**Welcome to Dorney Park & Wildwater Kingdom!**

We are glad you are here! At Dorney Park & Wildwater Kingdom we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to ensure the safety of the rider. These safety systems may affect the ability of an individual to safely experience the ride. Certain body types, shapes, and sizes, guests with heart, back or neck trouble, women who are pregnant or guests with casts or braces may not be safely accommodated by some rides. For example, manufacturer's height requirements are based on the size needed for safety restraints to function properly and the level of maturity usually associated with a certain height.

Dorney Park & Wildwater Kingdom’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Ride Services to obtain a list of rides you can safely ride. Your Rider Access List will provide information for our ride operators to help accommodate you.

**Ride Rating System**

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Routes</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Routes</td>
<td>Rides that generally have low speeds with gentle motion and braking.</td>
</tr>
<tr>
<td>Moderate Thrill Routes</td>
<td>Rides that generally have low medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Routes</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Routes</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

**Key To Symbols**

These symbols along with the ride ratings are used to define our rides on the following pages.

- **Ambulatory:** Must be accompanied by supervising companion, of proper height to ride.
- **Accommodates Wheelchair:** Must be accompanied by a child to ride/participate. Cannot be any taller than this to ride/participate.
- **Transferable:** Must be at least this height to ride.
- **Maximum Height of Ride:** Must be accompanied by a supervising companion.
- **Maximum Speed of Ride:** Life jacket is required.
- **Maximum Water Depth:** Maximum Height of Ride
- **Prohibited for guests with back trouble:** Prohibited for guests who have had recent surgery.
- **Prohibited for pregnant women:** Prohibited for guests with heart trouble or high blood pressure.
**Please Ride Safely**

Pennsylvania Act No. 1994-58 requires that riders must obey all warnings and directions regarding rides and must behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is cause for dismissal from the Park.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone we feel may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or First Aid. Remember, if you suspect your health could be at risk for any reason, please do not enter unauthorized areas. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened at all times.
- Keep all parts of your body inside ride unit at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Goggles must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Dorney Park & Wildwater Kingdom is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes is only permitted in designated smoking areas.
- You are responsible for your personal property.
- For your safety, do not enter unauthorized areas to retrieve lost articles. You may be seriously injured if you enter an unauthorized area.

**Alternate Access Entrances & Attraction Boarding Passes**

Dorney Park’s Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and employee is our #1 priority at Dorney Park. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other abilities. Please refer to your individual Rider Access Sheet for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Ride Services to obtain a Rider Access Sheet, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit) in order to avoid crowds and waiting in the regular lines. Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit). Guests can then choose to rest comfortably away from the queue area, visit a shop, see a show, or play a game until their boarding time.

Information on where guests access the ride is posted on each ride’s Rider Safety Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

**Here’s How It Works**

- The guest with a mobility impairment or ASD should visit Ride Services upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to three riding companions.
- In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.
- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.
- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
- Guests may not accumulate more than one boarding time at a time.
- Due to the nature of the attractions in Wildwater Kingdom, Alternate Access and Boarding Passes are only available at the following locations (Utilize the Fast Lane Plus entrances):
  - Aqua Racer
  - Aquablast
  - Python Plummert
  - Runaway River
  - Wildwater River

- Guests with a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit). Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where guests may remain in their wheelchair.

This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

Before Entering a Ride Via an Alternate Access Entrance
Please review our Guest Assistance Guide or see the posted Rider Safety Sign located at the entrance and Alternate Access Entrance to our rides.

Additional Services for Guests with Disabilities
We strive to make Dorney Park & Wildwater Kingdom as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

First Aid
Our Main First Aid facility is located adjacent to Good Time Gifts. Medical professionals are on duty at all times to assist with special medical needs. Refrigeration of medication, as well as storage of special medical equipment, is available at First Aid. There is also a First Aid station in Wildwater Kingdom located next to the Speed Slides.

Guests with Visual Impairment
Braille and large print guides of the Park Map and Guest Assistance Guide are available at Ride Services. There are a limited number of guides available on a first-come, first-served basis.

Guests with Hearing Disabilities
For our guests with hearing disabilities, copies of our ride spiels are available in our Ride Services office and ride locations.

Assistive Listening Devices
Assisted listening systems utilize a lightweight wireless device that receives a signal from transmitters at certain locations in order to amplify sound. These are recommended for guests with mild to moderate hearing loss. The system can be used at all Live Show venues.

