

## **2020 GUEST ASSISTANCE GUIDE**

### **Welcome to Valleyfair!**

We are glad you are here! At Valleyfair we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this guide, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, guests who have had recent surgery, or guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Valleyfair's Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.

## VALLEYFAIR RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

**Each ride/attraction is placed into one of five categories:**

CATEGORY		DESCRIPTION
<b>Low Thrill Rides</b>		Rides that are generally calm and gentle in nature.
<b>Mild Thrill Rides</b>		Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
<b>Moderate Thrill Rides</b>		Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
<b>High Thrill Rides</b>		Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
<b>Aggressive Thrill Rides</b>		Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

## KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates Wheelchair
	Transferable
	Must be accompanied by supervising companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum Speed of Ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum Height of Ride
	Maximum Water Depth
	Prohibited for guests with back trouble
	Prohibited for guests who have had recent surgery
	Prohibited for guests with neck trouble
	Prohibited for pregnant guests
	Prohibited for guests with heart trouble or high blood pressure

## PLEASE RIDE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

### Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seat belts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Valleyfair is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

## ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES

Valleyfair's Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Valleyfair. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person's size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride's exit or Fast Lane entrance) in order to avoid crowds and waiting in the regular lines. Guests who are in possession of a Boarding Pass will obtain a boarding or "ride" time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride's exit or Fast Lane entrance). Guests can then choose to rest comfortably away from the queue area or visit a shop, see a show or play a game until their boarding time.

Information on where guests access the ride is posted on each ride's Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

### Here's How It Works

- The guest with a mobility impairment or ASD should visit Guest Services upon his/her arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.
- In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a Rider Access Form that lists the rides that the guest with a disability can safely enjoy.
- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.
- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
- Guests may not accumulate more than one boarding time at a time.

- Due to the nature of the attractions in Soak City, Alternate Access and Boarding Passes are only available at Ripple Rapids via the exit. Boarding Passes, however, are required for Halloween Haunt mazes if the maze has a line.

## ADDITIONAL SERVICES

Our goal is to make Valleyfair as enjoyable and barrier free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

### Assistive Listening Devices

Assistive listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for guests with mild to moderate hearing loss. To use the system obtain a receiver at Guest Services.

### Braille & Large Print Guides

Braille and large print guides of the Park Map and Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-served basis.

### Family Care Center

A building for parents to feed young children is located in Planet Snoopy.

### First Aid Station

Our First Aid Building located behind Cool and Creamy is staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid. In addition, a First Aid Station is located in Soak City near Breakers Bay. This location is open during Soak City operating hours.

### Interpretive Services

If requested at least one week in advance, Valleyfair will provide American Sign Language Interpretation at live show venues. To arrange for sign language interpreting services, please contact 952-445-7600, ext. 2. Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

### Parking for Guests with Disabilities

Parking for guests with disabilities is provided in the parking lot near the front gate. Proper vehicle identification must be displayed. Security officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification

### Quiet Room

Valleyfair offers a Quiet Room located in the room next to Guest Services, for family members or caregivers to take a break and reduce sensory stimulation. Additionally there are sensory features provided for guest use.

### Restrooms

Private restroom facilities for guests needing the assistance of another guest are available at the Front Gate Restroom, Picnic Point Restroom, Monster Restroom, Family Care Center, Stadium Grille Restroom, and Soak City. Wheelchair accessible stalls are located at all main restroom facilities.

### Service Animals

Service animals are welcome at Valleyfair. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located next to Cosmic Coaster.

Service Animals to Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Carousel and Minnesota River Valley Railroad. Service animals may also accompany a guest when participating in PEANUTS™ Playhouse. Guests may take advantage of our Parent Swap program for staying with the service animal.

### Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special need/diet items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

### Wheelchair, Stroller, and ECV Rental

A limited supply of wheelchairs, electronic convenience vehicles (ECV), and strollers are available for rent at Stroller and Wheelchair Rental, just inside the front gate. Online reservations are also available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to [Valleyfair.com/tickets-passes/rentals](http://Valleyfair.com/tickets-passes/rentals). For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Park wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services prior to entering the park.

## DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Valleyfair uses the following terms:

**Supervising Companion:** Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

**Ability to hold on or brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace and maintain a seated position during the forces of the ride.

**Hand-held infant:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a supervising companion:

- Carousel – must ride in chariot.
- Minnesota River Valley Railroad – must be seated in the center of the bench.
- Barefoot Beach (Non-Elevated Areas)
- Breakers Bay – must stay in 2 feet of water or less.
- Ripple Rapids – must be in the lap of the supervising companion.
- Splash Station

## EVACUATIONS

Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions. In Soak City, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to

evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

## GUESTS OF A LARGER SIZE

All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on Corkscrew, Charlie Brown's Wind Up, Delirious, Excalibur, High Roller, Kite Eating Tree, Linus Launcher, Monster, Northern Lights, PEANUTS™ 500, Power Tower, Renegade, Steel Venom, SuperCat, Tilter, The Wave, Wheel of Fortune, Wild Thing, and Xtreme Swing.

Maximum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance of: Steel Venom and Xtreme Swing.

The manufacturer requires a maximum height on the following rides: Sally's Swing Set 73" and Steel Venom 78".

## GUESTS USING WHEELCHAIRS

Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Minnesota River Valley Railroad, where 1 wheelchair can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A wheelchair lift is available at Corkscrew to transport a guest in a wheelchair and one companion to our 2nd story ride platform. Please use the doorbell/phone at base of lift to request service. A standard elevator is available for self-service at Snoopy's™ Rocket Express and PEANUTS™ Playhouse. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Valleyfair personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Stroller and Wheelchair Rental by Sweet!

## HEALTH RESTRICTIONS

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Recent Surgery
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Back Trouble
- Pregnancy

If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guides and all warning signs posted at each ride entrance and Alternate Access Entrances.

## HEIGHT REQUIREMENTS

Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be "officially" measured at Guest Services or at any ride of the appropriate height level. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child's height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement. Valleyfair reserves the right to ask that shoes be removed to ensure that a child's height is not being artificially enhanced or manipulated.

In Soak City, height measurements are taken in bare feet. (There is a separate height wristband system for Soak City).

## LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Valleyfair is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the rider's body.

For safety reasons, cell phone usage, taking pictures and filming on rides is prohibited.

Glasses must be secured on all rides. On Delirious, North Star, Power Tower, RipCord, Steel Venom, Xtreme Swing and designated waterpark attractions glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

## LOST & FOUND

All items found at Valleyfair are turned in to Guest Services. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Please visit [valleyfair.com/lostandfound](http://valleyfair.com/lostandfound) to complete an online form to ensure your item is returned to you, if found.

**FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.**

## MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: Renegade and Steel Venom. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.

## OXYGEN TANKS

Due to the dynamic natures of rides, oxygen tanks are not permitted on most attractions. Please consult with Guest Services to speak with a member of management to discuss available rides. Oxygen tanks are permitted in all restaurants, shops and entertainment venues.

## PHOTOSENSITIVITY / STROBE LIGHTING

Many attractions utilize special effects, including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Renegade & Wild Thing.

## PREGNANCY

Guests who are pregnant may only ride the Carousel, Ferris Wheel, Flying Eagles, Minnesota River Valley Railroad and participate in Barefoot Beach, Breakers Bay, Ripple Rapids, and Splash Station.

## PROPER ATTIRE

Most rides require proper riding attire including shirts, shorts, and shoes. Shirts, shorts, and shoes are required in all park pathways. Swimwear is not permitted on rides outside of Soak City. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, Bumper Cars, Delirious, Linus' Beetle Bugs, Northern Lights, Peanuts 500, SuperCat, and The Wave scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Charlie Brown's Wind-Up, North Star, Power Tower, Steel Venom, and Xtreme Swing.

