

2021 GUEST ASSISTANCE GUIDE

Welcome to Dorney Park & Wildwater Kingdom!

We are glad you are here! At Dorney Park & Wildwater Kingdom we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Dorney Park & Wildwater Kingdom's Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.

RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides		Rides that are generally calm and gentle in nature.
Mild Thrill Rides		Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides		Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides		Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
Aggressive Thrill Rides		Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by supervising companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for guests with back trouble
	Prohibited for guests with heart trouble or high blood pressure
	Prohibited for guests with neck trouble
	Prohibited for pregnant guests
	Prohibited for guests who have had recent surgery

PLEASE RIDE SAFELY

Pennsylvania Act No. 1994-58 requires that riders must obey all warnings and directions regarding rides and must behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is cause for dismissal from the Park.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or First Aid. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE**.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened at all times.
- Keep all parts of your body inside ride unit at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Dorney Park & Wildwater Kingdom is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Dorney Park & Wildwater Kingdom.
- You are responsible for your personal property.
- **FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES.** You may be seriously injured if you enter an unauthorized area.

ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES

Dorney Park & Wildwater Kingdom's Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Dorney Park. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person's size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Dorney Park Ride Services to obtain a Rider Access Form and Boarding Pass. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or cognitive impairments and not to bypass others waiting in line. This service is available for a guest with restricted mobility or cognitive impairments and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or cognitive impairments to access rides at specified times via the Alternate Access Entrance (usually a ride's exit or Fast Lane entrance) in order to avoid crowds and waiting in the regular lines. Guests who are in possession of a Boarding Pass will be immediately entitled to arrive at the eligible ride of their choice any time after receipt of the Boarding Pass. When the guest arrives at the Alternate Access Entrance of the ride, the guest will receive the next ride time (an actual time) based on the wait time of the attraction on which the guest has selected to participate first. The guest will be welcomed to participate, and then will be required to wait until the time indicated on the Boarding Pass before being permitted to participate on the next attraction of choice. When that time arrives, the guest should use the Alternate Access Entrance and show the pass to the ride associate, who will assist the guest and their group with participating as well as issuing their next time based on that attraction's wait time. The process will continue throughout the day. Guests may then choose to rest comfortably away from the queue area until their boarding time.

Information on where guests access the ride is posted on each Ride's Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

Here's How It Works

- The guest with a mobility impairment or cognitive impairments should visit Ride Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.
- In addition to a Boarding Pass, the guest with a mobility impairment or cognitive impairments will receive a "Rider Access Form" that lists the rides that the guest with a disability can safely enjoy.

- When the guest arrives at the Alternate Access Entrance of the ride, the associate will issue the guest's next ride time (an actual time) based on the wait time of the ride the guest had selected first. The guest will be welcomed to ride, and then will be required to wait until the time indicated on the Boarding Pass before being permitted to participate on the next ride of choice. When that time arrives, the guest should use the Alternate Access Entrance and show the pass to the associate, who will assist the guest and their group with participating as well as issuing their next time based on that ride's wait time. The process will continue throughout the day.
- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
- Guests may not accumulate more than one boarding time at a time.
- Due to the nature of the attractions in Wildwater Kingdom, Alternate Access and Boarding Passes are only available at Aquablast, Aqua Racer, Boa Blasters & Constrictor, Python Plummet, Runaway River, and Wildwater River via the Fast Lane Plus entrances. Boarding Passes, however, are required for Halloween Mazes if the maze has a line.

Before Entering a Ride Via an Alternate Access Entrance, please review our Guest Assistance Guide or see the posted Rider Safety Sign located at the entrance and Alternate Access Entrance to our rides.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Dorney Park & Wildwater Kingdom as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Assistive Listening Devices

Assistive listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss. These devices are available at Ride Services.

Braille & Large Print Guides

Braille and large print guides of the Park Map and Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-serve basis.

Family Care Center

Located in Planet Snoopy™, the Family Care Center is a place to assist families during their visit. The facility includes nursing rooms, bottle warmers, and feeding stations. For groups with special needs individuals, the Family Care Center is a nice location to take a break from the day's activity. This location also includes a private family changing room, family restrooms, and a Comfort and Stimulation area. Please speak with a member of our Guest Services Team for additional information.

