Welcome to Cedar Point!

We are glad you are here! At Cedar Point we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Cedar Point’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services or Town Hall to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.
CEDAR POINT RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>1 Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>2 Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>3 Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>4 Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>5 Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>
**KEY TO SYMBOLS**

These symbols, along with the ride ratings, are used to define our rides on the following pages.

PLEASE RIDE SAFELY

Under the Ohio Revised Code Section 1711.551 riders must obey all warnings and directions regarding amusement park rides and behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is a misdemeanor.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Town Hall. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.
Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets, waist packs, left in a locker or with a non-rider. Cedar Point is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

**ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES**

Cedar Point’s Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Cedar Point. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services or Town Hall to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in
line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit) in order to avoid crowds and waiting in the regular lines. At GateKeeper, Valravn, Magnum XL-200, Maverick, Millennium Force, Raptor, Rougarou, Steel Vengeance, and Top Thrill Dragster the boarding time can be obtained from the ride associate at the front of the ride entrance.

Guests who are in possession of a boarding pass will obtain a boarding or “ride” time on the boarding pass that is equal to the anticipated wait time for a particular ride from the ride associate at the alternate access entrance (usually a ride’s exit). Guests can then choose to rest comfortably away from the queue area or visit a shop, see a show or play a game until their boarding time.

Information on where guests access the ride is posted on each Ride’s Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

**Here’s How It Works**

- The guest with a mobility impairment or ASD should visit Guest Services or Town Hall upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.
- In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.
- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.
- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
- Guests may not accumulate more than one boarding time at a time.
- Due to the nature of the attractions in Cedar Point Shores, Alternate Access and Boarding Passes are only available at Cedar Creek via the entrance/exit. Boarding Passes, however, are required for Halloween Mazes/Houses if the maze has a line.
ADDITIONAL INFORMATION AND SERVICES

Our goal is to make Cedar Point as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Assisted Listening Devices
Assistive listening systems utilize a lightweight wireless device that receives a signal from transmitters at certain locations in order to amplify sound. These are recommended for guests with mild to moderate hearing loss.

To use the system, obtain a receiver at Guest Services. This system is located in the following Live Entertainment venues: Camp Snoopy™ Theatre, Jack Aldrich Theatre, Red Garter Saloon and Lusty Lil’s Palace Theatre.

Braille & Large Print Guides
Braille and large print guides of the Park Map & Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-served basis.

Campground & Hotel Shuttle Buses
A courtesy shuttle is available for transportation to and from park entrances, hotels, and Cedar Point restaurants. Available to Resort Guests only. Phones to call a Courtesy Shuttle are located at each stop.

Courtesy Shuttle locations:
- **Hotel Breakers**: Front Entrance
- **Lighthouse Point**: Bench adjacent to the Registration Office, Bench near the Pool, restrooms located near east end.
- **Marina**: Right of the Marina Building & Famous Dave’s
- **Bay Harbor**: Request a shuttle at the hostess stand
- **Cedar Point Shores**: Right of the main entrance
- **Main Gate**: At front of Season Pass Center

Family Care Center
Family Care Centers for parents to feed young children are located in our First Aid Stations.

First Aid
Our two First Aid Stations located behind Snoopy Boutique and in Frontier Town are staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid. In addition, a First Aid Station is located in Cedar Point Shores across from Crosscurrent. This location is open during Cedar Point Shores operating hours. Emergency medical care is available for overnight guests.
Interpretive Services
If requested at least one week in advance, Cedar Point will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please contact our Park Admissions department at 419-627-2309. Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

Parking for Guests with Disabilities
Guests requiring handicap parking spaces should turn on hazard lights and ask a traffic director for the exact location. Permits are required to use these spaces.

Quiet Room
Cedar Point offers a Quiet Room located at Frontier Town First Aid, for family members or caregivers to take a break and reduce sensory stimulation. Additionally there are sensory features provided for guest use.

Restrooms
Private restroom facilities for guests needing the assistance of another guest are available at Main First Aid, Camp Snoopy™, Lakeside Pavilion, Frontier Town First Aid, Matterhorn, and The Barnyard restroom on the Frontier Trail. Wheelchair accessible stalls are located at all restrooms.

Service Animals
Service animals are welcome at Cedar Point. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located across from Camp Snoopy on the Gemini Midway.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Cedar Point & Lake Erie Railroad, Kiddy Kingdom Carrousel, and Midway Carrousel. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Guest Services or Town Hall for more information.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.
Wheelchair, Stroller, & ECV Rental

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Rental Center located on the right just inside the main gate and at Joe Cool’s Corner Store (wheelchairs only) near the Magnum XL-200 Gate. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to www.cedarpoint.com and visit the rentals page under the Tickets tab. Rentals are available at the park while supplies last. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV’s, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. A wristband must be acquired at the Rental Center to be able to take the wheelchair and/or stroller out of the entrance gates to one of our resorts. For any guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity of 750 lb.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Cedar Point uses the following terms:

**Ability to hold on or brace:** Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.

**Hand-held Infant:** A hand-held infant is a child who is unable to walk to the ride unit independently or maintain independent seated postural control.

A hand-held infant will only be able to ride the following rides as long as the infant has a supervising companion:

- **Kiddy Kingdom Carrousel** — must be seated with a supervising companion in a chariot.
- **Midway Carrousel** — must be seated with a supervising companion in a chariot.
- **Cedar Point & Lake Erie Railroad** — must be seated with a supervising companion in the center of the bench.
- **Sky Ride**
- **Lakeslide Landing** — pool only
- **Lemmy’s Lagoon**
- **Cedar Creek**
• Waterin’ Hole
• Breakwater Bay — water depth restricted to 2 feet or less and have a supervising companion.
• Marina Pool
• Hotel Breakers Indoor Pool (Towers)
• Hotel Breakers East Outdoor Pool
• Hotel Breakers Outdoor Kiddie Pool
• Lighthouse Point Resort Pool

**Supervising Companion:** Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A Supervising Companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the guest remains seated properly—where applicable—and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders. An exception to this is at Peanuts™ Road Rally where the supervising companion does not have to be in the same row.

