Laser Pointers

For safety reasons, laser pointers are not permitted on Knott's Soak City property.

No Firearms

Firearms are not permitted on Knott's Soak City property.

No Recreational Wheels

The use of roller skates, roller blades, scooters, bicycles, tricycles and skate boards is not permitted on Knott's Soak City property.

Line Jumping Policy

Line jumping is not a sporting event at Knott's Soak City. To ensure that all guests are given a fair opportunity to enjoy a ride as quickly as possible, line jumping is not allowed at Knott's Soak City. Line jumping is defined as: cutting in front of other guests already waiting in line; leaving a line, then attempting to re-enter the line at that same point; or saving a place for someone else.

Since this includes using restroom facilities and purchasing food and drink, we suggest you make all stops before you enter the line. Line jumping, regardless of the reason, may lead to dismissal from the park. This rule is strictly enforced. No refund is given.

Nursing Mothers

Knott's Soak City recognizes that mothers have the right to provide natural nutrition to their children. Mothers who prefer a private area for nursing may do so at our First Aid Station.

Camera Policy

Due to the potential for water damage, riders should leave their cameras and other valuable items with a non-rider or in a locker. Use of camera phones or any type of photography or video recording devices is prohibited in any rest room or changing area.

Lost & Found Articles

Secure all loose articles such as glasses, cellular phones, pagers, loose change, cameras, keys, clothing, sunglasses, hats, wallets, etc., before you board a ride. All items found at Knott's Soak City are turned in to our Lost and Found Department at our Guest Services Office located next to the Locker Rental area. Please visit Lost and Found to complete paperwork to ensure the item is returned to you if it's found.

Height Requirements

Supervise children at all times. Your child may be "officially" measured at Guest Services and, if found to meet our height requirements, will be given a wristband to indicate the required height. All height requirements are taken in bare feet.

Height and safety requirements are posted at each attraction entrance area. These and other signs at the attraction contain safety information you should be aware of in order to participate. Height and weight requirements are subject to change. Please refer to the Safety Guide Sign at each attraction entrance for current requirements.

For safety reasons, all attractions have height requirements. These requirements are clearly marked at the entrance to each attraction.

A supervising companion accompanying a child is someone who meets all the requirements to participate on the attractions themselves, is 14 years of age or older, and demonstrates appropriate observed behavior.

Whenever a guest is required to be accompanied by a supervising companion, the person must be able to safely participate on the attractions themselves in addition to assisting the guest; this includes maintaining postural control under the dynamic conditions of the ride.

Life Jackets

A life jacket is required for children who are less than 48" tall in bare feet or is an inexperienced or non-swimmer. Children less than 42" barefoot must wear a life jacket and be accompanied by a supervising companion.

Only US Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one. This policy will be enforced in the following locations: Tidal Wave Bay, Stormwatch, and Sunset River.

Special Services

Listed below are some of the services we offer:

1. A limited supply of wheelchairs is available for rental at WipeOut Surf Shop inside the main gate. However, since wheelchairs are rented on a first-come, first-served basis and cannot be reserved in advance, we urge guests to bring their own wheelchair. An

aquatic wheelchair is available. See Guest Services for availability.

2. Our First Aid station is available from park opening to closing. Refrigeration for medication, with the exception of bee sting anaphylaxis kits, is available at First Aid, and medical equipment can be stored. The First Aid Station is located North of Davy Jones Lockers.
3. Guests requiring handicap parking spaces should utilize the spaces closest to our Main Gate. A permit is required to use these spaces.
4. Guests may recharge their wheelchair battery in the Guest Services office.
5. Wheelchair width stalls are located in all restrooms.
6. Although outside food and beverages are not allowed in the park, individuals who have special need/ diet items due to a medical condition may bring personal size coolers to accommodate such needs. Coolers and contents must be approved prior to entering the park.
7. Service animals are welcome at Knott's Soak City. Service animals must be physically controlled on a leash or harness at all times. Knott's Soak City employees are not permitted to take control of service animals. Guests whose service animals demonstrate aggressive actions toward our guests or employees will be directed to remove the animal from the park. Limit one service animal per guest. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers.