First Aid

Our main First Aid facility is located adjacent to Good Time Gifts. Medical professionals are on duty at all times to assist with special medical needs. Refrigeration of medication, as well as storage of special medical equipment, is available at First Aid. There is also a First Aid station in Wildwater Kingdom located next to the Speed Slides.

Interpretive Services

If requested at least one week in advance, Dorney Park & Wildwater Kingdom will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please contact 610-395-3724. Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

Parking for Guests with Disabilities

Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Parking is available on a first come, first serve basis. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification.

Quiet Room

Located in the Family Care Center. This dedicated space provides tools for family members or care-givers to intensify or reduce sensory stimulation in a controlled environment. For more information regarding the Sensory and Quiet Room please call 610-395-3724 prior to your visit. When at the park, please stop by Guest Services for additional information.

Restrooms

Private restroom facilities for guests needing the assistance of another guest are available at Dorney Park First Aid and Wildwater Kingdom First Aid.

Family restrooms are located at the Family Care Center in Planet Snoopy™ and across from the Good Time Theatre on the corner of the Good Time Gifts building. Wheelchair accessible stalls are located at all restrooms.

Service Animals

Service animals are welcome at Dorney Park.

A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located on the right as you travel the path to the Thunder Creek Mountain Restrooms.

Service animals and their owners can be safely accommodated on the following rides/attractions: Antique Carousel, Planet Snoopy™ Showplace, Cedar Creek Cannonball, Center Stage and Zephyr.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Ride Services for more information.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special need/diet items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchair, Stroller, and ECV Rentals

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Good Time Gifts. Online reservations are available for wheelchair/EVC rentals in advance of your visit. Reservations can be made by going to www.dorneypark.com and visit the rentals page under the Tickets tab. Rentals are also available at the park while supplies last. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services prior to entering the park.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Dorney Park & Wildwater Kingdom uses the following terms:

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a supervising companion: Antique Carousel (chariot only), Cedar Creek Cannonball, Wave Pool & Wildwater Cove (must stay in 2 ft. of water or less), and Zephyr. Hand-held infants and their supervising companion may also enjoy Seaside Splashworks, Kid's Cove, and Lollipop Lagoon, but may not participate on the elevated sections of the attractions.

Supervising Companion: Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

EVACUATIONS

Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions. In Wildwater Kingdom, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation of if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

GUESTS OF A LARGER SIZE

All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Apollo, Hydra, Meteor, Monster, Possessed, Revolution, Steel Force, Talon, Thunderhawk, Waveswinger, and Wild Mouse.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: Hydra, Meteor, Possessed, Revolution, and Talon.

The manufacturer requires a maximum rider height on the following rides: Musik Express (78"), Possessed (78"), Sally's Swingset (73"), and Wild Mouse (75")

GUESTS USING WHEELCHAIRS

Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Cedar Creek Cannonball, where one wheelchair can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator is available at Talon to transport a guest in a wheelchair to our 2nd story ride platform and wheelchair lifts are available at Hydra, Snoopy's™ Rocket Express and Steel Force. Please use the call button at base of lift to request service. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Dorney Park & Wildwater Kingdom personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at The Family Care Center and Guest Services.

HEALTH RESTRICTIONS

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guides and all warning signs posted at each ride entrance and exit.

HEIGHT REQUIREMENTS

Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be “officially” measured at Ride Services and all ride locations. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement. Dorney Park & Wildwater Kingdom reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

In Wildwater Kingdom, height measurements are taken in bare feet. (There is a separate height wristband system for Wildwater Kingdom.)

LOOSE ARTICLES

Most rides cannot accommodate loose articles including jewelry, cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-rider. Dorney Park is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the rider’s body.

For safety reasons, cell phone usage, taking pictures and filming on rides is prohibited.

Glasses must be secured on all rides.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

LOST AND FOUND

All items found at Dorney Park & Wildwater Kingdom are turned in to Lost and Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported via the internet at dorneypark.com/lost-and-found.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Electro Magnetics are used at Possessed and White Water Landing. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, Portable Oxygen Tanks are only permitted on the following rides, Antique Carousel (chariot), Cedar Creek Cannonball, Ferris Wheel, Snoopy’s Junction, & Zephyr. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller Personal Oxygen Equipment. Personal Oxygen Equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the rider’s body. The equipment must not prevent guests from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the guest and the seat or the restraint. Guests must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

PHOTOSENSITIVITY/STROBE LIGHTING

Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Dominator, Hydra, Steel Force, Talon, and Woodstock Express.

