Welcome to Canada’s Wonderland!

We are glad you are here! At Canada’s Wonderland we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Canada’s Wonderland’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services or Ride Accommodations to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.
**RIDE RATING SYSTEM**

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

**Each ride/attraction is placed into one of five categories:**

---

**WORLDS OF FUN**

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

PLEASE RIDE SAFELY

The Ontario Technical Standards and Safety Authority Act, 2000, Amusement Devices Regulation (O. Reg. #221/01) requires that riders obey all warnings and directions regarding any ride and behave in a manner that will not cause or contribute to injury to themselves or others. You can be charged under the Act if you fail to follow the rules for riding safely.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Ride Accommodations. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker, or with a non-rider. Canada’s Wonderland is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Canada’s Wonderland as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Assisted Listening Devices
Assisted listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss. Assisted listening devices are available at Guest Services for use at select theatre locations.

Braille & Large Print Guides
Braille and large print guides of the Park Map & Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-served basis.

Family Care Centre
Family Care Centres for parents to feed young children are located in KidZville inside of the Parent Rest Zone and also in Medieval Faire at the Main First Aid facility near Spinovator.
First Aid
Our First Aid Centre located in Medieval Faire near Spinovator is staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid. In addition, a First Aid Station is located in Splash Works beside the waterpark entrance. This location is open during Splash Works operating hours.

Parking for Guests with Disabilities
Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed.

Quiet Room
Located at Guest Services, a Quiet Room is provided for those guests with sensory processing concerns. This dedicated space provides tools for family members or caregivers to reduce sensory stimulation in a controlled environment.

Service Animals
Service animals are welcome at Canada’s Wonderland. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Antique Carrousel and Character Carrousel. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Guest Services for more information.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Washrooms
Private washroom facilities for guests needing the assistance of another guest are available at all family washroom locations. Wheelchair accessible stalls are located at all washrooms.

Wheelchair, Stroller and ECV Rental
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Rental Centre at the front gate. However, since wheelchairs, ECVs, and strollers are rented on a first-come, first-served basis, we urge guests to bring their own. Quantities are limited. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park. Wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services prior to entering the park.

DEFINITIONS
Every ride entrance lists height requirements and special instructions regarding the ride. Canada’s Wonderland uses the following terms:

Supervising Companion: Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

Ability to Hold On or Brace: Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.

Hand-Held Infants: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a supervising companion: Antique Carrousel (in a chariot), Character Carrousel (in a chariot), Lakeside Lagoon Pool, Lazy River, Sprayground, and White Water Bay (water depth may be restricted). Hand-held infants and their supervising companion may also enjoy Maple Park Treehouse, Pumphouse, and Splash Station but may not participate on the elevated sections of the attractions.
EVACUATIONS
Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to manoeuvre across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions. In Splash Works, guests may be asked to evacuate pools as quickly as possible using stairs or ladders.

If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation of if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE
All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or body proportions) may not be accommodated on some of our rides.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit. Test seats are located at the ride entrances of Behemoth, Leviathan, Lumberjack, Skyhawk, and Yukon Striker.

The manufacturer requires a maximum rider height on the following rides: Behemoth (80”), Flight Deck (78”), Frequent Flyers (60”), Joe Cool’s Dodgem School (54”), Leviathan (80”), Silver Streak (76”), SlingShot (79”), Snoopy vs. Red Baron (60”), Snoopy’s Space Race (60”), Speed City Raceway (78”), Splash Station Slides (48”), Swing Time (54”), White Water Canyon (76”), and Yukon Striker (77”).

GUESTS USING WHEELCHAIRS
On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. Wheelchair lifts are available at Behemoth, Leviathan, and Wonder Mountain’s Guardian to transport a guest in a wheelchair to our 2nd storey ride platforms. Please use the call button at base of lift to request service. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Ride Accommodations. Canada’s Wonderland personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at the Rental Centre at the front gate.

HEALTH RESTRICTIONS
Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in the Guest Assistance Guide or review the Safety Guides and all warning signs posted at each ride entrance and Alternate Access Entrance.

HEIGHT REQUIREMENTS
Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be “officially” measured at International Street Height Check Stations. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes
to help meet a height requirement. Canada’s Wonderland reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated. In Splash Works, height measurements are taken in bare feet.

LOOSE AND LARGE ARTICLES
Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-rider. Canada’s Wonderland is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the rider’s body.

For safety reasons, cell phone usage, taking pictures and filming on rides are prohibited.