Health Restrictions

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Recent Surgery
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Back Trouble
- Pregnancy

Guests with a history of recent surgery, heart trouble, high blood pressure, neck trouble, back trouble, or

Separated Parties

Meet with the members of your group at specific locations a few times during the day. Remind all members of your group, especially children, to ask a uniformed employee for assistance if a separation occurs.

If you become separated from your group, refer to Guest Services for assistance. Found members of your group who do not meet the description of a supervising adult or responsible person will be supervised at Guest Services until the party can be reunited.

KidTrack

KidTrack is a service to reunite separated children and their parents with cell phones. KidTrack wristbands are available at Guest Services at the Main Gate. Write your 10-digit cell phone number on the wristband and fasten it around your child's wrist. Please explain the reason for the wristband to your child and instruct them to go to the nearest uniformed employee if they become separated. The Knott's Soak City employee who finds your child will activate the KidTrack system. Your cell phone number will be called and you will be told where your child is being safely kept until you are reunited. Please make sure you leave your cell phone on in case you need to be located through the KidTrack System.

Appropriate Attire

Proper swimwear is required. Swimwear is defined as a one or two piece swimsuit. Transparent, thongs, or provocative clothing is not permitted in the park. Pants and/or denim are not permitted on the slides. Knott's Soak City reserves the right to determine the appropriateness of swimwear. If you have any concerns about your dress, please contact Guest Services.

Smoking Policy

For the comfort of all our guests, smoking is permitted in designated smoking areas at Knott's Soak City. Our designated smoking area inside the park is located north of the Long Boards Grill restrooms.

No Alcohol in Lines

Alcoholic beverages are not permitted while in line for a ride or while participating on any of the attractions. Your cooperation is appreciated.

Shorebreak Aqualaunch

5

Maximum Load: 1 person; 300lbs

Shore Break Aqua Launch is a body slide attraction with the ability to carry 1 rider per flume, while not exceeding 300 lbs. The riders will enter into a loading capsule. The floor of the capsule will open, dropping the rider into the flume to experience twists and turns. Rider will end in a runout. Guest must lie feet first on their backs with legs firmly crossed at the ankles and arms folded across the chest. Guests are not able to wear t-shirts. Shorts with metal rivets, zippers or buttons are not allowed. Shorts with metal on the back or sides damage the slides (drain holes with smooth and rounded edges on shorts are acceptable). Capri or full-length pants and footwear, including aqua socks are not permitted. Loose articles are not permitted and must be left with a non-rider or left in a locker. Riding requirements include guests with seated posture control, appropriate center of gravity, two functioning arms, and two functioning legs. No full leg casts or arm casts allowed. The Aqua Launch is prohibited for guests with a history of recent surgery, heart trouble, weak neck or back, or is pregnant. Access to tower requires climbing stairs and the ability to wait in line. Access is ambulatory.

Shorebreak Aquatube

5

Maximum Load: 1 person; 300lbs, 2 persons; 400lbs

Shore Break Aqua Tube is a tube slide attraction with the ability to carry 1 or 2 riders per flume, while not exceeding 300 lbs for a single tube rider or 400 lbs for double tube riders. The riders enter in a loading tub and are dispatched down the attraction. Riders will follow several twists and turns, ending in a 3'5" catch pool. Guest must sit properly in an inner tube. Feet over the edge, bottom in the center hole, and holding onto the handles at all times. Smaller rider in front for double tube. No lap children. All footwear must be removed and eyewear must be removed or secured with strap. Metal ornamentation is not permitted. Riding requirements include guests having a seated posture control, appropriate center of gravity, one functioning arm, one functioning leg, and at least 3 functioning extremities. Must be able to enter/exit ride safely and appropriate observed behavior to ride. No full leg casts or arm casts allowed. Shore Break is prohibited for guests with a history of recent surgery, heart trouble, weak back or neck, or are pregnant. Access to tower requires climbing stairs and the ability to wait in line. Access is ambulatory.

any other condition that may be aggravated by riding, or who are pregnant, should carefully heed all warning signs at each ride entrance. If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guides posted at each ride entrance and exit.

