Welcome to Knott’s Berry Farm!

We are glad you are here! At Knott’s Berry Farm we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Knott’s Berry Farm’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride.
**RIDE RATING SYSTEM**

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>
## KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

<table>
<thead>
<tr>

</table>
PLEASE PARTICIPATE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON. You may be seriously injured if you enter an unauthorized area.
Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened at all times.
- Keep all parts of your body inside ride unit at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Knott's Berry Farm is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes is only permitted in designated smoking areas.
- You are responsible for your personal property.

**FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.**

**ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES**

Knott’s Berry Farm’s Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Knott’s Berry Farm. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer
to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit or Fast Lane entrance) in order to avoid crowds and waiting in the regular lines. Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit or Fast Lane entrance). Guests can then choose to rest comfortably away from the queue area or visit a shop, see a show or play a game until their boarding time.

Information on where guests access the ride is posted on each Ride’s Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

**Here’s How It Works**

- The guest with a mobility impairment or ASD should visit Guest Services upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.

- In addition to a Boarding Pass, the guests with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.

- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.

- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
• Guests may not accumulate more than one boarding time at a time.
• Boarding Passes are required for Halloween Mazes if the maze has a line.

ADDITIONAL INFORMATION AND SERVICES
Our goal is to make Knott’s Berry Farm as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Assisted Listening Devices
Assisted listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss. These devices are available at the Information Center.

Braille & Large Print Guides
Braille and large print guides of the Park Map and Guest Assistance Guide are available at the Guest Services office. There are a limited number of guides available on a first-come, first-serve basis.

First Aid
Our First Aid Building/Station/Center located next to Guest Services Across from our Ghostrider attraction is staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid.

Interpretive Services
If requested at least one week in advance, Knott’s Berry Farm will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please contact 714-220-5200 or Email info@knotts.com). Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

Parking for Guests with Disabilities
Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification.
Restrooms
Private restroom facilities for guests needing the assistance of another guest are available at the Family restrooms located next to the Stagecoach attraction or at First Aid. Wheelchair accessible stalls are located at all restrooms.

Service Animals
Service animals are welcome at Knott’s Berry Farm. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located next Wheeler Dealer Bumper Cars.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Calico Railroad, Calico Mine Ride, Grand Sierra Railroad, Sky Cabin, Merry-Go-Round (chariot seating), and Stagecoach. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Guest Services for more information.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchair and Stroller Rentals, and ECVs
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at The Stroller Shop. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to www.Knott.com and visit the rentals page under the Tickets tab. Rentals are also available at the park while supplies last. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time.
DEFINITIONS
Every ride entrance lists height requirements and special instructions regarding the ride. Knott’s Berry Farm uses the following terms:

**Supervising Companion:**
Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

**Ability to hold on or brace:**
Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.

**Hand-Held Infants:**
Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a supervising companion: Calico Mine Ride, Calico Railroad, Grand Sierra Scenic Railroad, Sky Cabin, Merry-Go-Round (chariot seating) and Stagecoach.

EVACUATIONS
Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation of if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.
GUESTS OF A LARGER SIZE

All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Ghost Rider, Pony Express, Sierra Sidewinder, Silver Bullet, Montezooma’s Revenge, Jaguar, Sol Spin, La Revolucion, Dragon Swing, Waveswinger, Xcelerator and HangTime.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of: Silver Bullet, Xcelerator and HangTime.

The manufacturer requires a maximum rider height on the following rides: Timberline Twister, Xcelerator The Ride®, HangTime

GUESTS USING WHEELCHAIRS

Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of Calico Railroad, where one wheelchair can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator is available at Silver Bullet and Bear-y Tales to transport a guest in a wheelchair to our 2nd story ride platform. Sierra Sidewinder, Timberline Twister, Montezooma’s Revenge, Dragon Swing, Calico Mine Ride and HangTime have a lift available, please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Knott’s Berry Farm personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted
to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Stroller and Wheelchair rental near the main entrance.