Glasses must be secured on all rides. On Skyhawk, SlingShot, Time Warp and Xtreme Skyflyer, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

LOST AND FOUND
All items found at Canada’s Wonderland are turned in to Lost and Found at the front gate. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Please complete a Lost and Found form at the ride or log onto www.canadaswonderland.com/help/lost-and-found to ensure the item is returned to you if it is found.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES
Magnetics are used at the following attractions: Backlot Stunt Coaster, Behemoth, Drop Tower, Leviathan, Wonder Mountain’s Guardian, and Yukon Striker. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.

OXYGEN TANKS
Due to the dynamics of our rides, oxygen tanks may be restricted. Please stop by Guest Services to identify any rides that may allow your tank. Oxygen tanks may be taken into all food, merchandise or entertainment buildings.

PHOTOSENSITIVITY/STROBE LIGHTING
Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Behemoth, Boo Blasters on Boo Hill, The Fly, Ghoster Coaster, Leviathan, Taxi Jam, Thunder Run, WindSeeker, Wonder Mountain’s Guardian, and Yukon Striker.

PREGNANCY
Guests who are pregnant may only ride Antique Carrousel, Character Carrousel, Flying Eagles, Jokey’s Jalopies, KidZville Station, and Swan Lake, and participate in Lazy River and White Water Bay.

PROPER ATTIRE
Most rides require proper riding attire which include shirts, shorts/pants and shoes. Shirts and shoes are required in queues and all park pathways. Swimwear is not permitted on rides outside of Splash Works with the exception of Riptide, Timberwolf Falls, and White Water Canyon. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, Riptide, Skyhawk, SlingShot, Soaring Timbers, Speed City Raceway, and Spinovator, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Blast Off!, Drop Tower, Flight Deck, Lumberjack, Pyclone, Shockwave, Silver Streak, Skyhawk, Sledge Hammer, SlingShot, Swing of the Century, Swing Time, WindSeeker, and Yukon Striker.

Appropriate swimwear is required. Thongs or transparent clothing are not permitted.

PROSTHETICS
Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on select Splash Works attractions. Guests should visit Guest Services or Ride Accommodations prior to riding to ensure a safe riding experience.
Prosthetics are LIMITED as follows:

- Leg prosthesis not allowed: Behemoth, Flight Deck, Leviathan and Skyhawk
- No prosthetics allowed: Lumberjack, Muskoka Plunge and Yukon Striker
- A rider with more than one lower body prosthetic is not allowed: Blast Off! and WindSeeker

Arm, leg, and foot prosthetics are NOT allowed on the following rides unless documentation is provided from the provider of the prosthetic device guaranteeing that it has been designed to remain in place with a sufficient safety factor for a single point failure item. Guests who do not have documentation may still ride, but must remove their prosthetic, and should reference the specific ride criteria outlined in each individual ride listing to determine if they are qualified to ride.

This applies at the following:

- Psyclone
- Riptide
- Shockwave
- Soaring Timbers

Guests with prosthetics enjoying their day at Splash Works should consult with a member of our Aquatics Supervisory team.

**RIDE DEVICES FOR GUESTS WITH DISABILITIES**

Stabilizing devices, when requested, can be used at designated rides to prevent the ride unit from swaying during loading and unloading. These devices may further assist guests in transferring from their wheelchair to the ride unit. The following ride is equipped with a stabilizing device: Flying Eagles.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Behemoth, Leviathan, and Yukon Striker.

In addition, specific ride vehicles are equipped with removable sides at Backlot Stunt Coaster, Boo Blasters on Boo Hill, and Flying Eagles. These vehicles may further assist guests in transferring from their wheelchair to the ride unit. Please inform an associate at the ride if you wish to use that vehicle.

Please see an associate at each ride or Guest Services for assistance.

**ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES**

Canada’s Wonderland’s Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Canada’s Wonderland. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services or Ride Accommodations to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit) in order to avoid crowds and waiting in the regular lines. At Behemoth, Leviathan, Wonder Mountain’s Guardian, and Yukon Striker, the boarding time can be obtained from the ride associate at the front of the ride entrance. Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit).

Guests can then choose to rest comfortably away from the queue area, visit a shop, see a show, or play a game until their boarding time.

Information on where guests access the ride is posted on each ride’s Rider Safety Guide sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.
Here’s How It Works

• The guest with a mobility impairment or ASD should visit Guest Services or Ride Accommodations upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.

• In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.

• The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.

• The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.

• Guests may not accumulate more than one boarding time at a time.