**EVACUATIONS**

Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. In Cedar Point Shores, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

**GUESTS OF LARGER SIZE**

All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight,
and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Blue Streak, Corkscrew, GateKeeper, Lake Erie Eagles, Maverick, maXair, Millennium Force, Mine Ride, Pipe Scream, Power Tower, Raptor, Rougarou, Skyhawk, SlingShot, Steel Vengeance, Top Thrill Dragster, Wave Swinger, Valravn, and Wicked Twister.

Maximum and minimum recommended weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance of: GateKeeper, Maverick, maXair, Millennium Force, Raptor, Rougarou, Skyhawk, Steel Vengeance, Top Thrill Dragster, Valravn, and Wicked Twister.

The manufacturer requires a maximum rider height on the following rides:

- GateKeeper – 78” (6’6”)
- Maverick – 78” (6’6”)
- Millennium Force – 78” (6’6”)
- Rougarou – 78” (6’6”)
- SlingShot – 79” (6’7”)
- Top Thrill Dragster – 78” (6’6”)
- Wicked Twister – 78” (6’6”)

**GUESTS USING WHEELCHAIRS**

Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of Cedar Point & Lake Erie Railroad where two wheelchairs can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible.

A wheelchair lift is available at Corkscrew, GateKeeper, Gemini, Iron Dragon, Wilderness Run, Magnum XL-200, Mine Ride, Pipe Scream, Raptor, Rougarou, and Steel Vengeance to transport a guest in a wheelchair to our 2nd story ride platform. Please use the phone at base of lift to request service. A standard elevator is available for self service at Maverick and Valravn. Please ask an associate at each location for assistance.
Manual wheelchair available at all locations with a wheelchair lift if weight exceeds the max capacity of 750lb.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Town Hall. Cedar Point personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Services.

**HEALTH RESTRICTIONS**

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more rider information, please stop by Guest Services or Town Hall or review the Safety Guides posted at each ride entrance and exit.

**HEIGHT REQUIREMENTS**

Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be “officially” measured at Guest Services, Lost Persons, or Town Hall. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement. Cedar Point reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

In Cedar Point Shores, height measurements are taken in bare feet.
LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Cedar Point is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the rider’s body.

GateKeeper, Magnum XL-200, Millennium Force, Rougarou, Top Thrill Dragster, and Valravn: loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-rider.

At Steel Vengeance metal detectors are in use. All loose items must be stored in a locker or left with a non-rider prior to entering the line.

For safety reasons, cell phone usage, taking pictures and filming on rides are prohibited.

Glasses must be secured on all rides. On GateKeeper, Maverick, maXair, Power Tower, Professor Delbert’s Frontier Fling, Skyhawk, SlingShot, Steel Vengeance, Top Thrill Dragster, Valravn, and Wicked Twister, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

LOSE AND FOUND

All items found at Cedar Point are turned in to our Lost and Found Department at our main gate. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation an immediate search may not be possible.

To report a Lost Item: On your Mobile Device and By Computer: Visit www.cedarpoint.com and select “Lost and Found” under “Help”. You may also report items using our guest courtesy computers in Guest Services and the Season Pass Center. You will receive an email confirmation once your Lost Item Report has been submitted. Once we have located your item, we will contact you by email to arrange its return.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.
MAGNETIC FIELDS ON RIDES
Magnetics are used at the following attractions: GateKeeper, Maverick, Millennium Force, Rougarou, Steel Vengeance, Top Thrill Dragster, Valravn, and Wicked Twister. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS
Due to the dynamic nature of rides, oxygen tanks are not permitted on most attractions. Please consult with Guest Services or Town Hall to speak with a member of management to discuss available rides. Oxygen tanks are permitted in all restaurants, shops and entertainment venues.

PHOTOSENSITIVITY/STROBE LIGHTING
Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions.

Attractions utilizing these effects include; GateKeeper, Magnum XL-200, Maverick, maXair, Millennium Force, Raptor, Rougarou, Steel Vengeance, Top Thrill Dragster, Valravn, WindSeeker, Woodstock™ Express, and Wilderness Run.

PREGNANCY
Pregnant guests are prohibited from riding all rides with the exception of CP & LE Railroad, Lake Erie Eagles, Giant Wheel, Kiddy Kingdom Carrousel, Midway Carrousel, Sky Ride.

In Cedar Point Shores, pregnant guest may participate in Cedar Creek, Breakwater Bay, and may accompany children in Lemmy’s Lagoon & Waterin’ Hole.

PROPER ATTIRE
Most rides require proper riding attire including shirts and shoes. Shirts and shoes are required in queues and all park pathways at all times. Swimwear is only permitted on and Thunder Canyon. For your safety, loose clothing (including scarves and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride restraint system. On Cedar Downs, SlingShot, Frontier Fling, and all roller coasters scarves will be required to be removed in their entirety.

In Cedar Point Shores, Appropriate swimwear is required. Thongs, or transparent clothing are not permitted. We reserve the right to determine appropriateness of swim wear. Swim diapers are required.
PROSTHETIC DEVICES

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Cedar Point Shores attractions. Guests should visit Guest Services or Town Hall prior to waiting in line or riding to ensure a safe riding experience.