**HEALTH RESTRICTIONS**

Each ride is evaluated against 5 primary health restrictions.

These restrictions are:
- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guides and all warning signs posted at each ride entrance and Alternate Access Entrances.

**HEIGHT REQUIREMENTS**

Height requirements and specific rider instructions are posted at the entrance to each attraction.

All guests must meet all height and weight requirements for each attraction as posted at the attraction entrance. Guests may be measured at each attraction to ensure all requirements are being met prior to boarding an attraction. For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement.

Knott’s Berry Farm reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

**LOOSE ARTICLES**

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Knott’s Berry Farm is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the rider’s body.
For safety reasons, cell phone usage, taking pictures and filming on rides are prohibited.

Glasses must be secured on all rides. On La Revolucion, Sol Spin, Supreme Screamin, Xcelerator and Wipeout glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

**LOST AND FOUND**

All items found at Knott’s Berry Farm are turned in to the Information Center. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Please log onto and complete the form on https://www.knotts.com/help/lost-and-found to ensure the item is returned to you if it is found.

**FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES.** You may be seriously injured if you enter an unauthorized area.

**MAGNETIC FIELDS ON RIDES**

Magnetics are used at the following attractions: Xcelerator The Ride®, Sierra Sidewinder, Coast Rider, HangTime and Pony Express. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

**OXYGEN TANKS**

Due to the dynamic nature of rides, oxygen tanks are not permitted on most attractions. Oxygen tanks are permitted on Calico Railroad, Calico Mine Ride, Merry Go Round (chariot), Grand Sierra Railroad and Sky Cabin. Please consult with a member of management for more information. Oxygen tanks are permitted in all restaurants and shops.

**PHOTOSENSITIVITY/STROBE LIGHTING**

Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Timber Mountain Log Ride, Calico Mine Ride, GhostRider, Bear-y Tales, Xcelerator The Ride®, Silver Bullet, HangTime, Pony Express and Sol Spin.
PREGNANCY

Guests who are pregnant may only ride Calico Railroad, Calico Mine Ride, Merry Go Round (chariot), Grand Sierra Railroad, Surfside Gliders and Sky Cabin.

PROPER ATTIRE

Most rides require proper riding attire including shirts, shorts, and shoes. Shirts, shorts and shoes are required in queues and all park pathways at all times. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Silver Bullet, HangTime, La Revolucion, Sol Spin, WaveSwinger and Supreme Scream.

PROSTHETICS

Guests with any type of prosthesis should not ride Supreme Scream, Xcelerator The Ride®, WaveSwinger, Sol Spin, HangTime or La Revolucion unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Guests should visit Guest Services prior to riding to ensure a safe riding experience.

Leg prosthesis are prohibited on Silver Bullet. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding Silver Bullet.

The manufacturer of Xcelerator The Ride® require that guests with prosthetic devices provide Knott’s Berry Farm with documentation from the provider of their prosthetic device to guarantee that the device has been designed to remain securely in place while exceeding a maximum speed of 120 miles per hour with maximum G forces from -1.5 G’s to 5G’s with a sufficient safety factor for single point failure items.

RIDE DEVICES FOR GUESTS WITH DISABILITIES

Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following ride is equipped with a transfer device: Coast Rider.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Silver Bullet.
In addition, specific ride vehicles are equipped with removable sides at Bear-y Tales. These vehicles may further assist guests in transferring from their wheelchair to the ride unit. Please inform an associate at the ride if you wish to use that vehicle. Please see an associate at each ride or Guest Services for assistance.

**RIDER CRITERIA**

Knott’s Berry Farm Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Ride Admission Policy as necessary.

**Ability to exhibit independent seated postural control under the dynamic conditions of the ride.**

The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider’s thighs.

**Appropriate center of gravity.**

The rider’s body must have the appropriate weight distribution for that ride.