• Due to the nature of the attractions in Splash Works, Alternate Access and Boarding Passes are only available at the Lazy River via the exit.

• Boarding Passes may also be used during Halloween Haunt if the maze has a line.

RIDE ADMISSION POLICY: RIDER CRITERIA

Canada’s Wonderland’s Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our parks as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Ride Admission Policy as necessary.

Ability to exhibit independent seated postural control under the dynamic conditions of the ride:

The guest must have the body and spinal control to sit upright without the aid of other people or devices. The guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the guest’s thighs.

Appropriate centre of gravity:

The guest’s body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm:

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and enough strength to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms:

Ability to hold on with two functioning arms as defined above.

Ability to brace self with one functioning leg:

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs:

Guests must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

Minimum of two functioning extremities:

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities:

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

Ability to enter/exit the attraction within specified parameters without endangering self or others:

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance (the exit) or having someone aid you in boarding. For the safety of our associates and guests, ride operators are instructed not to perform any lifting of guests.
Appropriate observed behaviour:
Guest demonstrates appropriate observed behaviour indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behaviour may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:
• Exercise good judgement
• Act in a responsible manner while using amusement rides
• Obey all warnings prior to and during participation
• Not participate while under the influence of alcohol or drugs
• Properly use all ride safety equipment provided

CASTS & BRACES
Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on select slides in Splash Works.

Symbol Key
Y – May ride with the condition
C – Must ride in a chariot
F – Cast/Brace must fit safely in the ride unit
O – Not permitted to participate on elevated activity areas
Z – Participation or water depth may be restricted if necessary

CASTS & BRACE CHART
The chart displays the cast and brace rules for all rides and attractions.

**ACCESS SYMBOLS**

Symbols indicate boarding procedures for each ride and are defined below.

- This symbol is used to identify attractions where guests may remain in their wheelchair. These attractions include Maple Park Treehouse (ground level), Lakeside Lagoon Pool, Pumphouse (ground level), Sprayground, Splash Station (ground level), and White Water Bay.

- This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

- This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

**RIDES**

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate centre of gravity, appropriate observed behaviour, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

**Antique Carrousel**

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are permitted in chariot seating.

A classic carrousel with both stationary and jumper horses, as well as two chariots.

**Restraint System:** Due to the inherent nature of this ride, guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must ride in a chariot.

**Rider Criteria:** Guests must have at least one functioning arm. Guests must also have the ability to enter and exit the ride safely, maintain seated postural control, have an appropriate centre of gravity, and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must ride in a chariot and be accompanied by a supervising companion. Guests with a full leg cast must ride in a chariot.
Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals are permitted to accompany the rider on the platform or in a chariot.

**Backlot Stunt Coaster**

*Guests must be 48” tall to ride.*

*Maximum Weight – 300 lb. per rider*

A steel LIM roller coaster that launches riders up to 65 kilometres per hour in 4 seconds. Riders will experience high speeds, weightlessness, rapid movements from side to side, and a tunnel.

**Restraint System:** An individual lap bar secures each rider across the thighs and pelvis, and additional padding constrains both legs across the shins. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit to the right. A wheelchair lift is available to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** This ride utilizes magnetic systems during the ride.

**Behemoth**

*Guests must be between 54” and 80” tall to ride*

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities, including one functioning arm that includes a hand. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation at this ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride.

**Amputations must be below the ankle.** Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

**Rider Access:** Alternate access is available at the ride exit to the right. A wheelchair lift is available to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.
Blast Off! 2

Guests must be 36” tall to ride. Guests over 60” tall must be accompanied by a child. There is a maximum of 1 adult per cycle.

Maximum Weight – 700 lb. per cycle

This children’s ride hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42” tall to ride or be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Boo Blasters on Boo Hill 2

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 970 lb. per car

An interactive dark ride where riders compete with other riders for the high score. Cars slowly travel through scenes themed to a haunted mansion. Some of these scenes may frighten or startle young children.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Character Carrousel 1

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are permitted in chariot seating. Guests over 60” tall must be accompanied by a child and are not permitted to ride on a jumper horse.

Maximum Weight – 170 lb. per horse and 680 lb. per chariot

A children’s carrousel with jumper horses and two chariots.

Restraint System: Due to the inherent nature of this ride, guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must ride in a chariot.