Prosthetics are NOT allowed on the following:

- GateKeeper (leg prosthesis only)
- maXair (leg prosthesis only)
- Raptor (leg prosthesis only)
- Rougarou (leg prosthesis only)
- Steel Vengeance
- Valravn (leg prosthesis only)
- WindSeeker (a rider with more than one lower body prosthetic is not allowed)

The manufacturers of the following rides require that guests with prosthetic devices provide Cedar Point with documentation from the provider of their prosthetic device to guarantee that the device has been designed to remain securely in place while exceeding a maximum speed of 120 miles per hour with maximum G forces from -1.5 G’s to 5G’s with a sufficient safety factor for single point failure items:

- Maverick
- Millennium Force
- Top Thrill Dragster
- Wicked Twister

Guests with prosthetics enjoying their day at Cedar Point Shores should consult with a member of our Aquatics Supervisory team.

RIDE DEVICES FOR GUEST WITH DISABILITIES

Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Blue Streak, Corkscrew, Gemini, Iron Dragon, Magnum XL-200, Mine Ride and Woodstock Express.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: GateKeeper, Raptor, Rougarou, and Valravn.
Hand controls, when requested, can be used to assist a rider in operating a vehicle if unable to use the gas pedal. The following rides are equipped with hand controls: Antique Cars and Cadillac Cars.

In addition, specific ride vehicles are equipped with removable sides/a wider entry point at Giant Wheel, Pipe Scream, and Steel Vengeance. These vehicles may further assist guests in transferring from their wheelchair to the ride unit. Please inform an associate at the ride if you wish to use that vehicle.

Please see an associate at each ride, Guest Services, or Town Hall for assistance.

**RIDER CRITERIA**

Cedar Point’s Ride Admission Policy is designed to allow our riders to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

**Ability to exhibit independent seated postural control under the dynamic conditions of the ride.**

The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carrousel horses require the ability to form a saddle posture with the rider’s thighs.

**Appropriate center of gravity.**

The rider’s body must have the appropriate weight distribution for that ride.

**Ability to hold on with one functioning arm.**

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the rider to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

**Ability to hold on with two functioning arms.**

Ability to hold on with two functioning arms as defined above.

**Ability to brace self with one functioning leg.**

The rider must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis, (see page 15 Prosthetic Devices) which can be used
for bracing and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

**Ability to brace self with two functioning legs.**

Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis (see page 15 for Prosthetic Devices) which can be used for bracing.

**Minimum of two functioning extremities.**

Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

**Minimum of three functioning extremities.**

Riders must have a minimum of three functioning extremities (two legs and an arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

**Ability to enter/exit the attraction within specified parameters without endangering self or others.**

Riders must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the alternate access entrance or having someone aid you in boarding. For the safety of our associates and riders, ride operators are instructed not to perform any lifting of riders, other than in the children’s area.

**Appropriate Observed Behavior:**

Rider demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

**Riders have a duty to:**

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided
CASTS AND BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on the slides in Cedar Point Shores.

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where guests must be able to walk independently or be assisted by a member of their party.

Rides using this symbol can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party. Guest must be accompanied by a companion who can assist with transfer, as Cedar Point associates are not permitted to physically assist guests with transferring from their wheelchairs.

This symbol is used to identify rides where the guest may remain in wheelchair. These rides include Cedar Point & Lake Erie Railroad.

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Cars

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.
Hand-held infants are not permitted.

This is an antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests who are not able to steer and depress the accelerator must have a supervising companion accompany them to drive.

Guests with a cervical collar or neck brace are not permitted to ride.

Guests with a visual impairment must ride with another rider who meets the requirements to drive.
Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car.

Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

**Blue Streak**

Guests must be 48” tall to ride.

A high speed wooden roller coaster with a combination of banked turns and airtime humps.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Cadillac Cars**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Hand-held infants are not permitted.

This is an antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.
Guests who are not able to steer and depress the accelerator must have a supervising companion accompany them to drive.

Guests with a cervical collar or neck brace are not permitted to ride.

Guests with a visual impairment must ride with another rider who meets the requirements to drive.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car.

Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

**CAMP SNOOPY™**

**Balloon Race**

Guests must be 36” tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 300 lb per car.

This ride only accommodates one adult per balloon.

PEANUTS™ themed hot air balloon ride that spins and raises riders in the air.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.
Camp Bus

Guests must be 36” tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum weight – 440 lb. per row

This ride only accommodates three adults per row.

PEANUTS™ themed bus with six rows that seats four guests per row. The bus rotates in a clockwise direction reaching a height of over 20 feet.

Restrainment System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar or neck brace not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Charlie Brown’s Wind Up

Guests must be 36” tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 275 lb per swing.

This ride only accommodates one adult per swing.

PEANUTS™ themed chair swing children’s ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restrainment System: A shared lap bar and a between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities.
Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

**Linus’ Beetle Bugs**

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Guests less than 6 years old must be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 800 lb. per car.

This is a circular ride where cars pivot by centrifugal force created by the ride’s rotating table.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.
Peanuts™ 500

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 275 lb per car. This ride only accommodates one adult per car.

PEANUTS™ themed children’s ride that allows guests to ride in their own race car that whips around an oblong track.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Red Baron

Guests must be between 36” and 54” tall to ride.

PEANUTS™ themed children’s plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.
Guests must be between 36” and 54” tall in bare feet to jump.

An air filled mattress located inside a large inflated Snoopy.

**Rider Criteria:** Guests with a cervical collar, neck brace, braced arm cast, full arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance.

