Welcome to Dorney Park & Wildwater Kingdom!

We are glad you are here! At Dorney Park & Wildwater Kingdom we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Dorney Park & Wildwater Kingdom’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.

RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate</td>
</tr>
<tr>
<td></td>
<td>motion and braking. Riders may encounter unexpected changes in direction and</td>
</tr>
<tr>
<td></td>
<td>/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have high speeds and/or heights, aggressive and</td>
</tr>
<tr>
<td></td>
<td>unexpected forces, and rapid directional or elevation change.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or</td>
</tr>
<tr>
<td></td>
<td>heights, aggressive and unexpected forces, and rapid directional or elevation</td>
</tr>
<tr>
<td></td>
<td>change. Riders will encounter many unexpected rapid changes in speed,</td>
</tr>
<tr>
<td></td>
<td>direction and/or elevation.</td>
</tr>
</tbody>
</table>

KEY TO SYMBOLS

These symbols along with the ride ratings are used to define our rides on the following pages.

- **Ambulatory**
- **Accommodates Wheelchair**
- **Transferable**
- **Maximum Speed of Ride**
- **Prohibited for guests with back trouble**
- **Prohibited for pregnant guests**

©2019 Peanuts Worldwide LLC, Peanuts.com ©2019 Cedar Fair, L.P. 3.5M/DP19-042

Help keep our Park clean. Please place all litter in trash containers.

Information in this guide is subject to change.
**PLEASE RIDE SAFELY**

Pennsylvania Act No. 1994-58 requires that riders must obey all warnings and directions regarding rides and must behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is cause for dismissal from the Park.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or First Aid. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol orchemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS FOR ANY REASON. You may be seriously injured if you enter an unauthorized area.**

**Before riding, please note all safety warnings for each ride. In general:**

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened at all times.
- Keep all parts of your body inside ride unit at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Dorney Park & Wildwater Kingdom is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes is only permitted in designated smoking areas.
- You are responsible for your personal property.
- FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.
- Any guest intentionally dropping or throwing an item from a ride will be required to leave the park.

**ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES**

Dorney Park and Wildwater Kingdom's Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Dorney Park. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Ride Services to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit or Fast Lane entrance) in order to avoid crowds and waiting in the regular lines. Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit or Fast Lane entrance). Guests can then choose to rest comfortably away from the queue area or visit a shop, see a show or play a game until their boarding time.

**Information on where guests access the ride is posted on each Ride’s Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.**

**Here’s How It Works**

- The guest with a mobility impairment or ASD should visit Ride Services upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.

- In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.

- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.

- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.

- Guests may not accumulate more than one boarding time at a time.

- Due to the nature of the attractions in Wildwater Kingdom, Alternate Access and Boarding Passes are only available at Aquablast, Aqua Racer, Boa Blasters & Constrictor, Python Plummet, Runaway River, and Wildwater River via the Fast Lane Plus entrances. Boarding Passes, however, are required for Halloween Mazes if the maze has a line.
Before Entering a Ride Via an Alternate Access Entrance
Please review our Guest Assistance Guide or see the posted Rider Safety Sign located at the entrance and Alternate Access Entrance to our rides.

**ADDITIONAL INFORMATION & SERVICES**

Our goal is to make Dorney Park & Wildwater Kingdom as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

**Assistive Listening Devices**
Assisted listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss. These devices are available at Ride Services.

**Braille & Large Print Guides**
Braille and large print guides of the Park Map & Guest Assistance Guide are available at Ride Services. There are a limited number of guides available on a first-come, first-served basis.

**First Aid**
Our Main First Aid facility is located adjacent to Good Time Gifts. Medical professionals are on duty at all times to assist with special medical needs. Refrigeration of medication, as well as storage of special medical equipment, is available at First Aid. There is also a First Aid station in Wildwater Kingdom located next to the Speed Slides.

**Guests with Hearing Disabilities**
For our guests with hearing disabilities, copies of our ride spiels are available in our Ride Services office and ride locations.

**Interpretive Services**
If requested at least one week in advance, Dorney Park & Wildwater Kingdom will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please contact 610-395-3724. Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

**Parking for Guests with Disabilities**
Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification.

**Family Care Center**
Located in Planet Snoopy, the Family Care Center is a place to assist families during their visit. The facility includes nursing rooms, bottle warmers, and feeding stations. For groups with special needs individuals, the Family Care Center is a nice location to take a break from the day’s activity. This location also includes a private family changing room, family restrooms, and a Comfort and Stimulation area. Please speak with a member of our Guest Services Team for additional information.