Rider Criteria: Guests must have at least one functioning arm. Guests must also have the ability to enter and exit the ride safely, maintain seated postural control, have an appropriate centre of gravity, and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must ride in a chariot and be accompanied by a supervising companion. Guests with a full leg cast must ride in a chariot.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals are permitted to accompany the rider on the platform or in a chariot.

Dragon Fyre 3

Guests must be 48” tall to ride

A high-speed steel looping roller coaster which turns riders upside down four times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.
Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Drop Tower

Guests must be 54” tall to ride

Maximum Weight – 800 lb. per cabin

A free-fall ride that lifts riders to the top of a structure and drops them. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them, and a minimum of two functioning extremities with one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Flying Canoes

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion

A family ride themed to the tale “The Flying Canoe”. Riders control the height and movement of their canoe, while the ride gently rotates.

Restraint System: A shared lap bar and individual seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Flight Deck

Guests must be between 52” and 78” tall to ride

A high-speed suspended steel roller coaster which turns riders upside down five times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them, and a minimum of two functioning extremities with one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.
Flying Eagles

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion

Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. A stabilizing device, when requested, can be used to assist a rider into the ride unit. Please inform an associate at the ride if you wish to use that device.

Frequent Flyers

Guests must be less than 60” tall to ride. Hand-held infants are not permitted.

A themed hot air balloon ride that spins and raises riders in the air.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; with at least one functioning arm. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Ghoster Coaster

Guests must be 46” tall to ride alone OR 40” tall and accompanied by a supervising companion

A junior wooden roller coaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift. WARNING: This ride contains strobe lighting.

Joe Cool’s Dodgem School

Guests must be between 36” and 54” tall to ride

A children’s bumper car ride where riders manoeuvre their own car. Riders will experience strong side to side movement and rapidly changing forces and direction.

Restraint System: Individual shoulder straps are worn diagonally across the chest and under the arm of each rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Avoid head-on collisions.
Jokey's Jalopies

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

An antique styled car ride that slowly travels through a scenic journey on a designated track.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm or one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Jumpin’ Jet

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Guests over 60” tall must be accompanied by a child. There is a maximum of 1 adult per row.

Maximum Weight – 440 lb. per row

A family ride themed to an airplane that rotates both in a clockwise and counter-clockwise direction, reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further enclosing the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

KidZville Station

Guests must be 40” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child.

This is a slow moving miniature train ride.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Klockwerks

Guests must be 48” tall to ride alone OR 44” tall and accompanied by a supervising companion

A circular family ride that carries riders up and down to a height of 19 feet while rotating and oscillating in quick movements. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when
entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Krachenwagen**

Guests must be 54” tall to drive OR 48” tall to ride as a passenger

A bumper car ride where riders drive cars one way around a circular track. Riders will experience strong side to side movement and rapidly changing forces and direction.

**Restraint System:** An individual shoulder strap is worn diagonally across the chest and under the arm of each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive. Guests who are not able to steer and press the accelerator must have another rider to accompany them to drive.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting. Avoid head-on collisions.

**Leviathan**

Guests must be between 54” and 80” tall to ride

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities, including one functioning arm that includes a hand. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation at this ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. *Amputations must be below the ankle.* Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

**Lucy’s Tugboat**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child. There is a maximum of 1 adult per row.

This spinning tugboat ride travels back and forth over an upward, curved track.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Lumberjack**

Guests must be 48” tall to ride

A thrill ride that swings riders upside down both forward and backward. Riders will experience weightlessness and rapidly changing forces and direction.
**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (excluding prosthesis). Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prosthetics are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

---

**Maple Park Treehouse**

Guests over 54” must be accompanied by a child. Hand-held infants are permitted on the ground level.

A large play structure with bridges, slides, and other interactive elements.

**Rider Criteria:** Guests must have at least one functioning arm or one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements may not ride a slide, but may participate in all other structures and interactive elements with a supervising companion.

**Rider Access:** This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires guests to walk up several flights of stairs.

---

**Mighty Canadian Minebuster**

Guests must be 48” tall to ride

A wooden roller coaster with banked curves, airtime hills, and a tunnel.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

---

**Psyclone**

Guests must be 54” tall to ride

A thrill ride that swings riders to a height of 115 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.
Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Riptide

Guests must be 54" tall to ride

A thrill ride that takes riders to a height of 48 feet in gondolas that lock in order to hold riders upside down, and unlock to send riders into 360 degree loops. Riders will experience weightlessness and rapidly changing forces and direction. On warmer days, water effects spray the gondolas, and riders will get wet.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Sally’s Love Buggies

Guests must be 44” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child.