---

**Wilderness Run**

Guests must be 36” tall to ride alone. Guests over 54” tall must be accompanied by a child.

This ride only accommodates one rider over 54” per car.

A junior steel rollercoaster with mild drops, bumps, and turns.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the Exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750lb.

Please signal the host at the exit to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**WARNING:** This ride contains strobe lighting.
Woodstock’s Airmail

Guests must be between 36” and 54” tall to ride.

Maximum Weight – 300 lb. per seat.

PEANUTS™ themed children’s ride that hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

Guests may ride with one leg amputation, amputation must be below the knee. Guests with the leg amputation must be at least 42” tall to ride.

Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Woodstock Express

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 300 lb. per car.

A PEANUTS™ themed junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities.
Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

---

**Cedar Downs Racing Derby**

Guests must be 48” tall to ride.

A high speed circular ride somewhat resembling a carousel. It generates a high level of centrifugal force due to the speed and size of the ride table.

**Restraint System:** Guests must have the ability to straddle the ride unit, hold onto the horse, and grip the horse with both legs.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up onto a horse.

---

**Cedar Point & Lake Erie Railroad**

Guests must be a minimum of 46” tall to ride alone or be accompanied by a Supervising Companion. Guests less than 46” tall must sit in the center of the bench, not on the outside edge.

Authentic coal-fired steam engine that transports passengers along a circle track in the back section of the park. There are two stations, Main Station located near Iron Dragon and Frontier Station located near Maverick.

**Rider Criteria:** Guests must be able to demonstrate seated postural control and appropriate observed behavior or ride with a supervising companion.
**Rider Access:** Alternate Access is to the right of the turnstile at Main Station and in center of station at Frontier Station. Riders must be capable of stepping up onto the train. Wheelchairs can be folded and loaded on the train.

A special car and ramp are available for those unable to board without leaving their wheelchair.

Service animals are permitted to ride.

**Corkscrew**

**Guests must be 48” tall to ride.**

A high-speed, looping roller coaster which turns riders upside down three times. Riders will experience weightlessness and rapid movements from side-to-side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

It is recommended that earrings be removed prior to riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the Entrance to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.
**Dodgem**

Guests must be 48" tall to ride alone OR 42" tall and accompanied by a supervising companion.

A bumper car ride where guests drive cars designed for bumping into each other. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

**Restraint System:** A shared lap bar secures all riders across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive.

Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

**Rider Access:** Alternate access is available at the gate to the left of the entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** Avoid head-on collisions.

**GateKeeper**

Guests must be between 52" and 78" tall to ride.

A high-speed, wing looping roller coaster which turns riders upside down six times. Riders will experience weightlessness and rapid movements from side-to-side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.
**Rider Criteria:** Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the exit area to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**Note:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

**Gemini**

*Guests must be 48" tall to ride.*

A high-speed wood and steel double racing coaster with a combination of high speed banked turns, airtime humps, and rapid directional changes.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis.
Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the Entrance to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**Giant Wheel**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants and single riders are not permitted.

A 145 foot tall ferris wheel. Riders ride in in one of 36 gondolas suspended from the outer rim of the wheel.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests must be able to demonstrate seated postural control and appropriate observed behavior or ride with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A specific cabin at this attraction is equipped with a larger door which may assist a rider in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle.

Please use caution, as the ride unit may shift when entering and exiting.
Iron Dragon

Guests must be 48” tall to ride.

A suspended roller coaster with cars that hang down from the track and swing out to the sides as the ride drops and turns.

Restraint System: A shoulder harness secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

A wheelchair lift is available to transport guests from the Entrance to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

KIDDY KINGDOM

4 x 4’s

Guests must be under 54” tall to ride. Guests over 54” tall must be accompanied by a child. Hand-held infants are not permitted.

This ride only accommodates one rider over 54” per car.

This ride is a miniature truck ride that follows an electric track.
Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Dune Buggies, Mustangs, Police Cars

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with Dune Buggies, Mustangs, or Police Car ride units.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Helicopters

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie helicopter ride where riders control the elevation of each unit.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
Kiddy Kingdom Carrousel

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants must ride in a chariot.

A carousel ride which features animals—both stationary and moving up and down—and chariot seating mounted on a circular platform that rotates.

**Restraint System:** Guests under 46” must be seated in a chariot or ride on the middle row of animals and be held by a supervising companion who is standing on the platform between the animals.

Only one rider per animal.

**Rider Criteria:** Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit.

Guests who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior, must ride in a chariot with a supervising companion.

Riders with a full leg cast must be seated in a chariot.

**Rider Access:** Alternate access is mainstreamed at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to ride in the chariots.

Motorcycles

Guests must be between 39” and 54” tall to ride. Both feet must simultaneously touch the floor.

A kiddie circular ride with motorcycle ride units.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Full leg casts are not permitted on this ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.
Rock, Spin & Turn

Guests must be under 54” tall to ride. Hand-held infants are not permitted.

A kiddie tea cup spinning ride.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or 2 lower arm casts are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Roto-Whip

Guests must be under 54” tall to ride. Hand-held infants are not permitted.

A kiddie ride that allows guests to ride in their own car that whips around a track.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
Sky Fighters

Guests must be under 54” tall to ride. Hand-held infants are not permitted.

Maximum Weight – 100 lb per jet.

A kiddie ride with jets that rise in the air.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Space Age

Guests must be under 54” tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with spaceship ride units.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Lake Erie Eagles

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

The smaller rider must sit on the inside seat.
Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Magnum XL-200

Guests must be 48" tall to ride
An out and back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Limit one rider in wheelchair and one companion in lift at a time.
NOTE: Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

Matterhorn ⚠️

Guests must be 46” tall to ride alone OR 42” tall and accompanied by a supervising companion.