Appropriate swimwear is required. Thongs or transparent clothing are not permitted.

## PROSTHETICS

Guests with any type of prosthesis should not ride Charlie Brown's Wind-Up, Power Tower, or Xtreme Swing unless they can ensure the device is properly secured and will remain in place during the ride. Additionally, prosthetic devices with exposed metal parts are not permitted on most Soak City attractions. Guests should visit Guest Services prior to riding to ensure a safe riding experience.

The manufacturers of Delirious and North Star prohibit guests with any prosthetic device from riding. The manufacturer of Xtreme Swing also prohibits guests with any leg prosthetic devices at or above the knee from riding. The manufacturer of Steel Venom requires documentation from the prosthetic manufacturer stating the device will remain attached during the ride.

Guests with prosthetics enjoying their day at Soak City should consult with a member of our Aquatics Supervisory team.

## **RIDE DEVICES FOR GUESTS WITH DISABILITIES**

Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Corkscrew, Cosmic Coaster, Excalibur, Renegade, Snoopy's Rocket Express, and Wild Thing. Please see an associate at each ride for assistance.

## **RIDER CRITERIA**

Valleyfair's Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our parks as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Ride Admission Policy as necessary.

### **Ability to exhibit independent seated postural control under the dynamic conditions of the ride**

*The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the guest's thighs.*

### **Appropriate center of gravity**

*The rider's body must have the appropriate weight distribution for that ride.*

**Ability to hold on with one functioning arm.** *A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and enough strength to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secure under the dynamic conditions of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.*

### **Ability to hold on with two functioning arms**

*Ability to hold on with two functioning arms as defined in Ability to hold on with one functioning arm.*

### **Ability to brace self with one functioning leg**

*Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secure under the dynamic conditions of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.*

### **Ability to brace self with two functioning legs**

*Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis (see page 8 for Prosthetic Devices) that can be used for bracing.*

### **Minimum of two functioning extremities**

*Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.*

### **Minimum of three functioning extremities**

*Riders must have a minimum of three functioning extremities (two legs and an arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.*

### **Ability to enter/exit the attraction within specified parameters without endangering self or others**

*Riders must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance (the exit or Fast Lane entrance) or having someone aid you in boarding. For the safety of our associates and riders, ride operators are instructed not to perform any lifting of riders.*

### **Appropriate observed behavior**

Riders have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior to and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

## CASTS AND BRACES

Riders with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on slides in Soak City.

The following chart displays the cast and brace rules for all rides and attractions.

**Y** May ride with this condition

**C** Must ride in chariot

**Z** Must stay in 2 feet of water or less

## ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where guests may remain in their wheelchair.

This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

## RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

### Antique Autos

Guests must be 48" tall to ride alone OR be accompanied by a supervising companion. Guests must be 48" tall to drive. Hand-held infants are not permitted.

This is an antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who are not able to steer and depress the accelerator must have a supervising companion accompany them to drive. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Guests with a visual impairment must ride with a supervising companion who meets the requirements to drive.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car.

**Note:** Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

### Bumper Cars

Guests must be 54" tall to ride alone OR 48" tall and accompanied by a supervising companion. Guests under 7 years old must be accompanied by a supervising companion. Guests must be 54" tall to drive.

A bumper car ride where guests drive cars designed for bumping into each other. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

**Restraint System:** An individual shoulder strap is positioned across the chest and under the arm of each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** Avoid head-on collisions.

### Carousel

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants must ride in a chariot.

A carousel ride which features horses, both stationary and moving up and down, and chariot seating mounted on a circular platform that rotates.

**Restraint System:** Children under 46" must be seated in a chariot or on the middle row of horses and be held by a supervising companion who is standing on the platform between horses. One rider per animal.

**Rider Criteria:** Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior must ride in a chariot with a supervising companion. Guests with a full leg cast must be seated in a chariot.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to ride on the ride platform or chariots.