A circular children’s ride where riders use a handle to pump their car upwards to a height of 12 feet. Each cycle, riders compete to see who gets there first.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Shockwave

Guests must be 54" tall to ride

An inverting thrill ride where units rotate on a 360 degree axis while spinning to a maximum height of 64 feet around the centre hub. Riders will experience weightlessness, strong side to side movement, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.
**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Silver Streak**

Guests must be between 44” and 76” tall to ride. Guests between 44” tall and 54” tall may need to be assisted on and off the ride.

A family suspended steel roller coaster. Riders will experience rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them, and a minimum of two functioning extremities with one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**Sledge Hammer**

Guests must be 54” tall to ride

A thrill ride where spinning units are quickly propelled up to a height of 79 feet, only to free-fall downwards and have the pattern repeated. Riders will experience weightlessness, strong side to side movement, and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.
broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**SlingShot**

Guests must be between 48” and 79” tall to ride

A two-person capsule that is attached to steel cables and propels riders into the air to a height of 301 feet. Riders will experience weightlessness, rapid movements from side to side, and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** This is an extra charge attraction.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

---

**Snoopy’s™ Revolution**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child.

**Maximum Weight – 830 lb. per unit**

A miniature ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Snoopy’s™ Space Race**

Guests must be less than 60” tall to ride. Hand-held infants are not permitted.

A children’s ride themed to rocket ships that gently spins and raises riders in the air.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; with at least one functioning arm. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.
**Snoopy™ vs. Red Baron**

*Guests must be between 36" and 60" tall to ride*

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

---

**Soaring Timbers**

*Guests must be 54” tall to ride*

A thrill ride where two gondolas manoeuvre sweeping arcs and flip independently of each other while rotating and spinning to a maximum height of 66 feet around the centre hub. Riders will experience weightlessness, strong side to side movement, and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Long hair must be tied up above the shoulder.

**Rider Access:** Alternate access is mainstreamed via the entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

---

**Spinovator**

*Guests must be 48” tall to ride alone OR 44” tall and accompanied by a supervising companion*

A circular ride where ride units move in the opposite direction of the ride table, spinning riders in two opposing directions. Riders will experience rapid movements from side to side.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

---

**Speed City Raceway**

*Guests must be between 58” and 78” tall to drive OR 40” tall to ride with a legal parent or guardian 18 years of age or older*

This is a “drive-yourself” go kart ride where drivers drive their own go kart around a designated track.

**Restraint System:** A seatbelt secures each rider across the upper body, pelvis, and thighs. In addition, a helmet is provided and must be worn.

**Rider Criteria:** Drivers must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Drivers must exhibit sufficient visual acuity to operate the car safely. Passengers must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Long hair must be tied up above the shoulder.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

---

**CAUTION:** Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

**NOTE:** This is an extra charge attraction.
the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Sugar Shack

Guests must be 44" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60" tall must be accompanied by a child. There is a maximum of 1 adult per unit.

A children’s ride that travels a circular path while riders control the spin of their bucket.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Swan Lake

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child. There is a maximum of 1 adult per unit.

A scenic ride where riders gently float in a swan boat along a track in a pond.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. In the back row, an individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Swing of the Century

Guests must be 48” tall to ride
Maximum Weight – 230 lb. per rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Swing Time

Guests must be between 36” and 54” tall to ride

A child-size chair swing with free hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or
below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

**Taxi Jam**

Guests must be 40” tall to ride alone OR 36” tall and accompanied by a supervising companion. Guests over 60” tall must be accompanied by a child.

A junior steel roller coaster with mild drops, bumps, and turns.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**The Fly**

Guests must be 54” tall to ride alone OR 44” tall and accompanied by a supervising companion

A steel roller coaster with airtime hills and hairpin turns.

**Restraint System:** A shared lap bar and individual seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**The Pumpkin Patch**

Guests must be 44” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child.

Maximum Weight – 660 lb. per unit

A 23 foot tower with free hanging cabins suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.
**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

---

**Thunder Run**

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

---

**Time Warp**

**Restraint System:** A railed enclosure secures riders across the back, shoulders, and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.
Treetop Adventure

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child.

Maximum Weight – 462 lb. per unit

A slow moving family ride themed to helicopters that takes guests along an elevated track 15 feet above the ground.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have at least one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Viking’s Rage

Guests must be 48” tall to ride alone OR 39” tall and accompanied by a supervising companion

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. Riders between 39” and 48” tall must be seated in the centre two rows of the ship and sit towards the middle of the row with their supervising companion.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Vortex

Guests must be 48” tall to ride

A suspended steel roller coaster with a combination of high speed banked turns. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

White Water Canyon

Guests must be between 46” and 76” tall to ride

A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.
CAUTION: Boats may bump into the side of channel and other boats.