**Sensory and Quiet Room**
Located in the Family Care Center. This dedicated space provides tools for family members or caretakers to intensify or reduce sensory stimulation in a controlled environment. For more information regarding the Sensory and Quiet Room please call 610-395-3724 prior to your visit. When at the park, please stop by Guest Services for additional information.

**Private Restrooms**
Private restroom facilities for guests needing the assistance of another guest are available at Dorney Park First Aid and Wildwater Kingdom First Aid. Family restrooms are located at the Family Care Center in Planet Snoopy and across from the Good Time Theatre. Wheelchair accessible stalls are located at all restrooms.

**Special Dietary Needs**
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

**Service Animals**
Service animals are welcome at Dorney Park. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located on the right as you travel the path to the Thunder Creek Mountain Restrooms.

Service animals and their owners can be safely accommodated on the following rides/attractions:
- Antique Carousel
- Planet Snoopy Showplace
- Cedar Creek Cannonball
- Center Stage
- Good Time Theatre
- Zephyr

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Ride Services for more information.

**Wheelchair, Stroller, and ECV Rental**
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Good Time Gifts. However, since wheelchairs, ECV’s, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge guests to bring their own. Quantities are limited. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV’s, and strollers may not be taken out of the Park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services. Wheelchair escorts are necessary to have rented wheelchairs taken outside the park gates to the guests’ car. Ask for an escort at Guest Services.

If you need additional information please stop by the Guest Services Office at the Front Gate, or call 610-395-3724.

**DEFINITIONS**
Every ride entrance lists height requirements and special instructions regarding the ride. Dorney Park & Wildwater Kingdom uses the following terms:

**Ability to Hold On and Brace**
The ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride. This also requires one’s legs to brace to maintain a seated postural position during the forces of the ride.

**Supervising Companion**
Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accommodation and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

**Ability to Hold On or Brace**
The ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated postural position during the forces of the ride.
**Hand-Held Infants**

Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a supervising companion: Antique Carousel (chariot only), Cedar Creek Cannonball, Wave Pool & Wildwater Cove (must stay in 2 ft. of water or less), and Zephyr. Hand-held infants and their supervising companion may also enjoy Island Water Works, Kid’s Cove, and Lollipop Lagoon, but may not participate on the elevated sections of the attractions.

**EVACUATIONS**

Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions. In Wildwater Kingdom, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride is required, due to delayed evacuation of if we need to physically evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation of if we need to physically lift or lower you. If your wheelchair can be safely lifted or lower you. If your wheelchair can be safely evacuated, guests will need to leave their wheelchair. If you accept any risk due to delayed evacuation of if we need to physically lift or lower you. If your wheelchair can be safely accommodated, guests will need to leave their wheelchair to be seated. In most cases, a wheelchair can be accommodated, guests will need to leave their wheelchair to be seated. In most cases, a wheelchair will be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator is available at Talon to transport a guest in a wheelchair to our 2nd story ride platform and wheelchair lifts are available at Hydra, Snoopy’s Rocket Express and Steel Force. Please use the call button at base of lift to request service. Please ask an associate at each location for assistance. If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services.

**GUESTS USING WHEELCHAIRS**

Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of Cedar Creek Cannonball, where one wheelchair can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchair to be seated. In most cases, a wheelchair will be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator is available at Talon to transport a guest in a wheelchair to our 2nd story ride platform and wheelchair lifts are available at Hydra, Snoopy’s Rocket Express and Steel Force. Please use the call button at base of lift to request service. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Dorney Park & Wildwater Kingdom personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at The Family Care Center and Guest Services.

**HEIGHT REQUIREMENTS**

Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be "officially" measured at Ride Services and all ride locations. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement. Dorney Park & Wildwater Kingdom reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

In Wildwater Kingdom, height measurements are taken in bare feet. (There is a separate height wristband for Wildwater Kingdom.)

**LOOSE ARTICLES**

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Dorney Park & Wildwater Kingdoms is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be securely against the rider’s body.

For safety reasons, cell phone usage, taking pictures and filming on rides is prohibited.

Glasses must be secured on all rides.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

**GUESTS OF LARGER SIZE**

All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Apollo, Hydra, Meteor, Monster, Possessed, Revolution, Steel Force, Talon, Thunderhawk, Wave Swinger, and Wild Mouse.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: Hydra, Meteor, Possessed, Revolution, and Talon. The manufacturer requires a maximum rider height on the following rides: Musik Express (78”), Possessed (78”), Sally’s Swingset (73”), and Wild Mouse (75”).