**Ability to hold on with one functioning arm.**

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

**Ability to hold on with two functioning arms.**

Ability to hold on with two functioning arms as defined in ability to hold on with one functioning arm.

**Ability to brace self with one functioning leg.**

Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.
Ability to brace self with two functioning legs.

Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

Minimum of two functioning extremities.

Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Riders must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

Ability to enter/exit ride within specified parameters without endangering self or others.

Riders must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid you in boarding. For the safety of our associates and riders, ride operators are instructed not to perform any lifting of riders.

Appropriate observed behavior:

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior to and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided
Casts & Braces

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides. We suggest you delay your visit until the cast is removed.

The following chart displays the cast and braces rules for all rides and attractions:

<table>
<thead>
<tr>
<th>Rides</th>
<th>Cervical Collar or Neck Brace</th>
<th>Broken Collar Bone</th>
<th>Forearm Cast</th>
<th>Full Arm Cast</th>
<th>Braced Arm Cast</th>

**ACCESS SYMBOLS**

Symbols indicate boarding procedures for each ride and are defined below.

abler This symbol is used to identify rides where guests may remain in their wheelchair. Calico Railroad may accommodate one wheelchair at a time.

abler This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

abler This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

**RIDES**

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.

Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.
Balloon Race

Guests must be 36” tall to ride alone or accompanied by a supervising companion. Hand-held infants are not permitted. This ride only accommodates one adult per balloon.

A hot air balloon ride that spins and raises riders in the air.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Bear-y Tales: Return to the Fair

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants not permitted.

A family themed interactive dark ride.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who do not have independent seated postural control, an appropriate center of gravity, ability to enter/exit safely, or appropriate observed behavior must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.
Butterfield Stagecoach

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Guests less than 46” tall must sit in the center of the bench.

You can take a ride on one of six stagecoaches, five of which are authentic, and used in the 1800s. The trail travels around Fiesta Village and Camp Snoopy™.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis, on the top of the stagecoach. A door encapsulates the stagecoach to secure riders.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the unit.

Calico Mine Ride

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Guests less than 46” tall must sit in the center of the bench.

Riders board an antique train ride that offers a view of the mining process as it was done in the early 1900s.

Restraint System: A door encapsulates the mine car to secure riders.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guests who do not have seated postural control or cannot demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion. Service animals are permitted to ride.
Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Guests less than 46” tall must sit in the center of the bench.

Riders board an antique train ride that offers a round trip through the park.

**Rider Criteria:** Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. This attraction is wheelchair accessible. Services animals are permitted to ride this attraction.

---

**Calico River Rapids**

Guests must be 46” tall to ride.

A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

**CAUTION:** Boats may bump into the side of channel and other boats.

**NOTE:** Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the
raft with riders. These items will get wet. Please consider leaving loose articles with a non-rider.

**Camp Bus**

*Residents must be 36” tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.*

**Maximum Weight** - 440 lb, per row.

This ride only accommodates one adult per row.

Bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counterclockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Charlie Brown’s Kite Flyer**

*Residents must be 36” tall to ride alone or accompanied by a supervising companion. Hand-held infants are not permitted.*

**Maximum Weight** - 275 lb, per swing.

This ride only accommodates one adult per swing.

Chair swing children’s ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** A shared lap bar and a between-the-legs safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the
guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

### Coast Rider
![Coast Rider Icon]

Guests must be 54” tall to ride alone or 44” and accompanied by a supervising companion.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

**Restraint System:** An individual lap bar secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

### Dragon Swing
![Dragon Swing Icon]

Guests must be 48” tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.

**Maximum Weight** – 680 lb. per row.

A swinging boat ride that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. Smaller riders must sit towards the middle of the row.
Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg cast must fit safely in the ride unit in order to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Flying Ace 2

Guests must be between 32” and 54” tall to ride.

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

GhostRider 5

Guests must be 48” tall to ride.

A high speed wooden roller coaster with high speed airtime humps, quick turns and enclosed tunnels.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.
Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

WARNING: This ride contains strobe lighting.