Maximum Weight – 510 lb. per car.

Flying bob sled ride where cars are pivoted toward a horizontal position by the centrifugal force created by the ride’s rotating table.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

The larger rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Maverick® ⚠️

Guests must be between 52” and 78” tall to ride.

A launch full circuit roller coaster featuring weightlessness, high speed banked turns, and rapid directional changes.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee.
Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Earrings must be removed prior to riding.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is via a gate at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

An elevator is available to transport guests to the ride platform.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

![maXair](image)

**Guests must be 52” tall to ride.**

A thrill ride that swings riders to a height of 140 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.
Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding. Leg prosthetics are not permitted on this ride. Guests should check with Guest Services or Town Hall to determine if they are eligible to ride without the prosthetic.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

---

**Midway Carrousel**

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants must ride in a chariot.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

**Restraint System:** Guests under 46” must be seated in a chariot or ride on the middle row of animals and be held by a supervising companion who is standing on the platform between the animals.

Only one rider per animal.

**Rider Criteria:** Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit.

Guests who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior must ride in a chariot with a supervising companion.

Riders with a full leg cast must be seated in a chariot.

**Rider Access:** Alternate access is mainstreamed at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform.

Service animals are permitted to ride in the chariots.
Millennium Force®

Guests must be between 48” and 78” tall to ride.

A high-speed giga roller coaster. Riders will experience weightlessness and rapid movements from side-to-side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

Mine Ride

Guests must be 48” tall to ride.

A wood and steel roller coaster. Riders will experience rapid changes in direction.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.
Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

---

### Monster

*Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.*

**Maximum Weight – 400 lb. per car.**

This is a circular ride with six sweeps of gondolas moving clockwise versus the up and down counter-clockwise rotation of the arms. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

**Restraint System:** A bucket with a safety pin encapsulates the riders.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, braced arm cast, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.
Please use caution, as the ride unit may shift when entering and exiting.

**Ocean Motion**

![Ocean Motion Symbol]

Guests must be 48” tall to ride alone OR 39” tall and accompanied by a supervising companion.

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row.

Riders between 39” and 48” tall must be seated in the center two rows of the ship and sit towards the middle of the row with their supervising companion.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.

**Pipe Scream**

![Pipe Scream Symbol]

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A family thrill ride where a 36 passenger gondola spins as it travels on a track. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and directions.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.
Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Arm casts must not be positioned next to another rider.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row.

A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

---

**PLANET SNOOPY™**

**Flying Ace Balloon Race**

**Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.**

**Maximum Weight – 300 lb per car.**

This ride only accommodates one adult per balloon.

PEANUTSTM themed hot air balloon ride that spins and raises riders in the air.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Please use caution, as the ride unit may shift when entering and exiting.
**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

**Joe Cool’s Dodgem School**

*Guests must be between 35” and 53” tall to ride.*

A bumper car ride for children where guests drive cars around a small track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

**Restraint System:** An individual shoulder strap is positioned across the chest and under the arms of each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

- Guests with a cervical collar, neck brace, or broken collar bone, or braced arm cast are not permitted to ride.
- Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

**Rider Access:** Alternate access is available through a gate near the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** Avoid head-on collisions.

**Kite Eating Tree**

*Guests must be between 36” and 54” tall to ride.*

Maximum Weight – 660 lb. per ride.

PEANUTS™ themed children’s ride that hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

- Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.
Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**PEANUTS™ Road Rally**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

*Maximum Weight – 440 lb per car.*

This ride only accommodates one adult per truck. The adult must sit in the back seat.

This ride is a miniature truck ride that follows an electric track in a “train-like” fashion.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit in the front row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**Snoopy’s™ Deep Sea Divers**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

*Maximum weight – 440 lb. per row.*

This ride only accommodates three adults per row.

PEANUTS™ themed submarine with six rows that seats four guests per row. The submarine rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.
Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Snoopy’s™ Express Railroad**

Guests must be 36” tall ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 880 lb. per car.

Maximum of 2 adults per uncovered car.

PEANUTS™ themed kiddy train ride featuring 5 rail cars on a figure 8 railroad track.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Adults may only ride in the uncovered cars.

Rider Criteria: Guests must have sufficient lower extremities to maintain the proper riding position.

Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.
**Snoopy’s™ Space Race**

- Guests must be between 36” and 54” tall to ride.
- PEANUTS™ themed children’s space ship ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**Woodstock’s Whirlybirds**

- Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

- Maximum Weight – 440 lb per car.

- This ride only accommodates one adult per car.

- This is a PEANUTS™ themed family tea cup spinning ride that travels a circular path where the riders can spin their own cars.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.
Power Tower

Guests must be 48’ tall to ride.

A tower ride with a chair lift-type seat where riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Professor Delbert’s Frontier Fling

A Skycoaster® Experience

Guests must be 42” tall to ride.

Maximum Weight – 850 lb. per flight.

A high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted 150 feet into the air and control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds up to 65 miles per hour.

Restraint System: Riders wear a full body harness that supports the rider in a prone position. The harness is connected to the flight support cables.
Rider Criteria: Guests are required to have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is necessary that the rider possesses two arms sufficient for proper functioning of the flight suit be maintained. Lower extremities must be of sufficient enough length to be contained and restrained by a leg strap. Proper Functioning of the flight suit must be maintained for riders without appropriate center of gravity.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders must be able to walk independently or be assisted by a member of their party.

NOTE: This is an extra charge attraction.

Raptor®

Guests must be 54” tall to ride.