American Sign Language Interpreting
If requested at least one week in advance, Dorney Park will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please call 610-395-3724 or email Admissions@dorneypark.com.

Telephones
For guests with hearing impairments, a Telecommunication Device for the Deaf (TDD) is available at Guest Services.

Parking for Guests with Disabilities
Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification.

Family Care Center
Located in Planet Snoopy, the Family Care Center is a nice location to assist families during their visit. The facility includes nursing rooms, bottle warmers, and feeding stations. For groups with special needs, individuals, the Family Care Center is a nice location to take a break from the day’s activity. This location also includes a private family changing room, family restrooms, and a Comfort and Stimulation area. Please speak with a member of our Guest Services Team for additional information.

Multi-Sensory and Calming Room
Located in the Family Care Center, a Multi-Sensory Room is provided for those guests with sensory processing concerns. This dedicated space provides tools for family members or care-givers to intensify or reduce sensory stimulation in a controlled environment. For more information regarding the Multi-Sensory Room please call 1-610-395-3724 prior to your visit. When at the park, please stop by Guest Services for additional information.

Private Restrooms
Private restroom facilities for guests needing the assistance of another guest are available at Dorney Park First Aid and Wildwater Kingdom First Aid.

Family restrooms are located at the Family Care Center in Planet Snoopy™ and across from the Good Time Theatre on the corner of the Good Time Gifts building.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Service Animals
Service animals are welcome at Dorney Park. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located on the right as you travel the path to the Thunder Creek Mountain Restrooms.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal.

Visit Ride Services for more information.

Wheelchairs and Scooters
A limited supply of wheelchairs, electric convenience vehicles (ECV’s), and strollers are available for rent at Good Time Gifts. However, since wheelchairs, ECV’s, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge guests to bring their own. Quantities are limited. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV’s, and strollers may not be taken outside the Park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services. Wheelchair escorts are necessary to have rented wheelchairs taken outside the park gates to the guests’ car. Ask for an escort at Guest Services.

If you need additional information please stop by the Guest Services Office at the Front Gate, or call 610-395-3724.

Definitions
Every ride entrance lists height requirements and special instructions regarding the ride. Dorney Park uses the following terms:

Ability to Hold On and Brace
The ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride. This also requires one’s legs to brace to maintain a seated postural position during the forces of the ride.

Service animals and their owners can be safely accommodated on the following rides/attractions:
• Antique Carousel
• Planet Snoopy™ Showplace
• Cedar Creek Cannonball
• Center Stage
• Good Time Theatre
• Zephyr

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal.

Visit Ride Services for more information.

Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal.

Visit Ride Services for more information.
Supervising Companion
Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older and demonstrates appropriate observed behavior. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed.

For example, if a seat is designed for three people, the supervising companion can accompany two riders. An exception to this is PEANUTS Road Rally where the supervising companion has to be in the same ride unit.

Accompanied By
Whenever a guest needs accompaniment, the accompanying person must meet all the ride requirements, as well as assist the guest. This includes helping the guests board and exit the ride, assisting the guest in maintaining postural control while riding, and assisting the guest down stairs, catwalks, or ladders in case of evacuation.

Hand Held Infants
Hand held infants (children who are unable to independently walk or maintain seated postural control) will only be able to ride the following rides independently walk or maintain seated postural control during the process. Remain seated until given instructions. In Wildwater Kingdom, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

Guests of Larger Size
All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride.

Due to ride restraint system requirements, guests of larger size (in terms of height, weight, and/or body proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Apollo, Hydra, Meteor, Monster, Revolution, Steel Force, Talon, Thunderhawk, Wave Swinger, Wild Mouse, and Possessed.

Maximum and minimum weight requirements can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, we urge you to consult with our staff at Guest Services. Dorney Park & Wildwater Kingdom personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Health Restrictions
Guests with a history of recent surgery, heart trouble/high blood pressure, neck trouble, back trouble, or any other condition that may be aggravated by riding, or who are pregnant, should carefully heed all warning signs at each ride entrance. If you are in doubt about your ability to safely experience a ride or would like more rider information, please stop by Ride Services.

Height Requirements
Children may be “officially” measured at one of the Height Measurement Stations located just inside the front gate, across from the locker area inside Wildwater Kingdom, and most major rides throughout the park. The measured guest will be given a wristband to indicate height. Wristbands are not required to ride but are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of the child, a standard play shoe that does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet the height requirement. Dorney Park & Wildwater Kingdom reserve the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

Height Requirements are posted at the entrance to each attraction. Height measurements for Wildwater Kingdom slides and attractions are taken in bare feet.