Prosthetic Devices

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on any slide attractions. Guests should visit Guest Services prior to riding to ensure a safe riding experience.

Basic Information

Guests with heart, back or neck problems, or other hidden conditions, as well as pregnant women, or guests who have had recent surgery, should carefully heed all warning signs at each ride entrance. Generally, to ride, guests must have the ability to brace themselves and support their head and neck during the ride movements.

Casts and Braces

Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from all slides. Please consult with the Guest Services Office staff for information. If in doubt about your ability to safely experience a ride, we urge you to consult with a member of our Aquatics Staff.

Definitions

Every ride entrance lists height requirements and special instructions regarding the ride. Knott's Soak City uses the following terms:

Supervising Companion: A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising Companion may accompany up to 2 guests.

Accompanied By: Whenever a guest needs accompaniment, the accompanying person must meet all the ride requirements, as well as assist the guest. This includes helping the guests in the boarding and exiting

of the ride, assisting the guest in maintaining postural control while riding, and assisting the guest down stairs, catwalks, or ladders in case of an evacuation.

Hand-held Infant: A hand-held infant is a child who is unable to walk to the ride unit independently or maintain independent seated postural control.

Functioning Extremity: A functioning extremity is a limb over which a person has control. A prosthetic device is considered a functioning extremity.

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and tube handles, and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Criteria

Knott's Soak City's Guest Assistance Guide is designed to allow our guests to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the Neutral Criteria required to safely ride each particular ride. Each ride was evaluated for the criteria necessary for an individual to ride safely. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Guest Assistance Guide as necessary.

The evaluation of each ride considered the following ten (10) criteria which may be required to ride a particular ride safely:

- 1. Ability to exhibit independent seated postural control under the dynamic conditions of the ride.** *Explanation: The guest must have the body and spinal control to sit upright without the aid of other people or devices and be able to maintain the proper riding posture even during bumping or other characteristic movements of the ride.*
- 2. Appropriate center of gravity.** *Explanation: The guest's body must have the appropriate weight distribution for that ride.*
- 3. Ability to hold on with one functioning arm.** *Explanation: A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and enough strength to allow the guest to maintain the proper riding position throughout the duration of the ride.*

Beach House Structure:

Interactive play structure with various play elements including a giant tipping bucket and sprayers. Access to the tower requires guests to walk up several flights of stairs. Guests must have the ability to enter/exit the ride safely and must have a seated posture control to participate at the attraction. Hand-held infants must be accompanied by a supervising companion and remain on ground level. Guest with a cervical collar or a neck brace must remain on ground level.

The Wedge

Maximum Load: 2 passengers and a Maximum of 6 passengers, not to exceed combined passengers weight of 1000 lbs

The Wedge is a family raft attraction with the ability to carry 2 to 6 riders, while not exceeding 1000 lbs. The riders enter in a loading tub and are dispatched down the attraction. Riders will follow several twists and turns, ending in a 2 foot catch pool. Guests must sit properly in the raft. They must remain seated with their back against the tube, holding handles with both hands. Riding requirements include securing all loose articles. All footwear (except aqua socks), life-jackets, and eyewear must be removed or secured with a strap. Guests must have seated posture control, appropriate center of gravity, one functioning arm, one functioning leg, and at least 3 functioning extremities. No full leg casts or arm casts allowed (casts below elbow permitted). The Wedge is prohibited for guests with a history of recent surgery, heart trouble, weak neck or back, or is pregnant. Access to tower requires climbing stairs and the ability to wait in line. Access is ambulatory.

Tidal Wave Bay

Tidal Wave Bay is a 750,000 gallon wave pool with depths ranging from zero to six feet. Guests with a braced arm cast may not ride with this condition. Participation and water depth may be restricted for guests with a full arm cast or full leg cast. Waves run on a “5 minutes on, 5 minutes off” cycle. Only strong swimmers are recommended in deep water. During wave action cycles, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water. Please note depth markers. A life jacket is required for children who are less than 48 inches tall in bare feet or is an inexperienced or non-swimmer. Children less than 42 inches are required to wear life jackets and be accompanied by an Adult. **Handheld infants must remain with an adult and wearing a life jacket.** Participation and water depth may be restricted if necessary. Riders must have appropriate observed behavior. Must be able to enter/exit ride safely, maintain seated posture control under the dynamic conditions of the ride, or be accompanied by a supervising companion to ride.