PREGNANCY

Guests who are pregnant may only ride Antique Carousel, Cedar Creek Cannonball, Cedar Creek Flyers, Ferris Wheel, Snoopy's™ Cloud Climbers, and Zephyr, and participate in Runaway River, Splash Landing, Wave Pool, Wildwater Cove, and Wildwater River in Wildwater Kingdom.

PROPER ATTIRE

Most rides require proper riding attire including shirts, shorts, and shoes. Shirts and shoes are required in queues and all park pathways. Swimwear is not permitted on rides outside of Wildwater Kingdom with the exception of Thunder Canyon and White Water Landing. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Talon, Waveswinger, Dominator, Meteor, Revolution, Possessed, Hydra, and Linus Launcher.

Appropriate swimwear is required. Pants, thongs, or transparent clothing are not permitted.

PROSTHETICS

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Wildwater Kingdom attractions. Guests should visit Guest Services prior to riding to ensure a safe riding experience.

Prosthetics are NOT allowed on Meteor.

Leg prosthetics are not permitted on Hydra or Talon.

The manufacturers of Demon Drop and Possessed require that riders with prosthetic devices must provide documentation from the manufacturer of their prosthetic device guaranteeing that the prosthetic device has been designed to remain in place on a high speed roller coaster ride exceeding a maximum of 68 MPH with maximum G forces from -1 to 5 Gs with a sufficient safety factor for single point.

Guests with prosthetics enjoying their day at Wildwater Kingdom should consult with a member of our Aquatics Supervisory team.

RIDE DEVICES FOR GUESTS WITH DISABILITIES

Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Snoopy's™ Rocket Express, Steel Force, Thunderhawk, Wild Mouse, and Woodstock Express.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Hydra and Talon.

Please see an associate at each ride or Ride Services for assistance.

RIDER CRITERIA

Dorney Park & Wildwater Kingdom's Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our parks as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Ride Admission Policy as necessary.

Ability to exhibit independent seated postural control under the dynamic conditions of the ride.

The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider's thighs.

Appropriate center of gravity.

The rider's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms.

Ability to hold on with two functioning arms as defined in ability to hold on with one functioning arm.

Ability to brace self with one functioning leg.

Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg is a lower extremity or prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs.

Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

Minimum of two functioning extremities.

Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Riders must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

Ability to enter/exit ride within specified parameters without endangering self or others.

Riders must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our associates and riders, ride operators are instructed not to perform any lifting of riders.

Appropriate observed behavior.

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior to and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Wildwater Kingdom.

The following chart displays the cast and brace rules for all rides and attractions.

	Cervical Collar or Neck Brace	Broken Collar Bone	Forearm Cast	Full Arm Cast	Braced Arm Cast	Lower Leg Cast	Full Leg Cast
Y May ride with the condition							
C Must ride in a chariot							
F Cast/Brace must fit safely in the ride unit							
O Not Permitted to participate on elevated activity area

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where the guest may remain in wheelchair. Wheelchairs can be accommodated on Cedar Creek Cannonball.

This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Carousel 1

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants must ride in a chariot.

A carousel ride which features animals--both stationary and moving up and down--and chariot seating mounted on a circular platform that rotates.

Restraint System: Guests under 46" must be seated in a chariot or ride on the middle row of animals and be held by a supervising companion who is standing on the platform between the animals. Only one rider per animal.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or do not have the ability to hold on with one functioning arm must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, or appropriate observed behavior must ride in a chariot with a supervising companion. Guests with a full leg cast must be seated in a chariot.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to ride on the ride platform or chariots.

Apollo 3

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Riders ride in cars that rotate in a circle while alternately lifting and then dropping the cars relative to the center of the ride. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Camp Bus 2

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 440 lb. per row; this ride only accommodates one adult per row.

Bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Cedar Creek Cannonball 1

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Guests less than 46" tall must sit in the center of the bench.

Riders board an antique train ride that offers a round trip through the upper area of the park.

Restraint System: Children under 46" must be seated in the center of the bench and be next to a supervising companion.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate Access is available at the ride exit. This ride is wheelchair accessible. Service animals are permitted to ride this attraction.

Cedar Creek Flyers 3

Guests must be 44" tall to ride alone OR 36" tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Charlie Brown's Wind Up 2

Guests must be 36" tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 275 lb. per swing; this ride only accommodates one adult per swing.

