly secured
under the dynamic forces of the ride. Due to manufacturer
requirements, some rides may exclude prosthetics.

**Ability to brace self with two functioning legs.**
Riders must have two functioning legs to be used for
bracing the body during the course of the ride and
maintaining balance when entering and exiting a ride
unit. A functioning leg may be a normal leg or a prosthesis
which can be used for bracing.

**Ability to enter/exit ride within specified parameters
without endangering self or others.**
Riders must be able to enter and exit the ride without
jeopardizing themselves or others and to assist with their
own evacuation, if necessary. This may include special
arrangements such as entering through the Alternate
Access Entrance or having someone aid you in boarding.
For the safety of our associates and riders, ride operators
are instructed not to perform any lifting of riders.

**Appropriate observed behavior:**
Riders demonstrates appropriate observed behavior
indicating a willingness and ability to participate and/or
follow rider requirements. Appropriate observed behavior
may include, but not be limited to maintaining proper riding
position, attention and compliance to safety instructions,
proper use of all ride safety equipment and willingness
to participate.
Riders have a duty to:
- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

CASTS & BRACES
Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Braces with exposed metal parts are not permitted on most slides in Carolina Harbor. The following chart displays the cast and brace rules for all rides and attractions.

<table>

ACCESS SYMBOLS
Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where the guest may remain in wheelchair. Carolina Skytower may accommodate one wheelchair and Plants vs. Zombies Garden Warfare 3Z may accommodate four wheelchairs.

This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

Rides using this symbol can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

RIDES
The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, riders must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Afterburn
Guests must be 54” tall to ride.
This is an inverted steel coaster with floorless cars suspended below the track. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the rider has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Leg prosthetics are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to determine if they are eligible to ride using the full body harness or without the prosthetic.

Guests with a cervical, neck brace and or broken collar bone are not permitted to ride. Casts are not permitted.

Rider Access: Alternate Access is available through the ride entrance where guests using wheelchairs will encounter an elevator. Press the elevator intercom button for assistance from a ride operator. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Warning: This ride contains strobe lighting.

Beagle Scout Acres
Guests taller than 54” are not permitted to participate on the structure.
Interactive play area includes slides, climbing boards, and open play area perfect for the little ones. Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to participate.

Boo Blasters on Boo Hill
Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.
Maximum Weight: 700 lb. per car
This is a ghost-busting interactive dark ride where riders travel through an old southern plantation to capture ghosts with “Frightlights.” An onboard computer keeps track of each rider’s score.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests with a minimum of one functioning leg must ride with a supervising companion. Guests who do not have seated postural control, the ability to enter or exit the ride safely, or cannot demonstrate appropriate observed behavior must be accompanied by a supervising companion.
**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A specific ride vehicle at this attraction is equipped with a removable side which may assist a rider in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle.

**Warning:** This ride contains strobe lighting. Attraction designed to scare or startle.

### Camp Bus

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight: 440 lb. per row; this ride only accommodates two adults per row.

PEANUTS™ themed bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with two prosthetic arms are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

### Carolina Goldrusher

Guests must be 48” tall to ride.

A wood and steel roller coaster. Riders will experience rapid changes in direction.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

### Carolina Cyclone

Guests must be 48” tall to ride.

A high-speed, looping roller coaster which turns riders upside down. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

### Carolina Skytower

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants must be accompanied by a supervising companion.

An air-conditioned, enclosed cabin which rotates while traveling up a tower.
**Rider Criteria:** Guests who do not have seated postural control or do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate Access is available at the ride exit. This ride is wheelchair accessible and may accommodate one wheelchair. Service animals are permitted to ride.

---

**Charlie Brown™ Wind Up**

- **Guests must be between 36” and 54” tall to ride.**
- A child-size chair swing ride with free hanging seats suspended from a gently rotating tower.

**Restraint System:** An individual lap bar and a between-the-legs safety belt secures each rider.

**Rider Criteria:**
- Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.
- Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.
- Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

---

**Copperhead Strike**

- **Guests must be 52” tall to ride.**
- A double launch, full circuit roller coaster featuring weightlessness, high speed banked turns, and rapid directional changes.

**Restraint System:** An individual lap bar secures each rider across the thighs and pelvis with a between-the-legs safety belt.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

---

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Amputations must be below the ankle. Prosthetics are not permitted on this ride. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit where guests using wheelchairs will encounter an elevator. Guests will operate the elevator on their own. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Note:**
- Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.
- **Warning:** This ride contains strobe lighting.
- **Warning:** This ride utilizes magnetic systems during ride.