A high-speed, inverted looping roller coaster which turns riders upside down six times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities One functioning arm that includes a hand is required to ride.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.
Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**WARNING:** This ride contains strobe lighting.

**Rougarou®**

Guests must be between 54” and 78” tall to ride.

A high-speed, floorless looping roller coaster which turns riders upside down four times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.
Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

It is recommended that earrings be removed prior to riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

---

**Scrambler**

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion.

*Maximum Weight – 510 lb. per car.*

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

The larger rider must sit on the outside of seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.
**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Sky Ride**

*Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.*

Maximum weight – 660lb. per cabin.

A cable car ride with gondolas suspended from an overhead moving cable.

**Restraint System:** A door with a safety lock secures the ride unit to secure the riders.

**Rider Criteria:** Guests must have at least one functioning arm with a minimum of two functioning extremities. Hand-held infants and guests who do not have appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to walk up the stairs to a second story platform, take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Wheelchairs cannot be accommodated in the gondolas, and must be left at the bottom of the exit stairs.

**Skyhawk**

*Guests must be 48” tall to ride.*

A high speed ride featuring two giant swinging arms with 20 seats on each arm. Riders will be pushed towards the sky and experience weightlessness as they reverse direction.

**Restraint System:** An individual lap bar with safety belt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.
Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with any leg prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**NOTE:** The manufacturer prohibits guests with a fear of heights from riding Skyhawk.

---

**SlingShot**

Guests must be between 48” and 79” tall to ride.

*Minimum Weight – 110lb. per launch.*

*Single riders are not permitted.*

A two-person capsule that is attached to steel cables and propels riders in the air. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces/directions.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support
weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**NOTE:** This is an extra charge attraction.

**Steel Vengeance®**

Guests must be 52" tall to ride.

A high-speed hyper-hybrid roller coaster turning riders upside down four times. Riders will experience high accelerations, weightlessness, and changes in the longitudinal, lateral, and vertical directions.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs (including feet).

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.

Prosthetics are not permitted on this ride. Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row.
A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Metal detectors are in use at Steel Vengeance. Guests will be required to go through metal detection prior to entering the ride line and any loose articles identified must be secured in a locker or left with a non-rider prior to entering the line.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

### Super Himalaya

![Super Himalaya](image)

**Guests must be 52” tall to ride alone OR accompanied by a supervising companion. Riders less than 8 years old must be accompanied by a supervising companion. Hand-held infants are not permitted.**

**Maximum Weight – 495 lb. per car.**

This is a circular ride where cars move up and down on a rotating table. Riders will experience acceleration and side-to-side movement.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The larger rider must sit on the outside of seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.
Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping into and out of a steeply inclined ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Thunder Canyon

Guests must be 46” tall to ride.

A water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Riders will get wet.

Rider Access: Alternate access is available to the right of the ride’s exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Watch your step, as the ride unit may be slippery and wet.

NOTE: Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with riders. These items will get wet. Please consider leaving loose articles with a non-rider.

CAUTION: Boats may bump into the side of channel and other boats.

WARNING: You will get wet on this ride.

Tiki Twirl

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.

A circular ride where ride units move in the opposite direction of the ride table, spinning riders in two opposing directions. Riders will experience rapid movements from side-to-side.
Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.
The larger rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit.

Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Top Thrill Dragster®

Guests must be between 52” and 78” tall to ride.

A high-speed strata roller coaster. Riders will experience weightlessness, strong positive forces, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit.

Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.
Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

**Troika**

Guests must be 54 inches tall to ride alone OR 42 inches tall and accompanied by a supervising companion.

Maximum weight – 330 lb. per car.

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride’s main clockwise rotation.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

The larger rider must sit on the outside of seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.
A high-speed, floorless looping dive roller coaster which turns riders upside down three times. Riders will experience weightlessness and rapid movements from side-to-side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

An elevator is available to transport guests from the exit to the ride platform.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.
Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

**Wave Swinger** ⚠️

Guests must be 48” tall to ride.

*Maximum Weight – 230 lb. per rider.*

A chair swing ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** An individual lap bar and a between-the-leg safety belt secures each rider.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please use caution, as the ride unit may shift when entering and exiting.
Wicked Twister

Guests must be between 52” and 78” tall to ride.

A twisting impulse coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.
Guests must be 52” tall to ride.

Maximum weight – 304 lb. per rider.

A chair swing ride while spreading its arms, swings riders in a circular motion at a 45 degree angle at speeds up to 30 miles per hour as the swings climb the tower.

**Restraint System:** An individual lap bar and a between-the-legs safety belt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.
FORBIDDEN FRONTIER

Grab your map and prepare for a minute-by-minute real-life adventure, where you and others are challenged, questioned and pushed to the limits in both brain and brute power. Be immersed in interactive encounters with the island inhabitants and push yourself with physically active challenges that test your resourcefulness and fortitude! It’s your job to discover and uncover all that you can; to solve the mystery surrounding the Forbidden Frontier, and return to tell the tale. Every ending is different and determined by you and the secrets you unlock!

Accessible Restrooms are available on the island.

The entrance to Forbidden Frontier is on the Frontier Trail near Professor Delbert’s Frontier Fling.

Highground

Guests must be 42” tall to participate alone or 32” tall and accompanied by a supervising companion. Guests over 70” tall must use caution.

Maximum Weight – 350 lb.

A climbing structure with multiple levels of suspended rope bridges and net tunnels that connect to towering platforms that overlook Adventure Island. Interactive elements are located throughout the structure.

Criteria: Guests must be able to navigate Highground under their own power and be able to walk/stand. Alternate access is available. Guest will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the climbing structure.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to participate. Casts of any kind are not permitted.