Chair swing children's ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar and a between-the-legs safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Demon Drop 5

Guests must be 48" tall to ride.

A tower ride where riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Restraint System: A shoulder harness secures each rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of three functioning extremities that includes one functioning arm with a hand. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride.

Note: Guests with any prosthesis must consult with Ride Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down and over into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Dodgem 4

Guests must be 48" tall to ride alone OR 42" tall and accompanied by a supervising companion.

A bumper car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Dominator 5

Guests must be 48" tall to ride.

Maximum Weight – 2,400 lb. per ride

A tower ride with a chair lift-type seat where riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride contains strobe lighting.

Enterprise 4

Guests must be 54" tall to ride.

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning riders upside down. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A door with a safety chain encapsulates the ride unit to secure riders.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum gondola width is 25.5". Maximum step height into the car is 11.5".

Ferris Wheel 2

Guests must be 48" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 1,020 lb. per gondola. Minimum 2 riders per gondola. Single riders are not permitted to ride alone.

A ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Flying Ace 2

Guests must be 42" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 660 lb. per row; this ride only accommodates one adult per row.

A swinging boat ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Flying Ace Balloon Race 2

Guests must be 42" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 550 lb. per balloon; this ride only accommodates two adults per balloon.

A tower with free hanging cabins suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Hydra 5

Guests must be 54" tall to ride.

A high-speed, floorless looping roller coaster which turns riders upside down seven times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available via the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the Fast Lane entrance to the ride platform. Limit one rider and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Kaleidoscope 3

Guests must be 54" tall to ride alone OR 42" tall and accompanied by a supervising companion.

Maximum weight – 330 lb. per car

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Kite Eating Tree 2

Guests must be 36" tall to ride.

Maximum Weight – 300 lb. per seat; this ride only accommodates one adult per ride.

This children's ride hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42" tall to ride or be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any prosthesis must consult with Ride Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Linus Launcher 3

Guests must be 42" tall to ride alone OR 36" tall and accompanied by a supervising companion.

Maximum Weight – 275 lb. per unit; this ride only accommodates one adult per vehicle.

A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A cage secures riders across the back, shoulders and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Meteor 5

Guests must be 48" tall to ride.

A thrill ride that swings riders upside down both forward and backward. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (excluding prosthesis). Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prosthetics are not permitted on this ride. Guests should check with Ride Services to determine if they are eligible to ride without the prosthetic.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Road Rally 2

Guests must be 48" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

This is a sports car styled gas-powered car that is driven by the rider on a designated track for up to two riders per car.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. Children under 48" must be seated in the passenger seat of the car.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who are not able to steer and depress the accelerator must have a supervising companion accompany them to drive. Guests with a cervical collar or neck brace are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

CAUTION: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Sally's Swingset 2

Guests must be between 36" and 73" tall to ride.

Maximum Weight – 1,540 lb. per ride; this ride only accommodates two adults per row.

A large swing ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-legs safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift.

Scrambler 3

Guests must be 48" tall to ride alone OR 36" tall and accompanied by a supervising companion.

Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Sea Dragon 3

Guests must be 48" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 680 lb. per row

A swinging boat ride that produces a feeling of weightlessness.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Snoopy's™ Cloud Climbers 2

Guests must be under 54" tall to ride. Hand-held infants are not permitted to ride.

A slow moving helicopter ride that goes up and down as the ride rotates around in a circle. Riders can use a grab bar to control the elevation of their unit.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift.

Snoopy's™ Junction 1

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 440 lb. in locomotive and 825 lb. each in other cars; this ride only accommodates two adults in the locomotive and three adults in each of the other cars.

Riders board a miniature train ride in the Planet Snoopy™ section of the park.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Snoopy's™ Rocket Express 2

Guests must be 36" tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 780 lb. per car; this ride only accommodates two adults per car.

Rockets that follow an elevated electric track through the Planet Snoopy™ area of the park.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. A wheelchair lift is available to transport guests from to the ride platform. Please use the call button at the base of the lift to request assistance.

Steel Force 5

Guests must be 48" tall to ride.

An out and back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the Alternate Access entrance to the ride platform. Limit one rider and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Talon 5

Guests must be 54" tall to ride.

A high-speed, inverted looping roller coaster which turns riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available to the left of the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Thunder Canyon 4

Guests must be 46" tall to ride.