**WEARING RESTRAINTS**

In Wildwater Kingdom, height measurements are taken in bare feet. (There is a separate height wristband for Wildwater Kingdom.)

**MAGNETIC FIELDS**

Electro Magnetics are used at Possessed and White Water Landing. Magnetic, locking gates are also used throughout the park. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.
**OXGEN TANKS**
Due to the dynamic nature of rides, oxygen tanks are not permitted on most attractions. Oxygen tanks are permitted on Antique Carousel (chariot), Cedar Creek Cannonball, and Zephyr. Please consult with a member of management for more information. Oxygen tanks are permitted in all restaurants and shops.

**PHOTOSENSITIVITY / STROBE LIGHTING**
Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Hydra, Steel Force, Talon, and Woodstock™ Express.

**PREGNANCY**
Guests who are pregnant may only ride Antique Carousel, Cedar Creek Cannonball, Cedar Creek Flyers, Ferris Wheel, Snoopy’s™ Cloud Climbers, and Zephyr, and participate in Runaway River, Splash Landing, Wave Pool, Wildwater Cove, and Wildwater River in Wildwater Kingdom.

**PROPER ATTIRE**
Most rides require proper riding attire including shirts, shorts, pantss and shoes. Shirts and shoes are required in queues and all park pathways at all times. Swimwear is not permitted on rides outside of Wildwater Kingdom with the exception of Thunder Canyon and White Water Landing. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Talon, Wave Swinger, Dominator, Meteor, Revolution, Possessed, Hydra, and Linus Launcher.

Appropriate swimwear is required. Pants, thongs, or transparent clothing are not permitted.

**PROSTHETICS**
Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Wildwater Kingdom attractions. Guests should visit Guest Services prior to riding to ensure a safe riding experience. Prosthetics are NOT allowed on Hydra, Meteor, or Talon.

The manufacturers of Demon Drop and Possessed require that riders with prosthetic devices must provide documentation from the manufacturer of their prosthetic device guaranteeing that the prosthetic device has been designed to remain in place on a high-speed roller coaster ride exceeding a maximum of 68 MPH with maximum g forces from -1 to 5 Gs with a sufficient safety factor for single point. Guests with prosthetics enjoying their day at Wildwater Kingdom should consult with a member of our Aquatics Supervisory team.

**RIDE DEVICES FOR GUESTS WITH DISABILITIES**
Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Snoopy’s™ Rocket Express, Steel Force, Thunderhawk, Wild Mouse, and Woodstock™ Express.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Hydra and Talon.

Please see an associate at each ride or Ride Services for assistance.

**RIDER CRITERIA**
Dorney Park & Wildwater Kingdom’s Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our parks as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

- **Ability to exhibit independent seated postural control under the dynamic conditions of the ride**
  - The rider must have the body and spinal control to stay upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider’s thighs.

- **Appropriate Center of Gravity**
  - The rider’s body must have the appropriate weight distribution for that ride.

- **Ability to hold on with one functioning arm**
  - A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

- **Ability to hold on with two functioning arms**
  - Ability to hold on with two functioning arms as defined in ability to hold on with one functioning arm.

- **Ability to brace self with one functioning leg**
  - Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

- **Ability to brace self with two functioning legs**
  - Riders must have two functioning legs to be used for bracing the body during the course of the ride, and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

- **Minimum of two functioning extremities**
  - Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride, and assist in entering and exiting the ride unit.

- **Minimum of three functioning extremities**
  - Riders must have a minimum of three functioning extremities (two legs and an arm or two arms and a leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

- **Ability to enter/exit the attraction within specified parameters without endangering self or others.**
  - Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance (the exit or Fast Lane entrance) or having someone aid you in boarding. For the safety of our associates and guests, ride operators are instructed not to perform any lifting of guests.

- **Appropriate observed behavior**
  - Guests have a duty to:
    - Exercise good judgment
    - Act in a responsible manner while using amusement rides
    - Obey all warnings prior and during participation
    - Not participate while under the influence of alcohol or drugs
    - Properly use all ride safety equipment provided
CASTS AND BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Wildwater Kingdom.

The following chart displays the cast and brace rules for all rides and attractions.