---

**Dodg’ems**

- **Guests must be 48” tall to ride.**
- A bumper car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

**Restraint System:** An individual shoulder strap is positioned over the shoulder and under the arm of each rider.

**Rider Criteria:**
- If a rider cannot steer and depress the accelerator while seated normally, another individual must accompany the guest to drive. Guests must have a minimum of three functioning extremities. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.
- Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Avoid head-on collisions.
**Do-Si-Do**

*Guests must be 54” tall to ride alone OR 42” tall and accompanied by a supervising companion.*

*Maximum Weight: 330 lb. per car*

This is a circular ride with three sweeps of gondolas moving counterclockwise against the ride’s main clockwise rotation.

**Restraint System:** A shared lap bar and seatbelt secures all riders in a row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or a braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the gate to the right of the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Caution:** Units tip while entering and exiting.

**Drop Tower**

*Guests must be 54” tall to ride.*

*Maximum Weight: 882 lb. per car*

A four open-air seated tower which lifts riders and drops them at a freefall before being stopped by a magnetic braking system.

**Restraint System:** A shoulder harness with a between-the-legs safety strap secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

**Caution:** Units tip while entering and exiting.

**Electro Spin**

*Guests must be 54” tall to ride.*

An inverting thrill ride where units rotate on a 360 degree axis while spinning to a maximum height of 64 feet around the centre hub. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and directions.

**Restraint System:** A shoulder harness with a between-the-legs safety strap secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Caution:** Units tip while entering and exiting.
**Flying Ace™ Balloon Race**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

PEANUTS themed hot air balloon ride that spins and raises riders in the air.

**Restraint System:** A shared seatbelt secures all riders in a row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution, as the ride unit may shift when entering and exiting.

**Caution:** Units tip while entering and exiting.

**Flying Cobras**

Guests must be 48” tall to ride.

A high-speed, looping roller coaster which turns riders upside down forward and then again while traveling backward. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they may shift.

**Fury 325®**

Guests must be 54” tall to ride.

A high speed, steel, giga coaster which takes riders to a maximum height of 325 feet reaching speeds up to 95 mph. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the ankle. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Leg prosthetics are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to determine if they are eligible to ride using the full body harness or without the prosthetic.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted.

**Rider Access:** Alternate Access is available at the ride exit where guests using a wheelchair will encounter an elevator. Guests will operate the elevator on their own. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Loose articles that are not able to be stored in a cargo pocket are not permitted in line.

**Warning:** This ride contains strobe lighting.

**Warning:** This ride utilizes magnetic systems.
Grand Carousel

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants must ride in a chariot and be accompanied by a supervising companion.

A carousel ride which features stationary and jumping animals along with chariot seating mounted on a circular platform that rotates counter-clockwise.

Guests under 46” tall must be seated in a chariot or on the middle row of horses and be held by a supervising companion who is standing on the platform between the horses; only one rider per horse.

**Rider Criteria:** Guests who cannot hold onto a horse with one functioning arm must be seated with a supervising companion in a chariot. Guests must have the ability to straddle the horse on which they are riding. Guests with only one functioning leg that are unable to straddle the horse must ride in a chariot.

Guests who cannot enter or exit the ride safely, do not have seated postural control, an appropriate center of gravity, or do not demonstrate appropriate observed behavior must ride in a chariot and be accompanied by a supervising companion.

Guests with a full leg cast must ride in a chariot.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto an unsteady platform. Service animals are permitted to accompany the rider on the ride platform or in a chariot.

Hurler™

Guests must be 48” tall to ride.

A wooden rollercoaster with large drops and banked turns.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and two functioning legs. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the ankle. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Leg prosthetics are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to determine if they are eligible to ride using the full body harness or without the prosthetic.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit where guests using a wheelchair will encounter an elevator located underneath the station to the left of the exit stairs. Guests will operate the elevator on their own. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they may shift.

**Warning:** This ride utilizes magnetic systems.

Intimidator®

Guests must be 54” tall to ride.

A high speed, steel, hyper coaster which takes riders to a maximum height of 232 feet reaching speeds up to 80mph.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the ankle. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Leg prosthetics are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to determine if they are eligible to ride using the full body harness or without the prosthetic.