NOTE: Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with riders. These items will get wet. Please consider leaving loose articles with a non-rider.

Wilde Beast

Guests must be 48” tall to ride
A wooden roller coaster with banked curves and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WindSeeker

Guests must be 52” tall to ride
Maximum Weight – 304 lb. per rider
A chair swing that spins and swings riders to a 45 degree angle while ascending a giant 301 foot tower.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Wilde Knight Mares

Guests must be 54” tall to ride
A spinning thrill ride where riders ride in a standing position. Centrifugal force presses riders back against the backrest while the ride rises to a vertical position. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A door with a safety chain encapsulates the ride unit to secure riders.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Wonder Mountain’s Guardian

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion
A steel roller coaster blended with interactive 3D video-based gaming, where riders compete with other riders for the high score. In the final harrowing scene, cars drop 30 feet in a surprising freefall element. Riders will experience weightlessness, high speeds, and prolonged moments of darkness.

Restraint System: An individual lap bar secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.
**Rider Access:** Alternate access is available at the ride exit to the right. A wheelchair lift is available to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

**NOTE:** Loose articles may not be left on the platform. Riders must use hourly lockers to store loose articles while riding.

**NOTE:** During Halloween Haunt, Wonder Mountain’s Guardian is transformed into Zombies 4D. Some scenes may frighten or startle young children.

### Woodstocks Whirlybirds

**Guests must be 40” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall must be accompanied by a child. There is a maximum of 1 adult per unit.**

**Maximum Weight – 440 lb. per unit**

A children’s ride that elevates and travels a circular path while riders control the spin of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or full arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

### Yukon Striker

**Guests must be between 52” and 77” tall to ride**

A high-speed, floorless looping dive roller coaster which turns riders upside down four times. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities, including one functioning arm that includes a hand. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Prosthetics are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining
leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

**Rider Access:** Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

### APPROPRIATE ATTIRE

Appropriate swimwear is required. Thongs or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. There can be no sharp
objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

**LIFEJACKETS**

Lifejackets are required for children who are less than 48” tall in bare feet, children under 10 years of age, or those who are inexperienced or non-swimmers. Lifejackets are available for all guests needing special consideration. Children who are less than 42” tall must wear lifejackets and be accompanied by a supervising companion. This policy will be enforced at Lazy River and White Water Bay. Only Canadian Coast Guard, Transport Canada, or Fisheries and Ocean Canada approved lifejackets are allowed as flotation devices. Lifejackets are provided free of charge for guests who require one.

**ONGOING LIFEGUARD TRAINING**

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, Canada’s Wonderland routinely utilizes training exercises to improve our lifeguards’ skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

**SCALES**

Red light/green light scale systems are used at weight sensitive attractions. Guests who exceed the weight requirements will not be permitted to ride. Scales are used at Barracuda Blaster, Muskoka Plunge, Super Soaker, The Plunge, and Typhoon.

**SWIM DIAPERS**

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

**WATER WHEELCHAIR**

A water wheelchair is available for guests requiring additional assistance when at Lakeside Lagoon Pool, Lazy River, Pumphouse (ground level only), Splash Station (ground level only), Sprayground, and White Water Bay. While in the wave pool, the water level may not exceed the height of the seat on the chair. The water wheelchair may be used by multiple guests on the same day. During your visit, please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair and for further accessibility information.

**WATER PARK ATTRACTIONS**

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate centre of gravity, appropriate observed behaviour, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

**Barracuda Blaster**

Guests must be 48” tall in bare feet to ride

*Maximum Weight – 250 lb. per rider and 400 lb. per tube*

A thrilling tube slide where riders descend down a darkened enclosed flume before exiting into an open-air circular basin which sends riders spiraling in circles. Once momentum subsides, the ride continues into one last enclosed flume before finishing in a 36” (91 cm) depth splash pool. Riders will experience high speeds and rapid movements from side to side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Guests use an inner tube that can accommodate one or two rides each. Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

NOTE: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.
Black Hole

Guests must be 48” tall in bare feet to ride

A thrilling tube slide where riders twist and turn in an enclosed flume in near complete darkness before finishing in a 42” (107 cm) depth splash pool. Riders will experience high speeds and rapid movements from side to side.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Guests use an inner tube that can accommodate one rider each. Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Lakeside Lagoon Pool

Guests over 60” tall in bare feet must be accompanied by a child. Hand-held infants must remain with a supervising companion.