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

- This symbol is used to identify rides where guests may remain in their wheelchair. Wheelchairs can be accommodated on Cedar Creek Cannonball.
- This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.
- This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

- Cast/Brace must fit safely in the ride unit
- Not permitted on heighted activities
- May not use slides
- Must stay in 2 feet or water or less

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above.

In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safety. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Carousel

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants must ride in a chariot.

A Carousel featuring a 66 piece menagerie and two chariots. The outer most row of horses are stationary while the inner rows move up and down.

Restraint System: Children under 46” must be seated in a chariot or ride on the outer three rows of horses and be held by a supervising companion who is standing on the platform between the horses.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, be able to hold on with one functioning arm and one functioning leg, demonstrate appropriate observed behavior, and hand held infants must ride in a chariot with a supervising companion. Riders with a full leg cast must be seated in a chariot.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. The maximum seat width for the chariot is 38" Maximum step height for horse access is 30.5” from strutup to saddle. Service animals are permitted to ride on the ride platform or chariots.
Apollo

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Riders ride in cars that rotate in a circle while alternately lifting and then dropping the cars relative to the center of the ride. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Cedar Creek Cannonball

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are permitted to ride.

Riders board an antique train ride that offers a round trip through the upper area of the park.

Restraint System: Children under 46” must be seated in the center of the bench and be next to a supervising companion.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the attraction exit. This attraction is wheelchair accessible. Services animals are permitted to ride this attraction.

Cedar Creek Flyers

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthetics) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Demon Drop

Guests must be 48” tall to ride.

A tower ride where riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Restraint System: A shoulder harness secures each rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Demon Drop

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A bumber car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual lap bar secures each rider across the thighs and pelvis. Children under 48” must be seated in the passenger seat of the car.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Cedar Creek Cannonball

Guests must be 44” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Riders board an antique train ride that offers a round trip through the upper area of the park.

Restraint System: Children under 46” must be seated in the center of the bench and be next to a supervising companion.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the attraction exit. This attraction is wheelchair accessible. Services animals are permitted to ride this attraction.

Cedar Creek Flyers

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthetics) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Demon Drop

Guests must be 48” tall to ride.

A tower ride where riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Restraint System: A shoulder harness secures each rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Cedar Creek Cannonball

Guests must be 44” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Riders board an antique train ride that offers a round trip through the upper area of the park.

Restraint System: Children under 46” must be seated in the center of the bench and be next to a supervising companion.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the attraction exit. This attraction is wheelchair accessible. Services animals are permitted to ride this attraction.

Cedar Creek Flyers

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthetics) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Demon Drop

Guests must be 48” tall to ride.

A tower ride where riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Restraint System: A shoulder harness secures each rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down and over into the ride unit. Please do not use the ride restraints for support while entering and exiting.

The maximum seat width is 15.5”. Maximum step height into the vehicle is 10”.
A door with a safety chain

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

NOTE: Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 25”.

Enterprise

Guests must be 54” tall to ride.

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position. Riders will experience the feeling of weightlessness and rapid movements from side-to-side.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum gondola width is 25.5”. Maximum step height into the gondola is 11.5”.

Ferris Wheel

Guests must be 48” tall to ride. OR be accompanied by a supervising companion.

Hand held infants are not permitted. Maximum Weight – 1,020 lb. per gondola. Minimum 2 riders per gondola. Single riders are not permitted to ride alone.

A ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

NOTE: Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Prosthetics are not permitted on this ride.

Rider Access: Alternate access is available via the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. A wheelchair lift is available to transport guests from the Fast Lane entrance to the ride platform. Limit one rider and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Hydra

Guests must be 54” tall to ride.

A high-speed, floorless looping roller coaster which turns riders upside down seven times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the Fast Lane entrance to the ride platform. Limit one rider and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Kaleidoscope

Guests must be 54” tall to ride alone OR 42” tall and accompanied by a supervising companion.

Maximum weight – 330 lb. per car.

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride’s main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Dominator

Guests must be 48” tall to ride.

Maximum Weight – 2,400 lb. per ride.

A tower ride with a chair lift-type seat where riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A door with a safety chain

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum gondola width is 25.5”. Maximum step height into the car is 11.5”.

NOTE:

This ride contains strobe lighting.
**Meteor**

Guests must be 48” tall to ride.

A thrill ride that swings riders upside down both forward and backward. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (excluding prosthesis). Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Note:** Prosthetics are not permitted on this ride (see page 8 for additional information on prosthetics)

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Monster**

Guests must be 46” tall to ride alone or be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight – 400 lb. per car.