Toyota Beach House

Beach House Slides:

Maximum Load: 1 person, 300lbs.

All slides end in a 6 inch run-out and have a height requirement of 42 inches tall in bare feet. Riders are required to maintain the proper riding position- lying down on back or in a seated, feet first position. Riders must have seated posture control, appropriate center of gravity, one functioning arm with sufficient upper extremity to maintain proper riding position, two functioning legs, and two functioning extremities. Riders must be able to enter / exit ride safely and appropriate observed behavior to ride. Required riding position on slides are lying flat on your back with arms crossed over your chest and legs crossed at the ankles, keeping body straight throughout the ride or in a seat position with your knees up and your arms crossed over your chest. Access to the tower requires guests to walk up several flights of stairs.

- 4. Ability to hold on with two functioning arms.**
Explanation: Ability to hold on with two functioning arms as defined above.
- 5. Ability to brace self with one functioning leg.**
Explanation: Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.
- 6. Ability to brace self with two functioning legs.**
Explanation: Guests must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.
- 7. Minimum of two functioning extremities.**
Explanation: Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.
- 8. Minimum of three functioning extremities.**
Explanation: Guests must have a minimum of three functioning extremities (two legs and an arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.
- 9. Ability to enter/exit the attraction within specified parameters without endangering self or others.**
Explanation: Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the exit or having someone aid you in boarding. For the safety of our team members and guests, ride operators are instructed not to perform any lifting of guests, other than in the children’s area. Guests may not be carried to the top of slides. They must be able to climb stairs without assistance.
- 10. Appropriate Observed Behavior.**
Explanation: Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include,

but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

In addition to the basic Neutral Criteria defined above, each ride was evaluated relative to specific temporary conditions which may prevent a guest from safely riding a particular ride. Specific conditions evaluated were:

- Cervical collar or neck brace
- Broken collar bone
- Full arm cast
- Braced arm cast
- Full leg cast
- Bilateral abduction leg casts (brace between legs)
- The suitability of safely carrying hand-held infants

Old Man Falls

Maximum Load: 1 person, 300lbs.

Old Man Falls consists of 3 high-speed body slides with sudden rapid drops ending in a 6 inch run – out. Guests must be 48 inches tall in bare feet to ride. Access to the 63 feet high tower requires guests to walk up several flights of stairs. Riders must have sufficient upper extremities to maintain the proper riding position, seated posture control, appropriate observed behavior, appropriate center of gravity, two functioning arms, two functioning legs and the ability to enter/exit the ride safely. Riders are required to maintain the proper riding position - arms crossed over their chest, legs crossed at ankles, and head and back flat against the slide. Guests wearing swimwear with metal or plastic ornamentation, t-shirts and other loose fitting clothing are not permitted on this attraction.

Sunset River

The Sunset River is 1,780-ft.-long with a depth of 30 inches (2 ft. 6 in). At one-third mile in length, Knott's giant figure-eight waterway is the widest and one of the longest water park lazy rivers in the world! Children under 48 inches bare foot, is inexperienced, or a non-swimmer must wear a life jacket. Children under 42 inches bare foot must be accompanied by a supervising companion to participate. Hand held infants must ride with supervising companion. Riders must have seated postural control, appropriate observed behavior, appropriate center of gravity, and the ability to enter/exit the ride safely. To participate a guest must have at least one functioning arm, one functioning leg, while being accompanied by a Supervising Companion. Alternate access is available at the outside river entrance near the Wedge. A pool lift is available. Guests must be able to transfer to and from the lift on their own or with assistance of a companion. Please contact a lifeguard for assistance on how to operate the lift.