Loose Articles
Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, personal entertainment devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Ride Operators cannot be responsible for these items. For Safety reasons, taking pictures, videotaping, and filming while riding is prohibited.

Loose Articles
Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, personal entertainment devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Ride Operators cannot be responsible for these items. For Safety reasons, taking pictures, videotaping, and filming while riding is prohibited.

To ensure guests can hear safety instructions, headphones must be removed before boarding. Personal entertainment devices must be safely secured in a cargo pocket, waist packet, left in a locker or with a non-rider. Please refrain from eating or drinking refreshments in our station areas. Smoking is prohibited in all ride lines and stations. Smoking is only allowed in designated smoking areas within the park.
Lost Articles: Travel Light

In the amusement park, most rides require proper riding attire including shirts, shorts/pants, and shoes. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride system.

Prosthetic Devices

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain proper riding positioning. Riders should visit Ride Services prior to riding to ensure a safe riding experience.

Prosthetics are NOT allowed on the following rides:
- Hydra
- Talon

The Manufacturers of the following rides require that riders with prosthetic devices must provide documentation from the manufacturer of their prosthetic device guaranteeing that the prosthetic device has been designed to remain in place on a high speed roller coaster ride exceeding a maximum of 68 MPH with maximum G forces from -1 to 5 G's with a sufficient safety factor for single point
- Demon Drop
- Possessed

Guests who do not have documentation—in order to ride — must remove their prosthetic and have a below the knee amputation and sufficient lower extremities to ensure the ride restraint system adequately restrains them on the following:
- Demon Drop
- Possessed

Guests with prosthetics enjoying their day at Wildwater Kingdom should consult with a member of our Aquatics Supervisory team. Prosthetic devices with exposed metal parts are not permitted on most Wildwater Kingdom attractions.

Ride Equipment for Guests w/ Disabilities

Body Harnesses

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the criteria. The following rides are equipped with a body harness: Hydra and Talon.

Please see an associate at each ride or Ride Services for assistance.

Transfer Devices

Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Snoopy’s™ Rocket Express, Woodstock™ Express, Steel Force, Thunderhawk, and Wild Mouse. Transfer may require movement up and down during entry or exit.

Rider Criteria

Dorney Park’s Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our Park as much as possible. The policy was developed by analyzing the Neutral Criteria required to safely ride each particular ride. Each ride was evaluated for the criteria necessary for an individual to ride safely. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

The evaluation of each ride considers the following criteria which may be required to ride a particular ride safely. All rides will require a combination of several criteria to be met before riding. Refer to the description of the ride for more information.

1. Ability to exhibit independent seated postural control under the dynamic conditions of the ride

The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider’s thighs.

2. Appropriate Center of Gravity

The rider’s body must have the appropriate weight distribution for that ride.

3. Ability to hold on with one functioning arm

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

4. Ability to hold on with two functioning arms

Ability to hold on with two functioning arms as defined in ability to hold on with one functioning arm.

5. Ability to brace self with one functioning leg

Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

6. Ability to brace self with two functioning legs

Riders must have two functioning legs to be used for bracing the body during the course of the ride, and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

7. Minimum of two functioning extremities

Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride, and assist in entering and exiting the ride unit.
8. Minimum of three functioning extremities
Riders must have a minimum of three functioning extremities (two legs and an arm or two arms and a leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

9. Ability to enter/exit ride within specified parameters without endangering self or others
Riders must be able to enter and exit the ride without jeopardizing their safety or others and to assist with their own evacuation if necessary. This may include special arrangements such as entering through the exit or having someone aid them in boarding. For the safety of our team members and riders, ride operators are instructed not to perform any lifting of riders.

10. Appropriate Observable Behavior
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate. Riders have a duty to:
• exercise good judgement
• act in a responsible manner while using amusement rides
• obey all warnings prior to and during participation
• not participate while under the influence of alcohol or drugs
• properly use all ride safety equipment provided

### Casts and Braces
Riders with casts and braces are restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Riders with full arm (elbow restricted) and full leg (knee restricted) casts and braces are restricted from most rides and water slides at Dorney Park. We suggest you delay your visit until the cast is removed. Braces with exposed metal parts are not permitted on the slides in Wildwater Kingdom.

The following chart displays the cast and brace rules for all rides and attractions.