Guests with a cervical collar, neck brace, broken collar bone, casts are not permitted.

**Rider Access:** Alternate Access is available at the ride exit where guests using a wheelchair will encounter an elevator. Guests will operate the elevator on their own. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they may shift.
**Warning:** This ride utilizes magnetic systems.

**Warning:** This ride contains strobe lighting.

**Kiddy Hawk**

Guests must be between 44” tall and 76” tall to ride. Guests between 44” tall and 54” tall will need assistance on and off the ride.

A junior inverted coaster which takes guests on a high-flying adventure in ski-lift style seats that are suspended below the coaster track. Riders will experience weightlessness and rapids movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Kite Eating Tree**

Guests must be 36” tall to ride.

Weight Requirement: 770 lb. per ride; this ride only accommodates 2 adults per ride.

This children’s ride hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row with an individual between-the-legs safety belt. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. Adults must sit on the two outside seats.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with two prosthetic arms are not permitted to ride.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Mountain Gliders**

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum weight: 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the rider’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

**Restraint System:** A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests are not required to have appropriate center of gravity.

Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat. Please use caution, as the ride unit may shift when entering and exiting.

**Caution:** Units tip while entering and exiting.
Nighthawk

Guests must be between 54” tall and 81” tall to ride.

Maximum Weight: 265 lb. per rider

This is the Carolina’s first flying coaster that rides through eight inversions, most while flying facedown, zooming toward the ground and turning skyward just in time for the next inversion. The unique rider position offers breathtaking and virtually unobstructed views of the park.

**Restraint System:** A shoulder vest comes over the arm and secures across the chest with a lap bar that comes up between-the-legs across the hips and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full, foot, or lower leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit where guests using a wheelchair will encounter a wheelchair lift. Guests will operate the elevator on their own. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

**Warning:** This ride utilizes magnetic systems.

Peanuts™ Pirates

Guests must be 48” tall to ride alone OR 40 tall and be accompanied by supervising companion.

Ahoy Mateys! Navigate these rotating mini-pirate ships! Pivot, twist and turn a full 180 degrees while sloping up and down along the ocean bottom terrain.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Peanuts™ Trailblazers

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight: 275 lb. per car

This children’s ride allows guests to ride in their own car that whips around an oblong track.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with two prosthetic arms are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit.

Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Pigpen’s™ Mud Buggies

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight: 382 lb. per car; this ride may only accommodate one adult per car.

Space vehicles that jump up and down while rotating around a circular track.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. Adults must sit in the last row.
**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

---

**Plants vs. Zombies™ Garden Warfare 3Z**

Guests must be 48” tall to ride. Guests between 46” tall and 48” tall must ride in the front row only.

An intra-active 3-D digital experience where guests are immersed in the Plants vs. Zombies™ Garden Warfare 2 universe and compete in an epic battle to find the Golden Gnome.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests are not required to have appropriate center of gravity.

Guests with a full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they may shift.

**Warning:** This ride contains strobe lighting.

---

**Ricochet**

Guests must be 54” tall to ride alone OR 44” tall and be accompanied by a supervising companion.

A steel roller coaster with airtime hills and hairpin turns.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

---

**RipCord**

Guests must be 42” tall to ride.

**Maximum Weight:** 850 lb. per flight

This is a high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted into the air. They control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds.

**Restraint System:** Riders wear a full body harness that supports the rider in a prone position. The harness is connected to flight support cables.

**Rider Criteria:** Riders must have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is necessary that riders possess two arms sufficient for proper functioning of the flight suit to be maintained. Lower extremities must be sufficient enough length to be contained and restrained by a leg strap. Proper functioning of the flight suit must be maintained for riders without appropriate center of gravity.

Guests with a cervical collar, neck brace, or broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with a forearm cast must ride with the cast positioned on the outside.

**Rider Access:** Alternate access is available at the ride exit. Riders must be able to walk independently or be assisted by a member of their party.

**Note:** This is an extra charge attraction.

---

**Rock N’ Roller**

Guests must be 52” tall to ride alone OR be accompanied by a supervising companion.

This is a high speed circular ride which follows a steeply rolling up and down table. Riders will experience side to side forces on this ride.
**Restraint System:** A shared lap bar and seat belt secures all riders in a row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning leg and one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the rider has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use ride restraint for support while entering and exiting, as they will shift.