Laguna Storm Watch Tower

5

Maximum Load: 1 person, 300lbs, 2 persons, 400lbs

Laguna Storm Watch Tower consists of 3 high-speed tube slides. All three slides are fully enclosed ending in a 42 inch (3 ft. 6 in) catch pool. Access to the 43 feet high tower requires guests to walk up several flights of stairs. Guests must carry their tube to the top of the tower. Riders are required to maintain the proper riding position - seated in the tube, facing forward, and holding onto the handles; on a two person tube the front rider sits in between the legs of the larger rider. Single or double riders are permitted on this attraction. Guests must be 42 inches in bare feet to participate. Riders under 48 inches must wear a life jacket to participate. Riders must have seated postural control, appropriate observed behavior, appropriate center of gravity, one functioning arm, one functioning leg, three functioning extremities, and the ability to enter/exit the ride safely.

Malibu Run

5

Maximum Load: 1 person, 300lbs

Malibu Runs consists of 4 individual single-person inner-tube slides. Three slides are partially enclosed. All slides are single rider and end in a 42 inch (3 ft. 6 in.) catch pool. Access to the 39 feet high tower requires guests to walk up several flights of stairs. Guests must carry their tube to the top of the tower. Guests must be 48 inches tall in bare feet to participate. Riders must have seated postural control, appropriate observed behavior, appropriate center of gravity, one functioning arm, one functioning leg, three functioning extremities, and the ability to enter/exit the ride safely. Only one rider per tube is allowed.

The following symbols and attraction ratings are used to define our attractions on the following pages.

Ambulatory

Accommodates Wheelchairs

Transferable

Must be at least this height to participate on the attraction

Cannot be any taller than this to participate

Must be accompanied by a supervising companion of proper height to participate.

Lifejacket required

Prohibited for guests with back trouble

Prohibited for guests with heart trouble or high blood pressure

Prohibited for guests with neck trouble

Prohibited for expectant mothers

Prohibited for guests who have had recent surgery

RIDE RATING SYSTEM

A ride rating system has been designed which provides a scale for rating the thrill factor of each attraction. The intent is to provide a scale to guide park guests in determining which attractions to participate on, based on their own experience level, physical condition and abilities.

CATEGORY	DESCRIPTION
Low Thrill Attractions 1	This is a low speed and/or shallow water attraction.
Mild Thrill Attractions 2	This is a low to medium speed attraction and/or water depth 48 inches. Some rider control, maneuvering and/or swimming skills required.
Moderate Thrill Attractions 3	This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Attractions 4	This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents and/or depth of water, some of which is unexpected. This attraction requires rider body control and strong swimming skills.
Aggressive Thrill Attractions 5	This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires rider body control and strong swimming skills.

ATTRACTIONS

Banzai Falls **4**

Maximum Load: 1 person, 300lbs.

Banzai Falls is a six multi-lane speed slides where riders are dispatched head first on a mat from a platform over 41 feet high. Access to the 41 feet high tower requires guests to walk up several flights of stairs. Guest must carry their mat to the top of the tower. Riders are required to maintain the proper riding position - remain lying down on mat and holding onto handles at all times. Riders must have seated postural control, appropriate observed behavior, appropriate center of gravity, two functioning arms, one functioning leg, three functioning extremities and the ability to enter/exit the ride safely. Guests must be 42 inches tall bare foot to participate.

Gremmie Lagoon **1**

Gremmie Slides:

Maximum Load: 1 person, 300lbs.

Guests must have seated posture control, appropriate center of gravity, one functioning arm with sufficient upper extremity to maintain proper riding position, one functioning leg, and at least two functioning xtremities. Guest must be able to enter/exit ride safely and appropriate observed behavior to ride. Riders are required to maintain the proper riding position - laying down on back or in a seated, feet first position. Guests must be under 54 inches bare-foot to participate on Gremmie Slides.

Gremmie Pool:

Offers our smallest thrill seekers their own pint-sized playground of interactive octopus, submarines and other oversized landmarks that squirt, sprinkle, soak and splash kids and parents too! Water depth 1ft. Guests must have seated postural control, appropriate observed behavior, and the ability to enter/exit the ride safely. Hand held infants must be accompanied by a Supervising Companion. Guests over 54 inches should be accompanying guests who are under 54 inches tall.