<table>

DORNEY PARK & WILDWATER KINGDOM:
The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

DORNEY PARK
The following descriptions are designed to give you information on the type of actions caused by various rides. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Carousel
Guests must be 46” tall to ride alone OR be accompanied by a supervising companion.
Hand held infants must ride in a chariot.
A Carousel featuring a 66 piece menagerie and two chariots. The outer most row of horses are stationary while entering and exiting. The maximum seat width is 15.5”. Maximum step height into the vehicle is 10”.

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. The maximum seat width for the chariot is 38”. Maximum step height for horse access is 30.5” from stirrup to saddle. Service animals are permitted to ride on the ride platform or chariots.

Apollo
Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.
Riders ride in cars that rotate in a circle while alternately lifting and then dropping the cars relative to the center of the ride. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Rider Criteria:
Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width for the car is 16.5” with a total car width of 34.5”.

Maximum Weight - 340 lb. per car.
Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Rider Criteria:
Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

NOTE:
Guests with any prosthesis must consult with Ride Services prior to waiting in line or riding (see page 8 for additional information on prosthetics).

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down and over into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 15.5”. Maximum step height into the vehicle is 10”.

Cedar Creek Cannonball
Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are permitted to ride.
Riders board an antique train ride that offers a round trip through the upper area of the park.

Rider Criteria:
Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access:
Alternate access is available at the attraction exit. This attraction is wheelchair accessible. Services animals are permitted to ride this attraction.

Cedar Creek Flyers
Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Demon Drop
Guests must be 48” tall to ride.
A tower ride where riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Rider Criteria:
Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

WILDWATER KINGDOM:
Restraint System: Children under 46” must be seated in a chariot or ride on the outer three rows of horses and be held by a supervising companion.

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Dorney Park & Wildwater Kingdom:
Rider Services prior to waiting in line or riding (see page 8 for additional information on prosthetics).

Rider Access:
Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.
Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A bumper car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual lap bar secures each rider across the thighs and pelvis. Children under 48” must be seated in the passenger seat of the car.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift. The maximum seat width is 25”. Maximum step height onto the seat is 25”.

Enterprise

Guests must be 48” tall to ride.

A spinning thrill ride where gondolas quickly move from side to side. Riders will experience weightlessness and rapid movements from side-to-side.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Driver: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift. The maximum seat width is 25”. Maximum step height onto the seat is 25”.

Ferris Wheel

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

Maximum weight - 1,020 lb. per gondola. Minimum 2 riders per gondola. Single riders are not permitted to ride alone.

A ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum gondola width is 68”. Maximum step height into the gondola is 18.5”.

Hydra

Guests must be 54” tall to ride.

A high-speed, floorless looping roller coaster which turns riders upside down seven times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have an appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

NOTE: Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Prosthetics are not permitted on this ride.

Rider Access: Alternate access is available via the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the Fast Lane entrance to the ride platform. Limit one rider and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Kaleidoscope

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

Maximum weight - 330 lb. per car.

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride’s main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.
**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**NOTE:** Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Monster**

Guests must be 48" tall to ride.

A thrill ride that swings riders upside down both forward and backward. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

**Restrain System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

**NOTE:** Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. The maximum step height into the gondola is 24". The gondola has two steps to enter the ride unit.

**Musik Express**

Guests must be 52” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum height for guests is 78". Maximum Weight - 495 lb. per car. Guests under 8 years of age must be accompanied by a supervising companion.

**Restrain System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**PEANUTS™ themed bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.**

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**PLANET SNOOPY™**

**Camp Bus**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 440 lb. per row. This ride only accommodates one adult per row.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Maxwell the Musician**

Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Luna Lovegood and the Demon Store**

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum height for guests is 78”. Maximum Weight - 495 lb. per car. Guests under 8 years of age must be accompanied by a supervising companion.

**Restrain System:** A shared lap bar secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**SEASONAL RIDES**

**PEANUTS™**

**Linus the Laughing**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 440 lb. per row. This ride only accommodates one adult per row.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support as they will shift.
Charlie Brown’s Wind Up

Rider Access: Guests must be 42” tall to ride alone or be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 275 lb. per swing. This ride only accommodates one adult per swing. PEANUTS™ themed chair swing children’s ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise. Restraint System: A shared lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Flying Ace

Rider Access: Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 660 lb. per row. This ride only accommodates one adult per row. A PEANUTS™ themed swinging boat ride designed for children that produces a feeling of weightlessness. Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit. Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum width of the balloon entrance is 14”. Maximum seat width is 33.5”. Maximum seat height into the balloon is 16.5”.