This is a circular ride with six sweeps of gondolas moving clockwise versus the up and down counter-clockwise rotation of the arms. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

**Restraint System:** An enclosed ride unit secures all riders. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat. Please use caution, as the ride unit may shift when entering and exiting. The maximum step height into the gondola is 24”. The gondola has two steps to enter the ride unit.

**Musik Express**

Guests must be 52” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted. Maximum height for guests is 78”.

Maximum Weight – 495 lb. per car. Guests under 8 years of age must be accompanied by a supervising companion.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride.

Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum step height into the car is 8”.

**Camp Bus**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight – 440 lb. per row. This ride only accommodates one adult per row.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.
Guests must be 42” tall to ride alone or be accompanied by a supervising companion.
Hand held infants are not permitted.

Maximum Weight – 275 lb. per swing. This ride only accommodates one adult per swing.

PEANUTS™ themed chair swing children’s ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

A PEANUTS™ themed swinging boat ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum width of the balloon entrance is 14”. Maximum seat width is 33.5”. Maximum step height into the balloon is 16.5”.

Guests must be 36” tall to ride.

Maximum Weight – 700 lb. per ride. This ride only accommodates one adult per ride.

This children’s ride hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 20”. Maximum step height into the seat is 18”.

A children’s ride hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 16”. Maximum step height into the seat is 28”.

Guests must be 42” tall to ride.

Maximum Weight – 275 lb. per unit. This ride only accommodates one adult per vehicle.

A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 20” for the adult seat and 14” for the children’s seats. Maximum step height onto the seat is 22” for the adult seat and 23” for the children’s seats.
Snoopy’s™ Cloud Climbers

- Guests must be under 54” tall to ride. Hand held infants and Guests over 54” tall are not permitted to ride.
- A slow moving helicopter ride that goes up and down as the ride rotates around in a circle. Riders can use a grab bar to control the elevation of their unit.

RestRAINT System: A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The maximum seat width is 28.5”. Maximum step height into the car is 12.25”.

Snoopy’s™ 500

- Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.
- Maximum Weight – 275 lb. per car. This ride only accommodates one adult per car.
- This children’s ride allows guests to ride in their own car that whips around an oblong track.

RestRAINT System: A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The maximum seat width is 16.25” for the adult seat and 13.5” for the children’s seats. Maximum seat height is 28” for the adult seat and 27” for the children’s seats.

Snoopy’s™ Road Rally

- Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.
- Maximum Weight – 500 lb. per truck. This ride only accommodates one adult per truck. The adult must sit in the back seat.
- This ride is a miniature truck ride that follows an electric track in a “train-like” fashion.

RestRAINT System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Snoopy’s™ Junction

- Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.
- Maximum Weight – 440 lb. in locomotive and 825 lb. each in other cars. This ride only accommodates two adults in the locomotive and three adults in each of the other cars.
- Riders board a miniature train ride in the Planet Snoopy™ section of the park.

RestRAINT System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Sally’s™ Swingset

- Guests must be between 36” and 73” tall to ride.
- Maximum Weight – 1,540 lb. per ride. This ride only accommodates two adults per row.
- A PEANUTS™ themed large swing ride designed for children that produces a feeling of weightlessness.

RestRAINT System: A between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The maximum seat width is 16.25” for the adult seat and 13.5” for the children’s seats. Maximum seat height onto the seat is 28” for the adult seat and 27” for the children’s seats.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 15.25” for the adult seat and 13.5” for the children’s seats. Maximum step height onto the seat is 28” for the adult seat and 27” for the children’s seats.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. The maximum step height into the car is 18.75”.

Snoopy’s™ Cloud Climbers

- Guests must be between 36” and 73” tall to ride.
- Maximum Weight – 1,540 lb. per ride. This ride only accommodates two adults per row.
- A PEANUTS™ themed large swing ride designed for children that produces a feeling of weightlessness.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the truck is 11.75”. Riders can use a grab bar to control the elevation of their unit.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the truck is 11.75”.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the truck is 11.75”.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the truck is 11.75”.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the truck is 11.75”.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.
Snoopy’s™ Rocket Express

Guests must be 42” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 780 lb. per car. This ride only accommodates two adults per car.

PEANUTS™ themed rockets that follow an elevated electric track through the Planet Snoopy™ area of the park.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion.