## Corkscrew 5

*Guests must be 48" tall to ride.*

A high-speed, looping roller coaster which turns riders upside down three times. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the entrance to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

## Delirious 4

*Guests must be 48" tall to ride.*

This ride has a compact roller coaster train on a circular track that is positioned vertically. The ride moves in a pendulum style resulting in up to 10 upside down loops.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have two functioning arms and two functioning legs. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Casts are not permitted on this ride. Prosthetics are not permitted on the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Note:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

## Excalibur 4

*Guests must be 48" tall to ride.*

A wood and steel roller coaster. Riders will experience rapid changes in direction.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

## Ferris Wheel 2

Guests must be 48" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants OR single riders are not permitted.

Maximum Weight - 1,050 lb. per gondola.

A Ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control or demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

## Flying Eagles 3

Guests must be 44" tall to ride alone OR 36" and accompanied by a supervising companion.  
Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, riders use a fin on the front of the car to steer the car higher or lower. A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Restraint System:** A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

## High Roller 4

Guests must be 48" tall to ride.

A traditional out and back wooden rollercoaster with airtime humps.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

## Mad Mouse 4

Guests must be 48" tall to ride alone OR 44" tall and accompanied by a supervising companion.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side to side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or

below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available through the Fast Lane gate to the left of the entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

## Minnesota River Valley Railroad 1

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion. Guests less than 46" tall must sit in the center of the bench.

Riders board an antique train ride that offers a round trip through the park with stops at two stations (at the front of the park and in Planet Snoopy.)

**Restraint System:** Smaller riders must sit towards the middle of the row.

**Rider Criteria:** Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a supervising companion.

**Rider Access:** Alternate access for both entrances is through the ride entrance. This attraction is wheelchair accessible. Service animals are permitted to ride this attraction.

## Monster 3

Guests must be 46" tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted. Maximum Weight – 400 lb. per car

This is a circular ride with six sweeps of gondolas moving clockwise versus the up and down counter-clockwise rotation of the arms. Riders will experience changes in speed, direction and elevation, and rapid movements from side-to-side.

**Restraint System:** An enclosed ride unit encapsulates the ride unit to secure the riders. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace,

broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

## North Star 4

Guests must be 44" tall to ride.

A chair swing thrill ride with free hanging seats suspended from an elevated and rotating gondola. Riders will rotate in a circular motion as the gondola ascends and descends the tower.

**Restraint System:** An individual lap bar and a between-the-leg safety belt secures each rider. An additional individual seatbelt is positioned across the chest and under the arm of each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have two functioning arms and two functioning legs. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Casts are not permitted on this ride. Prosthetics are not permitted on the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

**Note:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

## Northern Lights 4

Guests must be 48" tall to ride alone OR 42" tall and accompanied by a supervising companion.

A family thrill ride where a 36 passenger gondola spins as it travels on a track. Riders will experience weightlessness, rapid movements from side to side, and rapidly changing forces and directions.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the

ride unit. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Arm casts must not be positioned next to another rider.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row.

## Power Tower

*Guests must be 48" tall to ride.*

A tower ride with a chair lift-type seat where riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Note:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

## Renegade

*Guests must be 48" tall to ride.*

A high speed wooden roller coaster with high speed airtime humps, quick turns and enclosed tunnels.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

**WARNING:** This ride contains strobe lighting and utilizes magnetic systems during the ride.

## RipCord

*Guests must be 42" tall to ride.*

*Maximum Weight – 850 lb. per flight.*

This ride is a high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted 180 feet into the air. They control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds up to 60-80 miles per hour.

**Restraint System:** Riders wear a full body harness that supports the rider in a prone position. The harness is connected to the flight support cables.

**Rider Criteria:** Guests are required to have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is necessary that the rider possesses two arms sufficient for proper functioning of the flight suit be maintained. Lower extremities must be of sufficient enough length to be contained and restrained by a leg strap. Proper functioning of the flight suit must be maintained for riders without appropriate center of gravity. Guests with cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate Access available via the ride entrance. Riders must be able to walk independently or be assisted by a member of their party.