Flying Ace Balloon Race

Rider Access: Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 550 lb. per balloon. This ride only accommodates two adults per balloon. PEANUTS™ themed hot air balloon ride that spins and raises riders in the air. Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit. Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 20” for the adult seat and 14” for the children’s seats. Maximum step height onto the seat is 22” for the adult seat and 23” for the children’s seats.

Kite Eating Tree

Rider Access: Hand held infants are not permitted. This ride accommodates one adult per vehicle. Maximum Weight - 275 lb. per unit. This ride only accommodates one adult per vehicle. A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise. Restraint System: A cage secures riders across the back, shoulders and pelvis. Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.
Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 16.25”. Maximum step height into the seat is 28.5”.

**PEANUTS**™ **500**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum Weight - 500 lb. per truck. This ride only accommodates one adult per truck.

This children’s ride allows guests to ride in their own car that whips around an oblong track.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support as they will shift. The maximum step height into the seat is 5.5”.

**Sally’s™ Swingset**

Guests must be between 36” and 73” tall to ride. Maximum Weight - 1,340 lb. per ride. This ride only accommodates two adults per row.

A PEANUTS™ themed large swing ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 16.25” for the adult seat and 13.5” for the children’s seats. Maximum step height onto the seat is 28” for the adult seat and 27” for the children’s seats.

**Snoopy’s™ Cloud Climbers**

Guests must be under 54” tall to ride. Maximum Weight - 780 lb. per car. This ride is a miniature truck ride that follows a circle. Riders can use a grab bar to control their movement.

A slow moving helicopter ride that goes up and down as the ride rotates around in a circle. Riders can use a grab bar to control the elevation of their unit.

**Restraint System:** A shared seatbelt secures each rider in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

The maximum step height into the seat is 12.25”.

**Snoopy’s™ Rocket Express**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A between-the-leg safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.
Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 45.25". Maximum step height onto the car is 14.5". A wheelchair lift is available to transport guests from the alternate access entrance to the ride platform. Limit one rider and one companion in lift at a time.

CAUTION: Cars may bump into each other on the course or in the station.

Woodstock™ Wagon Wheel

Guests must be 42” tall to ride alone OR 36” tall and accompanied by a supervising companion.

A junior steel rollercoaster with mild drops, and accompanied by a supervising companion.

Guests must be between 52” and 78” tall to ride. This ride only accommodates two adults per car.

A shoulder harness secures each rider over the head and across the chest. The shoulder harness has seatbelt that connects to the side of the vehicle. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride.

Restraint System: A shoulder harness secures each rider over the head and across the chest. The shoulder harness has seatbelt that connects to the side of the vehicle. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them.

NOTE: Guests with any prostheses must consult with Ride Services prior to waiting in line or riding (see page 8 for additional information on prosthetics).

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 31”.

WARNING: This ride utilizes magnetic systems during the ride.

Woodstock’s™ Whirlybirds

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion.

Hand held infants are not permitted.

Maximum Weight- 440 lb. per gondola. This ride only accommodates two adults per car.

A miniature ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: A shoulder belt harness secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride.

Restraint System: A shoulder harness secures each rider over the head and across the chest. The shoulder harness has seatbelt that connects to the side of the vehicle. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 31”.

WARNING: This ride utilizes magnetic systems during the ride.

Revolution

Guests must be 48” tall to ride.

Maximum weight - 680 lb. per gondola. This ride only accommodates three adults per gondola.

A suspended impulse roller coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shoulder harness secures each rider over the head and across the chest. The shoulder harness has seatbelt that connects to the side of the vehicle. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 31”.

WARNING: This ride utilizes magnetic systems during the ride.

Express

Guests must be 42” tall to ride alone OR 36” tall and accompanied by a supervising companion.

A junior steel rollercoaster with mild drops, and accompanied by a supervising companion.

Guests must be between 52” and 78” tall to ride. This ride only accommodates two adults per car.

A shoulder harness secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restraints them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 24”. Maximum step height to ride platform is 13”.

Possessed

Guests must be between 52” and 78” tall to ride.

Maximum weight - 900 lb. per coach.

A suspended impulse roller coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

Restraint System: A shoulder harness secures each rider over the head and across the chest. The shoulder harness has seatbelt that connects to the side of the vehicle. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or braced arm cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them.