**Caution:** Units tip while entering and exiting.

---

**Scream Weaver**

![Scream Weaver icon](image)

**Guests must be 54” tall to ride.**

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning riders upside down. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A door with a safety chain encapsulates the ride unit to secure riders.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use ride restraints for support as they will shift.

**Caution:** Units tip while entering and exiting.

---

**Scrambler**

![Scrambler icon](image)

**Guests must be 48” tall to ride alone OR 36” and accompanied by a supervising companion.**

*Maximum Weight: 510 lb. per car*

Rotating arms are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seat belt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of entering and exiting elevated vehicles which may shift.

---

**Sling Shot**

![Sling Shot icon](image)

**Guests must be between 48” tall and 79” tall to ride.**

*Weight Requirement: minimum combined of 110 lb. per ride; single riders are not permitted.*

A two-person capsule that is attached to steel cables and propels riders into the air. Riders will experience weightlessness, rapid movements from side to side, and rapidly changing forces and directions.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.
Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, full, foot, or lower leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Note:** This is an extra charge attraction.

### Snoopy’s™ Junction 🌈

**Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Guests less than 46” tall must sit on the inside. Hand-held infants must be accompanied by a supervising companion.**

Children and parents are all aboard on the 2-minute ride on Snoopy’s™ train! Join Snoopy™ and Woodstock™ on an adventure as their story unfolds during the trip.

**Rider Criteria:** Guests who need assistance to enter and exit the ride safely, who do not demonstrate appropriate observed behavior, or do not have seated postural control must be accompanied by a supervising companion.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Service animals are permitted.

### Snoopy™ vs. Red Baron 🇺🇸

**Guests must be between 36” tall and 54” tall to ride.**

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

### Southern Star 🇺🇸

**Guests must be between 48” tall and 76” tall to ride.**

A giant looping Viking ship that swings backwards and forwards, then turns a series of two complete loops, suspending riders upside down 80 feet in the air. Riders experience sudden speed changes and controlled freefall and the ship swings through its 360 degree cycle.

**Restraint System:** A shoulder harness comes down over the head and secures across the chest with a lap bar that comes up between-the-legs across the hips and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

### Vortex® 🎠

**Guests must be 54” tall to ride.**

A stand-up steel roller coaster that travels through a vertical loop, up and into an oblique loop, down into a carousel and finally into a flat spin.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Leg prosthetics are not permitted. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted.
**Rider Access:** Alternate Access is available at the ride exit where guests using a wheelchair will encounter an elevator. Guests will operate the elevator on their own. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

**Wilderness Run**

 Guests must be 40” tall to ride alone OR 36” tall and accompanied by a supervising companion. Guests over 54” tall must be accompanied by a child.

A junior steel rollercoaster with mild drops, bumps, and turns.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate Access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Warning:** This ride contains strobe lighting.

**WindSeeker**

 Guests must be 52” tall to ride.

*Maximum Weight: 304 lb. per rider*

A chair swing ride while spreading its arms, swings riders in a circular motion at a 45 degree angle at speeds up to 30 miles per hour as the swings climb the tower.

**Restraint System:** An individual lap bar and a between-the-legs safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Prosthetics are not permitted on this ride. Guests should check with Guest Services or speak with a member of the Ride Supervisory team to determine if they are eligible to ride without the prosthetic.

**Rider Access:** Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they will shift.

**Warning:** This ride contains strobe lighting.
Woodstock™ Whirlybirds

Guests must be 42” tall OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight: 550 lb. per car

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: A shared seatbelt secures riders. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with two prosthetic arms are not permitted to ride.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Yo-Yo

Guests must be 48” tall to ride.

Maximum Weight: 170 lb. per rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider. An additional individual seatbelt is positioned across the chest and under the arm of each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access Entrance is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Zephyr

Guests must be 48” tall to ride.

Maximum Weight: 230 lb. per rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access Entrance is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.
### CAROLINA HARBOR

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

**Height Requirements**
Supervise children at all times. In Carolina Harbor, height requirements are taken in bare feet.

**Appropriate Attire**
In Carolina Harbor, appropriate swimwear is required. Thongs or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear.

Suits with metal buttons, buckles, rivets, zippers or sharp objects are not permitted on body slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

Swimwear, swim diapers and eye wear straps may be purchased at Beach Combers.