Shoes are required to participate and must be closed toe.
Crystal Rock Rafts 2 (located on adventure island)

Guests must be 54” to participate alone or 36” tall and accompanied by a supervising companion.

Maximum Weight – 750 lb. per raft

Rafts that transport passengers across Snake River Swamp.

Criteria: Guests will have to use a pulley system to control the raft across the swamp to the landing.

Alternate Access is mainstreamed via the entrance.

HALLOWEEEKENDS®

Warning

Theatrical Fog effects, areas of low lighting, loud music and sound effects and strobe lighting are used throughout the park during HalloWeekends®, including on our midways, outdoor scare zones, indoor mazes, live entertainment venues and children’s attractions.

Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Please adhere to all posted and verbal warnings and directions. Characters in our HalloWeekends® attractions will not touch you: please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behavior and profanity are also cause for removal from the park.

Alternate Access is available via the entrance. Guests in Electric wheelchairs must transfer to a manual wheelchair to enter Mazes.
SHOWS/ENTERTAINMENT
Due to the popularity of our shows, we suggest that you arrive early as seating may be limited. Show schedules are available at Guest Services, Town Hall and at any theatre entrance.

All Entertainment venues are accessible to guests who are mobility impaired. Assisted listening devices may be available for guests who are hearing impaired. Large print scripts may also be available. Ask any associate at the venue for assistance.

BackBeatQue Stage
Location: At the BackBeatQue restaurant.

Camp Snoopy™ Theatre
Various performances of fun from Charlie Brown and the PEANUTS™ gang.

Celebration Plaza Stage
Location: Near the Main Train Station

Lakeside Stage
Location: Near WindSeeker on the Wicked Twister midway

Gossip Gulch Stage
Location: across from the Palace Theatre in Frontier Town

CEDAR POINT SHORES
Jack Aldrich Theatre  
Located in the front of the park across from the Sky Ride East station.

Lusty Lil’s Palace  
Location: FrontierTown next to train station.  
Offers a variety of live entertainment shows.  
Cold beer, pop and various sandwiches are also available.

Outside Coasters  
Location: Beside Coasters Drive-In.

Planet Snoopy Gazebo  
PEANUTS™ Sing-a-long and character appearances.

Red Garter Saloon  
Location: Entrance to Frontier Trail across from the Millennium Force  
Offers a variety of live entertainment shows. Cold beer, pop and various sandwiches are also available.

Sand Bar  
Location: On the boardwalk behind Hotel Breakers
Cedar Point Shores Water Park has separate admission.

Cedar Point Shores offers slides, activity areas and a wave pool and is open to the public. Cedar Point admission is not required. This attraction has a separate fee. Please note height requirements at the entrance to each attraction. Height measurements at Cedar Point Shores are taken in bare feet.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, Cedar Point Shores routinely utilizes training exercises to improve our lifeguards’ skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

Appropriate Attire

Appropriate swimwear is required. Thongs or transparent clothing are not permitted. There can be no sharp objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

The Cedar Point Shores First Aid Station is open during Cedar Point Shores Operating Hours and is located across from Crosscurrent slide complex. Refrigeration for medication, with the exception of bee sting anaphylaxis kits, is available at First Aid, and medical equipment can be stored.

Life Jackets

Life jackets are required for children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42" tall must wear life jackets and be accompanied by a supervising companion.
Great Lakes Cove & Lily Pad Walk have additional requirements:
Life Jackets are required for children who are less than 52” tall in bare feet or those who are inexperienced or non-swimmers. Children who are less than 46” tall in bare feet must wear life jackets and be accompanied by a supervising companion.

Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one.

Water Wheel Chairs and Pool Lifts
A water wheelchair is available for guests requiring additional assistance when at Breakwater Bay, Lemmy’s Lagoon, Muffleheads Swim up Bar & at SplasH20 on ground level. The water wheelchair may be used by multiple guests on the same day. While in a/the wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at Cedar Creek, Runaway Rapids, and Great Lakes Cove. During your visit, please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATER PARK ATTRACTIONS
The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safety. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Breakwater Bay Wave Pool
Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.
A large wave pool with depths ranging from 0 to 6 ft. Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion.

Guests must have a minimum of two functioning extremities.

Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion.

Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisor team to obtain access to the water wheelchair.

Cedar Creek

Children must be 42” tall in bare feet to ride alone OR be accompanied by a supervising companion. Children under 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A supervising companion may accompany up to 2 children.

A 1,200 foot slow moving river with tubes. Guests may float with or without a tube.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion.

Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion.

Guests who cannot enter/exit without endangering self or others must be accompanied by a supervising companion.
Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**Crosscurrent**

Guests must be 48 inches tall to participate. Maximum weight limit of 300 lb. per tube.

Two single rider partially enclosed serpentine tube slides ending in a 42 inch deep pool. One single rider straightaway humpbacked tube slide ending in a 42 inch deep pool.

**Rider Criteria:** Riders are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

**Great Lakes Cove/Lily Pad Walk**

Children under 52” tall in bare feet or those who are inexperienced or nonswimmers are required to wear a life jacket. Children must be 46” tall in bare feet to ride alone OR be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.

An interactive pool with floatables and a Lily Pad Walk. Maximum water depth is 48” deep.
**Rider Criteria:** Hand-held Infants may not participate on the Lily Pad Walk.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**Lake Erie Nor’easter**

Guest must be 48" tall to ride. Maximum weight limit 250 lb. per tube.

Enclosed serpentine tube slides ending in a 42" pool.