A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 45.25”. Maximum step height onto the car is 14.5”. A wheelchair lift is available to transport guests from the alternate access entrance to the ride platform. Limit one rider and one companion in lift at a time.

CAUTION: Cars may bump into each other on the course or in the station.

Woodstock™ Express

Guests must be 42” tall to ride alone OR 36” tall and accompanied by a supervising companion.

A junior steel rollercoaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 30.5”. Maximum step height into the car is 18.5”.

WARNING: This ride contains strobe lighting.

Woodstock’s™ Wagon Wheel

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight – 440 lb. per gondola. This ride only accommodates one adult per gondola.

A suspended impulse roller coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 33”. Maximum step height into gondola is 6”.

Woodstock’s™ Whirlybirds

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum weight – 550 lb. per car. This ride only accommodates two adults per car.

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests who do not have appropriate center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them.

NOTE: Guests with any prosthesis must consult with Ride Services prior to waiting in line or riding (see page 8 for additional information on prosthetics).

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 31”.

WARNING: This ride utilizes magnetic systems during the ride.
**Revolution**

Guests must be 48” tall to ride.

Maximum weight – 680 lb. per gondola. This ride only accommodates three adults per gondola.

A thrill ride that swings to the height of 65 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

**Rider Criteria:**
- Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.
- Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride.
- Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.
- Hand held infants are not permitted.

**Rider Access:** Alternate access is available at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

**Road Rally**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

This is a sports car styled gas-powered car that is driven by the rider on a designated track for up to two riders per car.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. Children under 48” must be seated in the passenger seat of the car.

**Rider Criteria:**
- Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive.
- Guests who do not have independent seated postural control, be able to hold on with one functioning arm and one functioning leg, or demonstrate appropriate observed behavior must be accompanied by a supervising companion.
- Guests with a cervical collar or neck brace are not permitted to ride.
- Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting the maximum seat width is 18”. Maximum step height into the car is 19”.

**Sea Dragon**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight – 680 lb. per row.

A swinging boat ride that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.

**Rider Criteria:**
- Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight under the dynamic conditions of the ride.
- Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg cast must fit safely in the ride unit in order to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 55”. Maximum step height into the car is 7.5”.

**Scrambler**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum weight – 510 lb. per car.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:**
- Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride.
- Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg cast must fit safely in the ride unit in order to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 41.5”. Maximum step height into the car is 14.5”.

**Sea Dragon**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight – 680 lb. per row.

A swinging boat ride that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.

**Rider Criteria:**
- Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride.
- Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg cast must fit safely in the ride unit in order to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 55”. Maximum step height into the car is 7.5”.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 18”. Maximum step height into the car is 19”.

**CAUTION:** Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.
Steel Force

Guests must be 48” tall to ride.

An out and back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting. A wheelchair lift is available to transport guests from the alternate access entrance to the ride platform. Limit one rider and one companion in a lift at a time.

WARNING: This ride contains strobe lighting.

Talon

Guests must be 54” tall to ride.

An inverted roller coaster with floorless cars suspended below the track turning riders upside down four times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to check for proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

NOTE: Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Prosthetics are not permitted on this ride.

Rider Access: Alternate access is available to the left of the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. The maximum seat width is 32”. Maximum step down onto the seat is 18.5”.

CAUTION: Boats may bump into the side of channel and other boats.

Thunder Canyon

Guests must be 46” tall to ride.

A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high speed rapids, often rotating rapidly after impacting with the bank of the river. Riders may get soaked.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. The maximum seat width is 32”. Maximum step down onto the seat is 18.5”.

CAUTION: Boats may bump into the side of channel and other boats.

Thunder Creek Mountain

Guests must be 46” tall to ride alone OR 36” tall and accompanied by a supervising companion.

This is a water flume ride; riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. The maximum seat width is 32”. Maximum step down onto the seat is 18.5”.

CAUTION: Boats may bump into the side of channel and other boats.
Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height into the car is 8.5”.

WARNING: This ride utilizes magnetic systems during the ride.

CAUTION: Boats may bump into the side of channel and other boats.

White Water Landing

Guests must be 48” tall to ride.

This is a water shoot-the-chutes ride; riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum Weight – 230 lb. per rider.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider.

Wave Swinger

Guests must be 48” tall to ride.

Maximum Weight – 220 lb. per rider.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

NOTE: Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 2”.

Whip

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

This classic ride allows guests to ride in their own car that whips around an oblong track. Riders will experience sharp turns and rapid movements from side-to-side.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests must be 48” tall to ride.