**Swim Diapers**
Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

**Life Jackets**
Life Jackets are required for children who are less than 48 inches tall in bare feet or those who are inexperienced or non-swimmers. Life Jackets are available for all guests needing special consideration. Children who are less than 42 inches tall must wear a lifejacket and be accompanied by a Supervising Companion. Only Coast Guard approved life jackets are allowed as flotation devices. These policies will be enforced in the following locations: Coastal Currents, Tidal Wave Bay, and Surf Club Harbor. Life jackets are provided free of charge for guests who require one.

**Ongoing Lifeguard Training**
In an ongoing effort to provide a safe and enjoyable experience for our guest, Carowinds routinely utilizes training exercises to improve our lifeguards skill and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

**Water Wheelchairs and Pool Lifts**
A water wheelchair is available for guests requiring additional assistance when at Tidal Wave Bay, Surf Club Harbor. The water wheelchair may be used by multiple guests on the same day. While in a wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at the Campground Pool. During your visit, please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair or pool lift and for further accessibility information.

**WATER PARK ATTRACTIONS**
The following descriptions are designed to give you information on the type of actions caused by various attractions. Each of the following attractions will identify the
restrictions according to the criteria itemized on page 8. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under Coastal Currents. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

**Barracuda Blasters**

![Barracuda Blasters](image)

Guests must be 48” tall in bare feet to ride

Maximum Weight: 250 lb. per tube

Two 40 ft. tall enclosed serpentine tube slides ending in a 42” pool.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Blackbeard’s Revenge – Cannonball Drop**

![Blackbeard's Revenge - Cannonball Drop](image)

Guests must be 48” tall in bare feet to ride

Maximum Weight – 300 lb. per single tube / 400 lb. per double tube

Two partially enclosed tube slides that send riders on single or double tubes down a series of intense drops and turns. All slides end in a catch pool with 3 1/2 ft. of water. Maximum of one guest per single tube and two guests per double tube. On double tubes, the front rider must sit between the legs of the heavier rider.

**Rider Criteria:** Guests must ride feet first, with their head and back against the slide, legs firmly crossed at the ankles, and arms folded across the chest, and maintain position throughout ride. Guests must have four functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted. Prosthetic devices with exposed metal parts are not permitted on most waterpark attractions. Guests with prosthetics should visit Guest Services or speak to a member of our Aquatics Supervisor team prior to waiting in line or riding to ensure a safe sliding experience.

**Rider Access:** Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.
**Warning:** Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

**Boogie Board Racer**

Guests must be 42” tall in bare feet to ride

*Maximum Weight: 300 lb. per rider.*

A complex that has guests slide head first down one of six mat racing flumes. Slides descend into a 6” deep runout.

**Rider Criteria:** Guests must lie stomach down on a mat, facing forward, and holding onto the tube handles with legs extended forward throughout the ride with elbows tucked in towards the body. Guests must have a minimum of three functioning extremities; two functioning arms with the ability to firmly grasp the mat and one functioning leg. Guests with a cervical, neck brace and or broken collarbone are not permitted to ride. Casts are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a 54” mat. Riders will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion.

**Coastal Currents**

Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.

A slow moving, winding river tube ride at a depth of 30 in. The river is approximately 1000 feet long and passes through both North and South Carolina.

**Rider Criteria:** Guests who cannot maintain seated postural control or do not have appropriate observed behavior must be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction is available via the stairs or zero depth entry. Guests will have to transfer to a tube, on their own or with the assistance of a companion.

**Dorsal Fin Drop**

Guests must be 48” tall in bare feet to ride

*Maximum Weight: 250 lb. per tube.* A red light/green light scale is used at this attraction. Guests who exceed the weight requirement will not be permitted to ride.

A 351 ft. long partially enclosed tube slide that sends riders on single tubes through the spin of a lifetime as they gain speed in a curved-tunnel that blasts them into a bowl. Like a shark circling its prey, guests spin and swirl before sliding into the corkscrew exit. The slide ends in a catch pool with 1 ½ ft. of water. Maximum of one guest per single tube.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Campground Pool**

Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.

An outdoor pool only available to our Carowinds Camp Wilderness Resort guests. The pool is located just outside the lodge and has a maximum water depth of 6 ft.

**Rider Criteria:** Guests who cannot maintain seated postural control, do not have appropriate observed behavior, or do not have the ability to enter/exit the attraction safely, must be accompanied by a supervising companion. Hand held infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion.