Maximum Weight – 1,200 lb. per boat

A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high speed rapids, often rotating rapidly after impacting with the bank of the river. Riders may get soaked.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

Thunder Creek Mountain 4

Guests must be 46" tall to ride alone OR 36" tall and accompanied by a supervising companion.

This is a water flume ride; riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

Thunderhawk 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops and banked turns.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Tilt-A-Whirl 3

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Guests less than 6 years old must be accompanied by a supervising companion.

Maximum Weight – 800 lb. per car

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under dynamic conditions of the ride. Amputation must be at or below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. Watch your step, as the ride unit may be slippery and wet.

Waveswinger 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Whip 2

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

This classic ride allows guests to ride in their own car that whips around an oblong track. Riders will experience sharp turns and rapid movements from side-to-side.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

White Water Landing 5

Guests must be 48" tall to ride.

This is a water shoot-the-chutes ride; riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

WARNING: This ride utilizes magnetic systems during the ride.

Wild Mouse 4

Guests must be 48" tall to ride alone OR 44" tall and accompanied by a supervising companion. Maximum height for guests is 75".

Maximum Weight – 680 lb. per car; this ride only accommodates two adults per car.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Do not use the ride restraints for support as they will shift.

CAUTION: Cars may bump into each other.

Woodstock Express

Guests must be 42" tall to ride alone OR 36" tall and accompanied by a supervising companion.

A junior steel rollercoaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock's Wagon Wheel

Guests must be 42" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 440 lb. per gondola; this ride only accommodates one adult per gondola.

A miniature ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Woodstock's Whirlybirds

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum weight – 550 lb. per car; this ride only accommodates two adults per car.

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Zephyr 1

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion.

Riders board an antique train ride that offers a round trip through the lower area of the park.

Restraint System: A door with a safety lock secures riders.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals are permitted to ride this attraction.

WILDWATER KINGDOM

Each attraction is placed into one of five categories:

CATEGORY	DESCRIPTION
Low Thrill Rides	1 This is a low speed, and or shallow water attraction.
Mild Thrill Rides	2 This is a low to medium speed attraction, and/or water depth to 48 inches. Some rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3 This is a medium speed attraction. Height and water depth may vary Moderate or unexpected forces can be generated during the ride. This attraction may require rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4 This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires rider body control and strong swimming skills.
Aggressive Thrill Rides	5 This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required. Pants, thongs, or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. There can be no sharp objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

Life Jackets

Life jackets are required for children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42" tall must wear life jackets and be accompanied by a supervising companion. This policy will be enforced at the Runaway River, Wave Pool, Wildwater Cove, and Wildwater River. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, Wildwater Kingdom routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs & Pool Lifts

A water wheelchair is available for guests requiring additional assistance when at Wave Pool and Wildwater Cover. The water wheelchair may be used by multiple guests on the same day. While in a wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at Runaway River and Wildwater River. During your visit, please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Aqua Racer

Guests must be 42" tall in bare feet to participate.

Maximum Weight – 300 lb. per person

Slide complex that has guests slide head first on a mat down flumes into a 6" deep runoff. One single guest per mat and slide.

Rider Criteria: Guests must lie stomach down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs with a mat. Guests will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion. Please use caution when entering and exiting as the mat may shift. The mat and surrounding area may be slippery.

Aquablast

Guests must be 46" tall in bare feet to participate.

Maximum Weight – 800 lb. per tube

Four person family raft waterslide, with banked turns and drops ending in a 30" splash pool. Minimum of two guests and maximum of four.

Rider Criteria: Guests are required to remain seated with back against the raft, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Boa Blaster and Constrictor 5

Guests must be 48" tall in bare feet to participate.

Maximum Weight – 300 lb. per person

A complex of three separate slides, one being enclosed, which twist and turn and drop the guest into a 42" deep splash pool.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Cascade 4

Guests must be 54" tall in bare feet to participate.

Maximum Weight – 400 lb. per tube; this attraction accommodates one or two single riders per double tube.

A large humpback slide that drops the guest or guests into a 48" deep splash pool.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. The smaller guest sits in front in between the legs of the larger guest. Single guests must be seated in the back. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Jumpin' Jack Splash 2

Guests must be 40" tall in bare feet to participate.

Maximum Weight – 300 lb. per person

A slide complex, with one slide being enclosed, which twist and turn and drop the guest into a 6" deep runoff.