An out and back wooden roller coaster with banked curves and artime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, or full leg cast are not permitted to ride.

NOTE: Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum Weight – 800 lb. per car.

This is a circular ride where cars pivot by centrifugal force created by the ride’s rotating table.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

NOTE: Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height into the car is 20”.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 40”. Maximum step height into the car is 20”.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 40”. Maximum step height into the car is 20”.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 40”. Maximum step height into the car is 20”.
This is a low to medium speed attraction, and/or water depth to 48 inches.

CAUTION:
Height into the car is 13”.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficient to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. The maximum seat width for the bench is 41”. Maximum step height for access is 11”. Services animals are permitted to ride this attraction.

Zephyr

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are permitted to ride.

Restraint System: Children under 46” must be seated in the center of the bench and be next to a supervising companion.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. The maximum seat width for the bench is 41”. Maximum step height for access is 11”. Services animals are permitted to ride this attraction.

WILDWATER KINGDOM

Each ride/attraction is placed into one of five categories

<table>
<thead>
<tr>
<th>CATEGORY DESCRIPTION</th>
<th>CATEGORY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>1 This is a low speed, and/or shallow water attraction.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>2 This is a low to medium speed attraction, and/or water depth to 48 inches. Some rider control, maneuvering and/or swimming skills required.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>3 This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require rider control and/or strong swimming skills. Physical activity may be strenuous.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>4 This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires rider body control and strong swimming skills.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>5 This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires rider body control and strong swimming skills.</td>

Appropriate Attire

Appropriate swimwear is required. Pants, thongs, or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. There can be no sharp objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

Life Jackets

Life jackets are required for children who are less than 48” tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42” tall must wear life jackets and be accompanied by a supervising companion. This policy will be enforced at the Runaway River, Wave Pool, Wildwater Cove, and Wildwater River. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs and Pool Lifts

A water wheelchair is available for guests requiring additional assistance when at Wave Pool and Wildwater Cove. The water wheelchair may be used by multiple guests on the same day. While in a wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at Runaway River and Wildwater River. During your visit, please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair or pool lift and for further accessibility information.
WATER PARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Aquablast

Guests must be 48” tall in bare feet to ride

Maximum Weight – 800 lb. per tube

This ride accommodates a minimum of two and a maximum of four riders. Single riders are not permitted. Four person family raft waterslide, with grouped turns and drops ending in a 30 inch splash pool.

Rider Criteria: Riders are required to maintain proper riding position – seat down head first, on stomach and hold handles, with their head up. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 78 steps to reach the loading platform with a mat. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Aqua Racer

Guests must be 42” tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per mat/slide.

A 47 foot tall complex that has guests slide head first on a mat down six mat racing flumes. Slides descending into a 6” deep runout.

Rider Criteria: Riders are required to maintain the proper riding position – lie down head first, on stomach and hold handles, with their head up. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 120 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Jumpin’ Jack Splash

Guests must be 42” tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per slide. A complex of three body slides on top of a 25 foot tower, of which one slide is enclosed, that twist and turns and ends in a 6” deep runout. Maximum water depth is 6”

Rider Criteria: Riders are required to maintain the proper riding position — laying feet first with their arms across their chest and ankles crossed. Riders may not sit up in the enclosed slides while riding. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 39 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Island Water Works

Hand held infants are not permitted to participate on elevated activity area. A three level zero-depth water playground and splash pad with a mushroom fountain and a waterfall

Rider Criteria: Guests who do not have the ability to safely enter and exit the attraction, or who do not have appropriate observed behavior must be accompanied by a supervising companion. Hand held infants are not permitted to participate on elevated activity area or elevated structure.

Rider Access: This attraction is wheelchair accessible. Access to elevated platforms require climbing multiple steps.
**Rider Access:** Access to the attraction requires climbing 90 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Lollipop Lagoon**

Guests must be under 54” tall in bare feet to participate on the attraction.

Guests over 54” must be accompanied by a guest under 54” tall.

Hand held infants are not permitted to participate on elevated activity area or slides

Slides accommodate one single rider at a time

Children’s water participation area.

**Rider Criteria:** When riding slides, guests must be able to maintain seated postural control and appropriate center of gravity. Guests must have a minimum of three functioning extremities to participate on the slide.

Hand held infants may be seated with a supervising companion in the pools, but are not permitted on attractions. Full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to slides requires climbing several steps to reach the top platform.