A children’s pool with spray jets and interactive water features with a maximum water depth of 19” (48 cm).

**Rider Criteria:** Guests must have the ability to enter and exit the ride safely, maintain seated postural control, and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a supervising companion.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

Lazy River

Children must be 42” tall in bare feet to ride alone OR be accompanied by a supervising companion. Children under 42” tall in bare feet, children under 10 years of age, or those who are inexperienced or non-swimmers are required to wear a lifejacket. A supervising companion may accompany up to 2 children. Hand-held infants must be accompanied by a supervising companion.

A slow moving, winding river tube ride at a depth of 36” (91 cm).

**Rider Criteria:** Guests without one functioning arm, one functioning leg, the ability to maintain seated postural control, or the ability to demonstrate appropriate observed behaviour must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Guests use an inner tube that can accommodate one rider each. Guests under 42” may ride in the same inner tube as the supervising companion. Alternate access is available via the zero depth entry. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.
Mountain Bay Cliffs

Guests must be 54” tall in bare feet to participate.

Guests will experience the exhilaration of cliff jumping from a variety of heights into the water below. Guests will have the option to jump from 3.0 metres (10 feet), 5.0 metres (16.5 feet), or 7.5 metres (25 feet).

**Rider Criteria:** Guests must jump feet first, with their legs straight, held firmly together, and arms down at their side. Guests must have the ability to maintain proper riding position and be able to exit the pool on their own. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on this attraction. Casts are not permitted on this attraction.

**Rider Access:** Access to this attraction requires climbing several flights of stairs. Guests will have to ascend the cliff and be capable of safely entering the platform area, on their own or with the assistance of a companion.

**NOTE:** Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

Muskoka Plunge

Guests must be 48” tall in bare feet to ride

**Minimum Weight – 45 lb. per rider**
**Maximum Weight – 300 lb. per rider**

An extreme set of body slides where riders start by standing and waiting for the floor to drop out from underneath them. Once the floor drops, riders will twist and turn in an enclosed flume while riding on their back, before finishing in a runout. Riders will experience high speeds, weightlessness, and rapid movements from side to side.

**Rider Criteria:** Guests must ride feet first, with their head and back against the slide, legs firmly crossed at the ankles, and arms folded across the chest. Guests must have four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or full arm cast are not permitted to ride. Prosthetics are not permitted on this ride.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests must carry mats to the top of the tower. Access to the attraction requires climbing several flights of stairs with a mat. Guests will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion.

**NOTE:** A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Pumphouse

Hand-held infants must remain on ground level with a supervising companion

A zero depth play structure with a host of wacky interactive activities including waterfalls, rotating water jets, and a giant tipping bucket.

**Rider Criteria:** Guests unable to maintain seated postural control must be accompanied by a supervising companion. Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

**Rider Access:** This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires guests to climb several flights of stairs. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

Riptide Racer

Guests must be 40” tall in bare feet to ride

A mat racing slide where rival sliders compete for first place as they descend down the slide before finishing in a runout. Riders will experience high speeds.

**Rider Criteria:** Guests must be lying down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of two functioning arms. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Guests use a mat that can accommodate one rider each. Guests must carry mats to the top of the tower. Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion.

Splash Station Slides

Guests must be between 36” and 48” tall in bare feet to ride

A set of two children’s body slides where riders gently twist and turn in an enclosed flume while riding on their back, before finishing in a runout.
**Rider Criteria:** Guests must ride feet first. Guests must have a minimum of two functioning legs and sufficient upper extremities to maintain the proper riding position. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Prosthetic devices with exposed metal parts are not permitted on most waterpark attractions. Guests with prosthetics should visit Guest Services or speak to a member of our Aquatics Supervisory team prior to waiting in line or riding to ensure a safe riding experience.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

---

**Splash Station Structure**

*Hand-held infants must remain on ground level with a supervising companion.*

A wet and wild zero depth children’s play structure with interactive water features and a large tipping bucket.