**Note:** This is an extra charge attraction. Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

### Scrambler

Guests must be 48" tall to ride alone OR 36" tall and accompanied by a supervising companion. Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

### Steel Venom

Guests must be between 52" and 78" tall to ride.

An impulse roller coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

**Restraint System:** A shoulder harness with safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests

of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride utilizes magnetic systems during the ride.

### SuperCat

Guests must be 52" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

This is a circular ride that follows an undulating course.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

## The Wave 4

Guests must be 46" tall to ride.  
Maximum Weight – 3,400 lb. per boat.

Water flume ride with 20-passenger boats. You will get wet.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available through the walkway directly to the left of the entrance through the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Watch your step, as the ride unit and ride exit may be slippery and wet.

**Note:** This ride may close if the temperature is below 65°F.

**WARNING:** Boats may bump into the side of channel and other boats.

## Thunder Canyon 4

Guests must be 46" tall to ride.

This is a water shoot-the-chutes ride; riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar

bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Watch your step, as the ride unit may be slippery and wet.

**Note:** This ride may close if the temperature is below 65°F.

**WARNING:** Boats may bump into the side of channel and other boats.

## Tilter 3

Guests must be 46" tall to ride alone OR be accompanied by a supervising companion.

Hand-held infants are not permitted. Guests less than 6 years old must be accompanied by a supervising companion.  
Maximum Weight – 800 lb. per car.

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

## Wheel of Fortune 3

Guests must be 48" tall to ride alone OR 42" tall and accompanied by a supervising companion. Maximum Weight – 340 lb. per seat

This is a circular ride that rises to a tilted position while rotating backward producing changes of force and direction rapidly.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. Guests who do not take up half of the seat will be paired with other riders. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride, amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

## Wild Thing® 5

Guests must be 48" tall to ride.

An out and back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar

bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

## Xtreme Swing 5

Guests must be 48" tall to ride.

Guests swing in an arc back and forth as if on a playground swing. The ride swings 115 degrees in each direction.

**Restraint System:** An individual lap bar with safety belt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with any leg prosthesis should consult Guest Services prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Note:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

## PLANET SNOOPY™

### Charlie Brown's Wind-Up 3

Guests must be 48" tall to ride.

Maximum Weight – 340 lb. per sweep.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** An individual lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

### Cosmic Coaster 3

Guests must be 42" tall to ride alone OR accompanied by a supervising companion. Hand-held infants are not permitted.

A self-propelled roller coaster that follows a twisted pattern.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the

guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

### Flying Ace Balloon Race 2

Guests must be 48" tall to ride alone or be accompanied by a supervising companion. Hand-held infants are not permitted.

Hot air balloon ride that spins and raises riders in the air.

**Restraint System:** A shared seat belt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

### Kite Eating Tree 2

Guests must be 36" tall to ride and under 54" or be accompanied by a child. Maximum Weight – 700 lb. per ride. This ride only accommodates one adult per ride.

This children's ride hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three

functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42" tall to ride or be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

### Linus' Beetle Bugs 1

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

This is a slow moving themed children's circular ride with an undulating platform.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

### Linus Launcher 3

Guests must be 42" tall to ride alone OR 36" tall and accompanied by a supervising companion. Maximum Weight – 275 lb. per unit. This ride only accommodates one adult per vehicle

A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** A cage secures each rider over the

back. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

### Lucy's Tug Boat 2

Guests must be 42" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. This ride only accommodates two adults per row.

This spinning tugboat ride which travels back and forth over an upward curved track.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

### PEANUTS™ 500 2

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

This children's ride allows guests to ride in their own car that whips around an oblong track.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

## PEANUTS™ Playhouse 1

Guests must be 36" tall to participate alone OR be accompanied by a supervising companion. Guests over 60" tall must be accompanied by a guest under 60" tall to participate. Hand-held infants are not permitted.