**Lightning Falls**

Guests must be 54” tall in bare feet to ride

Maximum Weight – 230 lb. per rider

This ride accommodates one single rider per tube.

A complex of two separate serpentine slides that twist and turn and drop the rider into a 48 inch deep splash pool.

**Rider Criteria:** Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to slides requires climbing several steps to reach the top platform.

**Patriot’s Plunge**

Guests must be 48” tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per tube.

A complex of three separate slides, one being completely dark, that twist and turn and drop the rider into a 42 inch deep splash pool.

**Rider Criteria:** Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 82 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Runaway River**

Children must be 42” tall in bare feet to ride alone OR be accompanied by a supervising companion.

Children under 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

A supervising companion may accompany up to 2 children.

A slow moving, winding river tube ride at a depth of 30 in. The river is approximately 1,600 feet long and passes through tunnels, and water falls.

**Rider Criteria:** Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Guests who cannot enter/exit without endangering self or others must be accompanied by a supervising companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**Snake Pit – Boa Blasters and Constrictor**

Guests must be 48” tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per tube.

A complex of three separate slides, one being completely dark, that twist and turn and drop the rider into a 42 inch deep splash pool.

**Rider Criteria:** Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 79 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.
Guests must be 48” tall in bare feet to ride

**Maximum Weight – 300 lb. per rider**

This ride accommodates one single rider per slide.

These are two high speed body slides with sudden drops designed for single riders. Slide ends in a 6” deep runout. Maximum water depth is 6”.

**Rider Criteria:** Riders are required to maintain the proper riding position — laying feet first with their arms across their chest, ankles crossed and head back against the slide. Riders may not sit up while riding. Guests must have four functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 102 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

**NOTE:** Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

### Speed Slides

**Guests must be 48” tall in bare feet to ride**

**Maximum Weight – 300 lb. per rider**

This ride accommodates one single rider per slide.

These are two high speed body slides with sudden drops designed for single riders. Slide ends in a 6” deep runout. Maximum water depth is 6”.

**Rider Criteria:** Riders are required to maintain the proper riding position — laying feet first with their arms across their chest and ankles crossed. Riders may not sit up while riding. Guests must have four functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 58 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

### Wave Pool

Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion.

A supervising companion may accompany up to 2 guests.

A large wave pool with depths ranging from 0 ft. to 6 ft. Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

**Rider Criteria:** Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities. Hand held infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisor team to obtain access to the water wheelchair.
**Wildwater Rapids**

Guests must be 46” tall in bare feet to ride.

Maximum Weight – 300 lb. per rider.

This ride accommodates one single rider per tube.

A 40 foot tall complex of four separate slides, two slides being enclosed, that twist and turn and drop the rider into a 36 inch deep splash pool.

**Rider Criteria:** Riders are required to maintain the proper riding position — laying feet first with their arms across their chest and ankles crossed. Riders may not sit up in the enclosed slides while riding. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 61 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

**Wildwater River**

Children must be 42” tall in bare feet to ride alone OR be accompanied by a supervising companion.

Children under 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

A supervising companion may accompany up to 2 children.

A slow moving, winding river tube ride at a depth of 30 in. The river is approximately 1,600 feet long and passes through tunnels, and waterfalls.

**Rider Criteria:** Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**ATTRACTIONS**

**Center Stage**

Center Stage, located between Burger Barn and the Dominator, is a shaded, outdoor theater with bench seating. Access to the theater can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

**Planet Snoopy™ Showplace**

The PEANUTS™ Showplace, located in the heart of Planet Snoopy™, is a small outdoor venue with stadium seating featuring shows for kids. Access to the seating area can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

**Good Time Theatre**

The Good Time Theatre, located next to the main entrance, is an indoor air conditioned theatre. Access to the theatre is through the main entrance doors on the right side of the building. Doors typically open 15 minutes before show time and close promptly at the start of the show. There are viewing areas and that accommodate wheelchair and companions. Please ask an Usher for assistance. After the show an Usher will assist you with exiting the theatre.

This party is a special daytime event that allows for Halloween family-fun in a kid-friendly package.

Enjoy all the themed attractions and activities especially designed for kids.

For more information on the event, attractions or services offered visit Ride Services.

Halloween Haunt at Dorney Park has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Our Haunt characters will not touch you, please do not touch them in any manner. Those that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, guests may not wear their own face paint, costumes, or masks.

Please adhere to all posted and verbal warnings and directions.

Some guests may prefer to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction entrance.