**Rider Criteria:** Guests unable to maintain seated postural control must be accompanied by a supervising companion. Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

**Rider Access:** This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires guests to climb several flights of stairs. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

---

**Super Soaker**

*Guests must be 40” tall in bare feet to ride. Guests between 40” and 48” tall in bare feet must wear a lifejacket and be accompanied by a supervising companion.*

*Maximum Weight – 800 lb. per raft*

A thrilling family raft ride where riders experience both open-air and darkened enclosed turns and drops, before finishing in a 37” (94 cm) depth splash pool. Riders will experience high speeds and rapid movements from side to side.

**Rider Criteria:** Guests must be seated with their back against the raft and hands firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

**Rider Access:** Guests board a raft that can accommodate two, three, or four riders each. Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

**NOTE:** A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

---

**The Plunge**

*Guests must be 40” tall in bare feet to ride. Guests between 40” and 48” tall in bare feet must wear a lifejacket and be accompanied by a supervising companion.*

*Maximum Weight – 800 lb. per raft*

A thrilling family raft ride that takes riders down a high speed triple drop, before finishing in a 37” (94 cm) depth splash pool. Riders will experience high speeds and weightlessness.

**Rider Criteria:** Guests must be seated with their back against the raft and hands firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

**Rider Access:** Guests board a raft that can accommodate two or three riders each. Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

**NOTE:** A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

---

**Typhoon**

*Guests must be 48” tall in bare feet to ride. Maximum Weight - 250 lb. per rider*

A thrilling tube slide that takes riders through both open-air and darkened enclosed flumes, along with giant oscillating funnels. Once momentum subsides in each funnel, the ride continues onwards before finishing in an 18” (46 cm) depth runout. Riders
will experience high speeds, weightlessness, and rapidly changing forces and direction.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Guests use an inner tube that can accommodate one or two riders each (maximum one adult riding in the back of the tube). Guests will have to ascend the entrance ramp with a tube, and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Note:** A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

**Waterways**

Guests must be 36” tall in bare feet to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests over 60” tall in bare feet must be accompanied by a child.

A gentle children’s tube slide which runs a serpentine course before finishing in a 24” (61 cm) depth splash pool.

**Rider Criteria:** Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Guests use an inner tube that can accommodate one rider each. Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**White Water Bay**

Children must be 42” tall in bare feet OR be accompanied by a supervising companion. Children under 48” tall in bare feet, children under 10 years of age, or those who are inexperienced or non-swimmers are required to wear a lifejacket. A supervising companion may accompany up to 2 children. Hand-held infants must remain in the shallow area with a supervising companion.

A large wave pool with depths ranging from 0 ft. to 6 ft. (183 cm). Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

**Rider Criteria:** Participants without two functioning extremities, the ability to maintain seated postural control, or the ability to demonstrate appropriate observed behaviour must be accompanied by a supervising companion. Participants with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to participate. Participation and water depth may be restricted for participants with a full arm cast or full leg cast.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.
SHOWS/ENTERTAINMENT

Due to the popularity of our shows, we suggest that you arrive early as seating may be limited. Show schedules are available at Guest Services and at any theatre entrance. All Entertainment venues are accessible to guests who require mobility assistance. Ask any associate at the venue for assistance.

Canterbury Theatre
Canterbury Theatre, located in Medieval Faire, is an indoor, air conditioned theatre featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions at the front, middle, and rear of the theatre. Please ask an usher for assistance. Capacity: 800 Guests

International Showplace
International Showplace, located on the south side of Wonder Mountain, is a covered, outdoor amphitheatre with bench seating. There are viewing areas that accommodate wheelchairs and companions at the front and rear of the theatre. Please ask an usher for assistance. Capacity: 3,000 Guests

Playhouse Theatre
Playhouse Theatre, located in KidZville, is a covered, outdoor children's theatre with bench seating. There is a viewing area that accommodates wheelchairs and companions at the rear of the theatre. Please ask an usher for assistance. Capacity: 500 Guests

HALLOWEEN HAUNT

Halloween Haunt at Canada’s Wonderland has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters inside our Haunt attractions will not touch you; please do not touch them in any manner. Please adhere to all posted and verbal warnings and directions.

Some guests may prefer to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction entrance. For safety reasons, service animals are not permitted inside Haunt attractions.

Canada’s Wonderland’s WinterFest is filled with delightful holiday cheer for guests of all ages. Many areas of the park will have low lighting, fog, snow machines, and strobe styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe styled lighting that will be present throughout the park. WinterFest has additional activities, such as ice skating, as part of this event. Please refer to individual attractions for usage criteria.
WARNING

Many rides at Canada’s Wonderland are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Canada’s Wonderland does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE!

All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow guests to ride.

Information in this guide is subject to changes.