**Rider Access:** Access to the attraction is available via the stairs or pool lift. Guests will have to transfer to the stairs or lift, on their own or with the assistance of a companion. Please speak to the lifeguard on duty to obtain access to the pool lift.
Hurricane Falls

Guests must be 42” tall in bare feet to ride. Guests between 42” and 48” tall in bare feet must wear a life jacket and be accompanied by a supervising companion.

Maximum Weight: 800 lb. per raft

A family raft slide that swirls riders on rafts down four stories through a 564 ft. long route of high-banked turns and unexpected dips. The slide ends in a catch pool with 3 ft. of water. Guests must ride in groups of at least 2, but no more than 4, per raft. The two heaviest riders must be positioned across from one another. Single riders will be paired with another group.

**Rider Criteria:** Guests must be seated with their back against the tube and hands holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Kiddy Hawk Cove – Pool

Guests must be less than 54” tall in bare feet or be accompanied by a child

A family area with a pool, spray jets, and interactive water features. Maximum water depth of 1 ft.

**Rider Criteria:** Guests who cannot maintain seated postural control, do not have appropriate observed behavior, or do not have the ability to enter/exit the attraction safely must be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Cervical collars or neck braces are not permitted.

**Rider Access:** Access to the attraction is available via the stairs or zero depth entry. This attraction is wheelchair accessible. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory team to obtain access to a water wheelchair.

Kiddy Hawk Cove – Slide

Guests must be less than 54” tall in bare feet or be accompanied by a child

A playground style body slide. The slide ends in a pool with 1 ft. of water.

**Rider Criteria:** Guests who do not have appropriate observed behavior or the ability to enter/exit the attraction safely must be accompanied by a supervising companion. Guests must ride feet first and have a minimum of two functioning extremities. Hand held infants are not permitted. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing stairs. Guests will have to ascend the stairs and be capable of safely entering the slide, on their own or with the assistance of a companion.

Myrtle Turtle Beach

Guests must be 3 years of age or under, or be accompanying a guest of 3 years of age or under.

A play area specifically geared for toddlers and their families. The area features playful water jets that spray every which way and interactive water elements.

**Rider Criteria:** Guests who cannot maintain seated postural control, do not have appropriate observed behavior, or do not have the ability to enter/exit the attraction safely must be accompanied by a supervising companion.

**Rider Access:** Access to the attraction is available via the zero depth entry. This attraction is wheelchair accessible. Please speak to a member of our Aquatics Supervisory team to obtain access to a water wheelchair.

Pelican Plunge

Guests must be between 36” and 54” tall in bare feet to ride alone or with one another. Guests less than 36” tall in bare feet must wear a life jacket and be accompanied by a supervising companion over 54” tall in bare feet. Guests over 54” tall in bare feet must be accompanied by a child less than 36” tall in bare feet.
A pair of tube slides that twist riders in double tubes along dual 125 ft. long chutes. Both slides end in a catch pool with 2 ft. of water. Single riders must be positioned in the back of the tube. When riding in a pair, the front rider must sit between the legs of the heavier rider. Maximum of two guests per double tube.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing a flight of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Pirate’s Landing – Play Structure**

Guests must be less than 54” tall in bare feet or be accompanied by a child.

A three-story water fortress with interactive water sprayers and a huge 100-gallon drenching bucket that dumps water every few minutes.

**Rider Criteria:** Guests who cannot maintain seated postural control must be accompanied by a supervising companion. Hand held infants are not permitted to participate on elevated activity areas. Cervical collars or neck braces are not permitted to participate on elevated activity areas.

**Rider Access:** Access to the attraction requires climbing stairs. Guests will have to ascend the stairs on their own or with the assistance of a companion.

**Seaside Splash Works – Play Structure**

Guests must be less than 54” tall in bare feet or be accompanied by a child.

A multi-level play structure that features over 80 play elements, including dozens of interactive spray jets, water guns, adventuresome net bridges, awesome water wheels, and a giant 423-gallon tipping bucket that drenches everyone below.

**Rider Criteria:** Guests who cannot maintain seated postural control must be accompanied by a supervising companion. Hand held infants are not permitted to participate on elevated activity areas. Cervical collars or neck braces are not permitted to participate on elevated activity areas.

**Rider Access:** Access to the attraction requires climbing stairs. Guests will have to ascend the stairs on their own or with the assistance of a companion.

**Pirate’s Landing - Play Slide**

Guests must be less than 54” tall in bare feet or be accompanied by a child.