NOTE: Guests with any prostheses must consult with Ride Services prior to waiting in line or riding (see page 8 for additional information on prosthetics).

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting as they will shift. The maximum seat width is 17”. Maximum step height onto the seat is 31”.

WARNING: This ride utilizes magnetic systems during the ride.
of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Note:** Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 26.5”.

**Sea Dragon**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 31”. Maximum step height into the car is 18”.

**CAUTION:** Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

**Sea Dragon**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 680 lb. per row.

A swinging boat ride that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the seat. Please use caution, as the ride unit may shift when entering and exiting. The maximum seat width is 35.5”. Maximum step height into the car is 14.5”.

**Sea Dragon**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 510 lb. per car.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.
Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

NOTE: Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Ride Services to determine if they are eligible to ride using the full body harness. Prosthetics are not permitted on this ride.

Rider Access: Alternate access is available to the left of the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. The maximum seat width is 17.5”. An elevator is available to transport guests from the alternate access entrance to the ride platform.

WARNING: This ride contains strobe lighting.

Thunder Canyon

Guests must be 46” tall to ride. Maximum Weight - 1,200 lb. per boat.
A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high speed rapids, often rotating rapidly after impacting with the bank of the river. Riders may get soaked. Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. The maximum seat width is 32”. Maximum step down onto the seat is 18.5”. CAUTION: Boats may bump into the side of channel and other boats.

Thunderhawk

Guests must be 46” tall to ride. An out and back wooden roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side. Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support while entering and exiting. This is a circular ride where cars pivot by centrifugal force created by the ride’s rotating table.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis. Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion. Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. Watch your step, as the ride unit may be slippery and wet. The maximum seat width is 59”. Maximum step height into the car is 8.5”.

Thunder Creek Mountain

Guests must be 46” tall to ride alone OR 36” tall and accompanied by a supervising companion.
This is a water flume ride; riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Tilt-A-Whirl

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted. Maximum Weight - 800 lb. per car.
This is a circular ride where cars pivot by centrifugal force created by the ride’s rotating table.
Wave Swinger

Guests must be 48” tall to ride.  
Maximum Height - 230 lb. per rider.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 40”. Maximum step height into the car is 20”.

WARNING: This ride contains strobe lighting during Halloween Haunt.

White Water Landing

Guests must be 48” tall to ride.

This is a water chute-the-chutes ride; riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities to ensure the ride restraint system adequately restrains them. Riders with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. The maximum seat width is 40”. Maximum step height into the car is 20”.

CAUTION: Boats may bump into the side of channel and other boats.

Wild Mouse

Guests must be 48” tall to ride alone OR 44” tall and accompanied by a supervising companion.

Maximum height for guests is 75”.

Maximum Weight - 680 lb. per car. This ride only accommodates two adults per car.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side to side.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not have independent seated postural control, appropriate observed behavior, and hand held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. The maximum seat width for the bench is 41”. Maximum step height for access is 11”. Services animals are permitted to ride this attraction.
Wildwater Kingdom

Each ride/attraction is placed into one of five categories

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>This is a low speed, and or shallow water attraction.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>This is a low to medium speed attraction, and/or water depth to 48 inches. Some rider control, maneuvering and/or swimming skills required.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require rider control and/or strong swimming skills. Physical activity may be strenuous.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires rider body control and strong swimming skills.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires rider body control and strong swimming skills.</td>
</tr>

Key To Symbols

These symbols along with the ride ratings are used to define our rides on the following pages.

- Ambulatory
  - Must be accompanied by supervising companion, of proper height to ride
- Accommodates Wheelchair
  - Must be accompanied by a child to ride/participate
  - Cannot be any taller than this to ride/participate
- Transferable
  - Must be at least this height to ride.
- Maximum Speed of Ride
  - Life jacket is required
  - Maximum Height of Ride
  - Maximum Water Depth
- Prohibited for guests with back trouble
- Prohibited for guests who have had recent surgery
- Prohibited for guests with neck trouble
- Prohibited for pregnant women
- Prohibited for guests with heart trouble or high blood pressure
**WILDWATER KINGDOM**

Proper swimwear is required. Thongs, or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Girls of all ages must wear a top. Footwear is permitted where appropriate. All children in diapers must wear waterproof diaper covers or have a swim diaper (Available for purchase in the Tradewinds gift shop). To prevent injury or equipment damage, the following items are prohibited on most Wildwater Kingdom attractions: swimsuits with metal buckles, rivets, snaps, buttons, or exposed rear or side zippers. Glass items are not permitted. Wildwater Kingdom hours vary from Dorney Park hours. The waterpark may close during inclement weather.