Rider Criteria: Guests must remain laying feet first with their arms across their chest and ankles crossed. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Kids Cove – Play Area 1

Children must be less than 54" tall in bare feet to participate. Guests over 54" tall in bare feet must be accompanied by a child under 54" tall in bare feet to participate. Hand-held infants are not permitted to participate on elevated activity area or slides.

Children's water play area.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction, or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Hand-held Infants must be accompanied by a supervising companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible.

Kids Cove – Slides 1

Children must be less than 54" tall in bare feet to participate. Hand-held infants are not permitted.

Small slides for children. Slides accommodate one single guest at a time.

Rider Criteria: Guests are required to maintain seated postural control. Guests unable to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a supervising companion to access the slide. Guests must have a minimum of two functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate.

Rider Access: Access to the slides requires guests to walk up several stairs.

Lightning Falls 5

Guests must be 54" tall in bare feet to participate.

Maximum Weight – 275 lb. per person

A complex of two separate slides with quick turns and sudden drops ending in a 48" deep catch pool.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Lollipop Lagoon – Play Area 1

Children must be less than 54" tall in bare feet to participate. Guests over 54" tall in bare feet must be accompanied by a child under 54" tall in bare feet to participate. Hand-held infants are not permitted to participate on elevated activity area or slides.

Children's water play area.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction, or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Hand-held Infants must be accompanied by a supervising companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible.

Lollipop Lagoon – Slides 1

Children must be less than 54" tall in bare feet to participate. Hand-held infants are not permitted.

Small slides for children. Slides accommodate one single guest at a time.

Rider Criteria: Guests are required to maintain seated postural control. Guests unable to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a supervising companion to access the slide. Guests must have a minimum of two functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate.

Rider Access: Access to the slides requires guests to walk up several stairs.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Seaside Splashworks – Structure 1

Hand-held infants must remain on ground level with a supervising companion.

A wet and wild zero depth children's play structure with interactive water features and a large tipping bucket.

Rider Criteria: Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

Rider Access: This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires guests to climb several flights of stairs. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Speed Slides 3

Guests must be 48" tall in bare feet to participate.

Maximum Weight – 300 lb. per person

Body slides with sudden drops ending in a 6" deep runout.

Rider Criteria: Guests are required to remain lying feet first, arms crossed over their chest, legs crossed at the ankles, and back flat against the slide. Guests must have a minimum of four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Wave Pool & Wildwater Cove 4

Children less than 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42" tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 guests.

A large wave pool with depths ranging from 0 ft. to 6 ft. Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities. Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast are not permitted.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Wildwater Rapids 4

Guests must be 46" tall in bare feet to participate.

Maximum Weight – 300 lb. per person

A four slide complex (two are enclosed) with twist and turns that drop the guest into a 36" deep splash pool.

Rider Criteria: Guests are required to remain lying feet first, arms crossed over their chest, legs crossed at the ankles, and back flat against the slide. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Wildwater River 2

Children must be 42" tall in bare feet to participate alone OR be accompanied by a supervising companion. Children under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A supervising companion may accompany up to 2 children.

A slow moving river tube attraction.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Guests who cannot enter/exit without endangering self or others must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to participate.

Rider Access: Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics Supervisory Team to obtain access to the pool lift.

ENTERTAINMENT

Center Stage

Center Stage, located between Burger Barn and the Dominator, is a shaded, outdoor theater. Access to the theater can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

Planet Snoopy™ Showplace

The PEANUTS™ Showplace, located in the heart of Planet Snoopy™, is a small outdoor venue with stadium seating featuring shows for kids. Access to the seating area can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

THE GREAT PUMPKIN FEST

This party is a special daytime event that allows for Halloween family-fun in a kid-friendly package.

Enjoy all the themed attractions and activities especially designed for kids.

For more information on the event, attractions or services offered visit Ride Services.

HALLOWEEN HAUNT

Halloween Haunt® at Dorney Park has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Our Haunt characters will not touch you; please do not touch them in any manner. Those that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, guests may not wear their own face paint, costumes, or masks.

Please adhere to all posted and verbal warnings and directions.

Some guests may prefer to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction entrance.

WARNING

Many rides at Dorney Park & Wildwater Kingdom are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Dorney Park & Wildwater Kingdom does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE!** All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow guests to ride.

Information in this guide is subject to change.