**Rider Criteria:** Guests must sit facing forward in a tube, holding onto the tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

**Lakeslide Landing**

Guests must be 36” tall in order to ride the slides. Guests under 36” tall including hand-held infants may participate in the pool if accompanied by a supervising companion. Lakeslide has a maximum weight limit of 200 lb.

An interactive water playground with slides and mini water thrills. Maximum water depth is 24” deep.

**Rider Criteria:** Riders are required to maintain the proper riding position – arms crossed over their chest, legs crossed at the ankles, and back flat against the slide.
Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and one functioning leg.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

### Lemmy’s Lagoon

**Guests must be under 54 inches tall to participate. Guests over 54 inches tall must be accompanied by a child in order to participate.**

A zero-depth interactive water playground featuring slides and water features.

**Rider Criteria:** Riders unable to maintain seated postural control, have the ability to safely enter and exit the attraction or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

### Muffleheads Beach Bar

A 21 years old and over adult pool and bar. ID required for entry. Water depth is zero to 42”.

**Rider Criteria:** Guests without seated postural control or appropriate observed behavior must be accompanied by a companion 21 years or older. Guests with a full arm cast, braced arm cast or full leg cast are not permitted to participate.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.
Perch Plunge

Guests must be at least 48" tall in bare feet to ride. Maximum weight limit is 300 lb. per rider.

Three single rider partially enclosed serpentine body slides ending in a 42" splash pool.

**Rider Criteria**: Guests are required to remain lying flat with their back against the slide, arms crossed behind your head, and legs crossed at the ankles.

Guests must have four functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access**: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Point Plummet

48” tall in bare feet to ride. Maximum weight limit 300 lb. per rider.

Guests stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Maximum water depth is 6”.

**Rider Criteria**: Guests must stand with their head and back against the slide, legs firmly crossed at the ankles, with arms folded across the chest, and maintain position throughout ride.

Guests must have four functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**Rider Access**: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Loose articles are not permitted, including, but not limited to: piercings, necklaces, rings, T-shirts or rash guards.
Portside Plunge

Guests must be at least 48” tall in bare feet to ride. Maximum Weight – 300 lb. per tube.

Two slides send riders, who are seated on an inner tube, through twists and turns in near complete darkness.

**Rider Criteria:** Guests must be seated in the tube, facing forward, and holding onto the handles.

Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Riptide Raceway

Guests must be at least 42” tall in bare feet to ride. Maximum Weight 300 lb. per guest. One single rider per mat and slide.

Slide complex that has guests slide head first on a mat down flumes into a 6” deep runout.

**Rider Criteria:** Guests must lie stomach down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body.

Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.
Rider Access: Access to the attraction requires climbing several flights of stairs with a mat. Guests will have to ascend the slide tower and be capable of safely entering the mat, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the mat may shift. The mat and surrounding area may also be slippery.

Runaway Rapids

Children less than 48” tall in bare feet are required to wear a life jacket. Children less than 42” tall in bare feel must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to two children.

1,200 foot activity flume which is 30 inches deep with many tipping buckets, waterfalls, geysers, and a wave channel.

Guests may float, with or without a tube.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion.

Guests must have a minimum of one functioning arm and one functioning leg, or be accompanied by a supervising companion.

Hand-held Infants may not participate.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

SplashH2O Slides varies by slide

Some slides have varied height requirements. Slide height requirements are either 36” or 40” depending on the height of the slide. Maximum weight limit 300 lb. per rider.

Interactive play structure with various play elements including a giant tipping bucket, sprayers, tipping
pails, net crawls, rope bridges, and seven body slides. Pool depth is between 0” – 6” deep.

Rider Criteria: Riders are required to maintain the proper riding position – arms locked behind head, legs crossed at the ankles, and back flat against the slide.

Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests must have sufficient upper extremities to maintain the proper riding position.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted on slides.

Add Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascent the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

SplashH2O Play Structure

Interactive water play structure with a large tipping bucket and multiple levels connected by net crawls, bridges, and stairways.

Ride Criteria: Guests unable to maintain seated postural control must be accompanied by a supervising companion. Hand-held Infants must remain on ground level.

Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

Rider Access: Access is available on the ground level. Access to the elevated levels require guests to walk up several flights of stairs."

Storm Surge

Guests must be at least 46” tall in bare feet to ride. Maximum weight limit 1,000 lb. per raft. Minimum of two riders; maximum of four.

Family tube slide with high-banked turns, sudden drops, and a winding twisting pathway ending in a 24” deep pool.
Rider Criteria: Guests are required to remain seated with back against the raft, facing forward, and holding onto the handles.

Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

Waterin’ Hole

Guests must be under 52 inches tall to participate. Guests over 52 inches tall must be accompanied by a child in order to participate. An interactive water playground for children with slides and play elements. Maximum water depth is 15” deep.

Rider Criteria: Riders are required to maintain the proper riding position – arms locked behind head, legs crossed at the ankles, and back flat against the slide. Hand-held Infants must be accompanied by a supervising companion.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted on slides. Guests with cervical collars or neck braces, or broken collar bones are not permitted on elevated play structures.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.
Wild Walleye

Guests must be at least 48 inches tall. Maximum weight limit 300 lb. per tube.

Two single rider serpentine tube slides ending in a 42” deep pool.

Rider Criteria: Guests are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

RESORT POOLS & SPAS

Hotel Breakers Towers Pool
Indoor resort pool located near TGI Friday’s. No Lifeguard on Duty, Swim at your own risk! Maximum pool depth is 36” deep.

WARNING

Many rides at Cedar Point are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services or Town Hall. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Cedar Point does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE!

All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened, and tightened properly to allow guests to ride.

Information in this guide is subject to changes.