Life jackets are required for children who are less than 48” tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42” tall must wear life jackets and be accompanied by a supervising companion. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one.

A water wheelchair is available for guests requiring additional assistance when at Wildwater Cove and the Wave Pool. The water wheelchair may be used by multiple guests on the same day. Please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair and for further information.

---

**Aquablaster**

**Guests must be 46” tall in bare feet to ride.**

**Maximum Weight - 800 lb. per tube**

This ride accommodates a minimum of two and a maximum of four riders. Single riders are not permitted.

Four person family raft waterslide, with banked turns and drops ending in a 30 inch splash pool.

**Rider Criteria:** Riders are required to maintain proper riding position - seated with your back against the raft, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 78 steps to reach the loading platform with a mat. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

---

**Aqua Racer**

**Guests must be 42” tall in bare feet to ride.**

**Maximum Weight - 300 lb. per rider**

This ride accommodates one single rider per mat/slide.

A 47 foot tall complex that has guests slide head first on a mat down six mat racing flumes. Slides descending into a 6” deep runout.

**Rider Criteria:** Riders are required to maintain the proper riding position – lie down head first, on stomach and hold handles, with their head up. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 44 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

---

**Cascades**

**Guests must be 54” tall in bare feet to ride.**

**Maximum Weight – 230 lb. per single rider**

**Maximum Weight – 400 lb. per double rider**

This ride accommodates one or two single riders per double tube.

A large humpback slide that drops the rider or riders into a 48 inch deep splash pool.

**Rider Criteria:** Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. When single riding the rider will ride in the back of the double tube. If double riding, the heavier of the two riders will ride in the back of the tube. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 44 steps with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

---

**Island Water Works**

**Hand held infants are not permitted to participate on elevated activity area.**

A three level zero-depth water playground and splash pad with a mushroom fountain and a waterfall.

**Rider Criteria:** Guests who do not have the ability to safely enter and exit the attraction, or who do not have appropriate observed behavior must be accompanied by a supervising companion. Hand held infants are not permitted to participate on elevated activity area or elevated structure.

**Rider Access:** This attraction is wheelchair accessible. Please use caution when entering and exiting as the area may be slippery. Access to elevated platforms require climbing multiple steps.

---

**Jumpin' Jack Splash**

**Guests must be 42” tall in bare feet to ride.**

**Maximum Weight – 300 lb. per rider**

This ride accommodates one single rider per slide.

A complex of three body slides on top of a 25 foot tower, of which one slide is enclosed, that twist and turns and ends in a 6” deep runout. Maximum water depth is 6”

**Rider Criteria:** Riders are required to maintain the proper riding position — laying feet first with their arms across their chest and ankles crossed. Riders may not sit up in the enclosed slides while riding. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing 39 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.
Kids Cove

Guests must be under 54" tall in bare feet to participate on the attraction.

Guests over 54" must be accompanied by a guest under 54" tall.

Hand held infants are not permitted to participate on elevated activity area or slides

Slides accommodate one single rider at a time

Children’s water participation area.

Rider Criteria: When riding slides, guests must be able to maintain seated postural control and appropriate center of gravity. Guests must have a minimum of three functioning extremities to participate on the slide. Hand held infants may be seated with a supervising companion in the pools, but are not permitted on attractions. Full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to slides requires climbing several steps to reach the top platform.

Lightning Falls

Guests must be under 54" tall in bare feet to ride

Maximum Weight – 230 lb. per rider

This ride accommodates one single rider per tube.

A complex of two separate serpentine slides that twist and turn and drop the rider into a 48 inch deep splash pool.

Rider Criteria: Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to slides requires climbing several steps to reach the top platform.

Patriot’s Plunge

Guests must be under 54" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per tube.

A complex of three separate slides, one being completely dark, that twist and turn and drop the rider into a 42 inch deep splash pool.

Rider Criteria: Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 90 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Lollipop Lagoon

Guests must be under 54" tall in bare feet to participate on the attraction.

Guests over 54" must be accompanied by a guest under 54" tall.

Hand held infants are not permitted to participate on elevated activity area or slides

Slides accommodate one single rider at a time

Children’s water participation area.