A red and white striped body slide that ends in a shallow run out lane.

**Rider Criteria:** Guests must ride feet first. Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and two functioning legs. Hand held infants are not permitted. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing stairs. Guests will have to ascend the stairs and be capable of safely entering the slide, on their own or with the assistance of a companion.

**Seaside Splash Works – Slides**

Guests must be at least 36” tall in bare feet to participate on slides lower than 8 ft. in the air. Guests must be at least 40” tall in bare feet to participate on slides 8 ft. in the air or higher.

Six impressive body slides that range in height and color. Each body slide ends in a shallow run out lane.

**Rider Criteria:** Guests must ride feet first. Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and two functioning legs. Hand held infants are not permitted. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing stairs. Guests will have to ascend the stairs and be capable of safely entering the slide, on their own or with the assistance of a companion.

**Storm Surge – Body Slides**

Guests must be 48” tall in bare feet to ride.

*Maximum Weight: 250 lb. per rider*

Two 80 ft. tall enclosed body slides that send riders in a high-speed, nearly vertical, free fall through several intense turns. Both slides end in individual run out lanes with 2 ft. of water.
Rider Criteria: Guests must ride feet first, with their head and back against the slide, legs firmly crossed at the ankles, and arms behind the head. Guests must have four functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted. Prosthetic devices with exposed metal parts are not permitted on most waterpark attractions. Guests with prosthetics should visit Guest Services or speak to a member of our Aquatics Supervisor team prior to waiting in line or riding to ensure a safe sliding experience.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Warning: Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

Storm Surge – Tube Slides

Guests must be 48” tall in bare feet to ride

Maximum Weight: 230 lb. per single tube / 400 lb. per double tube

Two enclosed tube slides that send riders on double tubes down a series of drops and turns in total darkness. Both slides end in a catch pool with 2 1/2 ft. of water. Single riders must be positioned in the back of the tube. When riding in a pair, the front rider must sit between the legs of the heavier rider. Maximum of two guests per double tube.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Surfer’s Swell

Guests must be 48” tall in bare feet to ride

Maximum Weight: 250 lb. per tube. A red light/green light scale is used at this attraction. Guests who exceed the weight requirement will not be permitted to ride.

A 263 ft. long partially enclosed tube slide that sends riders on single tubes up an angled wall that mimics the sensation of catching an ocean wave. The slide ends in a catch pool with 1 1/2 ft. of water. Maximum of one guest per single tube.

Rider Criteria: Guests must be seated in a tube, facing forward, and holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Casts, cervical collars, neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Tidal Wave Bay and Surf Club Harbor

Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.

Two large wave pools with depths ranging from 0 ft. (0 cm) to 6 ft. (182.88 cm). Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand held infants or guests with full arm casts or full leg casts are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access to the attraction is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory team to obtain access to a water wheelchair.
September 18 – October 31
SCarowinds’ Halloween Haunt has Extreme Haunts that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, loud sound and dense fog. Please adhere to all posted and verbal warnings and directions. Some attractions may require Guests to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction. Strobe lighting may also be in effect at some attractions. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions. Characters inside our Haunt attractions will not touch you; please do not touch them in any manner. Those that do so will be removed from the park without refund. Rowdy behavior and profanity are also cause for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes or masks.

November 27 – December 31
Carowinds Winterfest Event is filled with delightful holiday cheer for guests of all ages. Many areas of the park will have low lighting, fog, snow machines and strobe styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe styled lighting that will be present throughout the park. Please see a Guest Services representative for any additional questions.

Snowflake Lake
10 years of age to skate alone or accompanied by a supervising companion at all times
This traditional styled ice skating rink allows participants to skate in a counter-clockwise direction around the ice rink. Ice skates are required for all participants to be on the ice. Speed skating, roughness, excessive speeding or weaving through other skaters is prohibited.
Guests with a cervical collar or neck brace, full arm cast, braced arm cast, or full leg cast are not permitted to participate at this attraction.
Alternate Access is available through the entrance. Guests must be able to take several steps and step on to the ice on their own or with the assistance of a companion. Guests in wheelchairs can transfer and participate with the use of a chair designed to be on the ice. Please see an ice rink associate for details.

Note: This is an extra charge attraction.
WARNING

Many rides at Carowinds are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at North Gate Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Carowinds does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE! All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow guests to ride.

Information in this guide is subject to changes.