Grand Sierra Railroad

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Guests less than 46” tall must sit in the center of the bench.

Miniature replica of a steam engine locomotive that tours you around Reflection Lake.

Restraint System: A safety chain encapsulates the ride unit to secure guests.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a supervising companion.

Rider Access: Alternate access is available at the attraction exit. This attraction is not wheelchair accessible. Service animals are permitted to ride this attraction.

HangTime

Guests must be 48” tall and less than 77” tall to ride.

A high-speed dive roller coaster, which turns riders upside down multiple times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must be able to hold on with one functioning arm. Guests must have sufficient lower extremities in order for the ride restraint system to adequately restrain them. Amputations must be below the knee and the rider has to have a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the attraction exit. Guests will have to take several steps, on their own or with the assistance of a companion.
**Hat Dance**

Guests must be 42” tall to ride alone OR 36” and accompanied by a supervising companion.

**Maximum Weight** - 550 lb. per unit.

A circular spinning ride where guests can control the speed of the spin by turning the wheel in the center of the hat.

**Restraint System:** A locked door encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

---

**High Sierra Ferris Wheel**

Guests must be 54” tall to ride alone OR 36” tall and accompanied by a supervising companion. Hand-held infants are not permitted.

**Maximum Weight** - 450 lb. per car

This ride only accommodates two adults per gondola.

A miniature ferris wheel ride where guests ride in benches suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one must be a functioning leg. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.
Guests must be under 52” tall to ride. Hand-held infants are not permitted.

Miniature carts propelled around the track by the guest.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

---

**Jaguar!**

Guests must be 48” tall to ride.

The Jaguar is a family high speed roller coaster where riders will experience rapid movements from side-to-side.

**Restraint System:** An individual lap bar and shared seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the attraction exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit.
La Revolucion

Guests must be 48” tall to ride.

Maximum Weight - 680 lb. per gondola.

This ride only accommodates three adults per gondola.

A thrill ride that swings to the height of 65 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each guest over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Linus Launcher

Guests must be 42” tall to ride OR 36” tall and accompanied by a supervising companion.

Maximum Weight - 275 lb. per unit.

This ride only accommodates one adult per vehicle.

A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** A cage secures riders across the back, shoulders and pelvis.
Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Merry-Go-Round

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand-held infants must ride in a chariot.

A carousel ride which features various circus animals - both stationary and moving up and down - and chariot seating mounted on a circular platform that rotates.

Restraint System: An individual seatbelt secures each guest around the waist on each animal. Guests on the lower platform and any guests under the age of 12 are required to wear a seatbelt. Guests under 46” must be seated in a chariot or ride on the middle row of animals and be held by a supervising companion who is standing on the platform between the animals. Only one rider per animal.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior must ride in a chariot with a supervising companion. Guests with a full leg cast must be seated in a chariot.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to ride on the ride platform or chariots.
Montezooma’s Revenge

Guests must be 48” tall to ride.

Montezooma’s Revenge is an exciting ride that catapults passengers out of the station at 55 miles per hour, up through a 76 foot, 360 degree loop and then to the top of a 418 foot tower.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Rider Access: Alternate access is available at the attraction exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion.

Pacific Scrambler

Guests must be 48” tall to ride alone or 36” and accompanied by a supervising companion.

Maximum Weight - 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with
the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Pigpen's Mud Buggies

Guests must be 36” tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight - 382 lb. per car.

This ride only accommodates one adult per car.

Vehicles that jump up and down while rotating around a circular track.

Restrainment System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Pony Express

Guests must be 48” tall to ride.

A roller coaster where riders sit astride a horse while being launched out of the station reaching up to 38 miles per hour in 3 seconds. Riders will experience changes in speed and direction and rapid movements from side-to-side.

Restrainment System: An individual back bar and leg bars will secure each rider on their back and along their legs. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with
the assistance of a companion, and be capable of elevating themselves up into an elevated seat.