Rider Criteria: When riding slides, guests must be able to maintain seated postural control and appropriate center of gravity. Guests must have a minimum of three functioning extremities to participate on the slides. Hand held infants may be seated with a supervising companion in the pools, but are not permitted on attractions. Full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to slides requires climbing several steps to reach the top platform.

Runaway River

Children must be 42" tall in bare feet to ride alone OR be accompanied by a supervising companion.

Children under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

A supervising companion may accompany up to 2 children.

A slow moving, winding river tube ride at a depth of 30 in. The river is approximately 1,600 feet long and passes through tunnels, and water falls.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Hand held infants must be accompanied by a supervising companion. Guests who cannot enter/exit without endangering self or others must be accompanied by a supervising companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 82 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Snake Pit – Python Plummet

Guests must be 48" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per slide.

A complex of three separate slides, one being completely dark, that twist and turn and drop the rider into a 42 inch deep splash pool.

Rider Criteria: Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

Boa Blasters and Constrictor

Guests must be 48" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per tube.

A complex of three separate slides, one being completely dark, that twist and turn and drop the rider into a 42 inch deep splash pool.

Rider Criteria: Riders are required to maintain proper riding position and center of gravity – seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 79 steps with a tube to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Python Plummet
Rider Criteria: Riders are required to maintain the proper riding position — laying feet first with their arms across their chest, ankles crossed and head back against the slide. Riders may not sit up while riding. Guests must have four functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 102 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

NOTE: Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

Speed Slides

Guests must be 48" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

This ride accommodates one single rider per slide.

These are two high speed body slides with sudden drops designed for single riders. Slide ends in a 6" deep runout. Maximum water depth is 6".

Rider Criteria: Riders are required to maintain the proper riding position — laying feet first with their arms across their chest and ankles crossed. Riders may not sit up while riding. Guests must have four functioning extremities. Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the attraction requires climbing 61 steps to reach the loading platform. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Wave Pool

Children less than 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

Children less than 42" tall in bare feet must wear a life jacket and be accompanied by a supervising companion.

A supervising companion may accompany up to 2 guests.

A large wave pool with depths ranging from 0 ft. to 6 ft. Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities. Hand held infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisor team to obtain access to the water wheelchair.

Wildwater Cove

Children less than 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket.

Children less than 42" tall in bare feet must wear a life jacket and be accompanied by a supervising companion.

**ATTRACTIONS**

- **Center Stage**
  Center Stage, located between Burger Barn and the Dominator, is a shaded, outdoor theater with bench seating. Access to the theater can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

- **Planet Snoopy™ Showplace**
  The PEANUTS™ Showplace, located in the heart of Planet Snoopy™, is a small outdoor venue with stadium seating featuring shows for kids. Access to the seating area can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

- **Good Time Theatre**
  The Good Time Theatre, located next to the main entrance, is an indoor air conditioned theatre featuring Cirque Imagine. Access to the theatre is through the main entrance doors on the right side of the building. Doors typically open 15 minutes before show time and close promptly at the start of the show. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance. After the show an Usher will assist you with exiting the theatre.

Dinosaurs Alive is Dorney Park’s unique six-acre, multi-sensory, interactive dinosaur park with over 40 full-sized creations made to replicate nearly every feature of the dinosaurs. Several dinosaurs have interactive consoles which allow guests to guide dinosaur movement so they can see how scientists believe each dinosaur moved its arms, tail, mouth and eyes. There is also an excavation site replica, a kids’ paleontological dig site where visitors can uncover prehistoric fossils, and a dinosaur-themed gift shop.

The Dinosaur Alive entrance and exit is located behind the Dino Store and next to the Steel Force roller coaster entrance. The entire trail is wheelchair accessible. At the excavation site, guests must be able to transfer to ground level on their own or with the assistance of a companion. To facilitate the transfer, a transfer device is available. Please ask a Dino Guide for assistance.

The dinosaur trail is not included with general park admission. The trail hours are posted on the gates at the entrance of Dinosaurs Alive.

**Halloween Haunt at Dorney Park**

This party is a special daytime event that allows for Halloween family-fun in a kid-friendly package. Enjoy all the themed attractions and activities especially designed for kids.

For more information on the event, attractions or services offered visit Ride Services.

Halloween Haunt at Dorney Park has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Our Haunt characters will not touch you; please do not touch them in any manner. Those that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, guests may not wear their own face paint, costumes, or masks. Please adhere to all posted and verbal warnings and directions.

Some guests may prefer to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction entrance.