**WARNING:** This ride contains strobe lighting.

**Rapid River Run**

Guests must be 42" tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.

*Maximum of 1 adult per row.*

This spinning tugboat ride which travels back and forth over an upward, curved track.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Rocky Mountain Trucking Co.**

Guests must be 36" tall or accompanied by a supervising companion. Hand-held infants are not permitted.

*Maximum Weight – 440 lb. per car.*

The adult must sit in the back seat.

This ride is a miniature truck ride that follows an electric track in a "train-like" fashion.

**Restraint System:** A shared seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar or neck brace are not permitted to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.
Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Sierra Sidewinder

Guests must be 48” tall to ride alone or 42” tall accompanied by a supervising companion. The manufacturer of this ride requires the Supervising Companion to be at least 54” tall.

Four seat roller coaster cars that traverse a steel track while rotating freely 360 degrees.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Silver Bullet

Guests must be 54” tall to ride.

A high-speed, inverted looping roller coaster which turns riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance, which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. One functioning arm that includes a hand is required to ride. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture.
under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**WARNING:** This ride contains strobe lighting.

**Sky Cabin 2**

Guests must be 46" tall to ride alone or accompanied by a supervising companion. Guests less than 46" tall must sit in the center of the bench.

An air-conditioned, enclosed cabin which rotates while at the top, 180 feet in the air.

**Rider Criteria:** Guest who do not have seated postural control or do not demonstrate appropriate observed behavior must be accompanied by supervising companion

**Rider Access:** Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Service animals are permitted to ride.
Sol Spin

Guests must be 54" tall to ride.

Sol Spin is a high speed spinning ride that rotates the riders in three directions simultaneously.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.

Supreme Scream

Guests must be 52" tall to ride.

A tower ride with a chair lift-type seat where riders are shot down at high speeds. Guests will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guest must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone,
full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

**Surfside Gliders**

*Guests must be 44” tall to ride alone OR 36” and accompanied by a supervising companion.*

*Maximum Weight – 340 lb. per car*

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

**Timber Mountain Log Ride**

*Guests must be 46” tall to ride alone OR 36” tall accompanied by a supervising companion.*

This is a water flume ride; riders may get wet. Guests will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.
Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

WARNING: Logs may bump into the side of channel and other logs.

WARNING: This ride contains strobe lighting.

Waveswinger

Guests must be 48” tall to ride.

Maximum Weight - 230 lb. per seat.

Riders must be at least 6 years old

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual bar and a between-the-legs safety belt secures each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the attraction exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.
Wheeler Dealer Bumper Cars

Guests must be 48” tall to ride alone OR 42” and accompanied by a supervising companion.

A bumper car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. An individual shoulder strap is positioned across the chest and under the arm of each rider under 48”.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** Avoid head-on collisions.

Wipeout

Guests must be 48” tall to ride.

**Maximum Weight - 384 lb. per row**

A circular ride that rises to a tilted position while rotating creating a wave motion.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:**

Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.
Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**Woodstock’s Airmail**

Guests must be 36” tall to ride.

Maximum Weight – 300 lb. per seat.

This ride only accommodates two adults per ride.

This children’s ride hoists riders up in the air and provides a gentle yet bouncy trip down.

RestRAINT System: A shared lap bar is positioned above the laps of all riders in the row. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42” tall to ride or be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**Timberline Twister**

Guests must be between 36” and 69” tall to ride.

A junior steel rollercoaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

RestRAINT System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.
Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Xcelerator

Guests must be between 52” and 78” tall to ride.

A high speed roller coaster that will accelerate you from 0 to 82 miles per hour in 2.3 seconds. Riders will experience weightlessness, strong positive forces, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage. Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during the ride.
WARNING
Many attractions at Knott’s Berry Farm are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to participate, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available Guest Services. Participate responsibly. You should be in good health to participate safely. You know your physical conditions and limitations, Knott’s Berry Farm does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE!