An interactive play element for children. There are cannons and gadgets, which utilize foam balls that can be shot and vacuumed up. You will get hit by foam balls.

**Rider Criteria:** Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

**Rider Access:** Alternate access is via the ride entrance. This attraction is wheelchair accessible. Service animals may accompany guests when participating in this attraction. Service animals may accompany guests when participating in this attraction.

## PEANUTS™ Road Rally 1

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 440 lb. per truck. This ride only accommodates one adult per truck. The adult must sit in the back seat.

This ride is a miniature truck ride that follows an electric track in a train-like fashion.

**Restraint System:** A shared seatbelt secures each rider across the thighs and pelvis in the back row. A door encloses the ride unit in the front row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

## Sally's Swing Set 2

Guests must be between 36" and 73" tall to ride. Maximum Weight - 1,540 lb. per ride. This ride only accommodates two adults per row

A large swing ride designed for children that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A between-the-legs safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

## Snoopy's™ Deep Sea Divers 2

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 440 lb. per row. This ride only accommodates sixteen adults per ride.

Submarine with six rows that seats four guests per row. The submarine rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion. Supervising companions must be seated in the outermost seats of a row.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

## Snoopy's™ Junction 1

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A slow moving children's train ride that takes guests along a winding track.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. A chain further encloses each ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

## Snoopy™ vs. Red Baron™ 2

Guests must be between 36" and 54" tall to ride.

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

## Snoopy's™ Rocket Express 2

Guests must be 42" tall to ride alone OR be accompanied by a supervising companion. Maximum weight – 780 lb. per car. This ride only accommodates two adults per car

Rockets that follow an elevated electric track through the Planet Snoopy area of the park.

**Restraint System:** A shared seatbelt secures all riders in the row in across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Braced arm casts or full leg casts must fit safely in the ride unit.

**Rider Access:** Alternate access is to the left of the entrance via a lift to the loading platform. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. A wheelchair lift is available to transport guests to and from the ride platform. Please use the call button at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

## Woodstock Whirlybirds 2

Guests must be 36" tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 550 lb. per car.

This is a family ride that travels a circular path while individual seats rotate on an axis.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

# H A L L O W E E N HAUNT®

Theatrical fog effects, areas of low lighting, loud music and sound effects and strobe lighting are used throughout the park during the Haunt—including on the walkways, outdoor scare zones, indoor mazes, live entertainment venues and children’s attractions.

Guests with respiratory sensitivities, history of seizures or epilepsy or sensitivity to loud music and sound effects are advised not to participate in these attractions.

Please adhere to all posted verbal warnings and directions. Characters in our Haunt attractions will not touch you; please do not touch them in any manner. Guests who do so will be removed from the park without refund. Rowdy behavior and profanity are also cause for removal from the park.

Alternate Access is available via the Fright Lane entrance.

## SOAK CITY WATERPARK

CATEGORY	DESCRIPTION
<b>Low Thrill Rides</b>	 Rides that are generally calm and gentle in nature.
<b>Mild Thrill Rides</b>	 Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
<b>Moderate Thrill Rides</b>	 Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
<b>High Thrill Rides</b>	 Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
<b>Aggressive Thrill Rides</b>	 Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

## APPROPRIATE ATTIRE

Appropriate swimwear is required. Thongs or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. There can be no sharp objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

## LIFE JACKETS

Life jackets are required for children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42" tall must wear life jackets and be accompanied by a supervising companion. This policy will be enforced at: Breakers Bay Wave Pool and Ripple Rapids. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one on a first come, first serve basis.

## ONGOING LIFEGUARD TRAINING

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, Valleyfair routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins; the use of video surveillance equipment; internal and external audits, and active/inactive water rescues and/or first aid scenarios.

## SWIM DIAPERS

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

## WATER WHEELCHAIRS AND POOL LIFTS

A water wheelchair is available for guests requiring additional assistance when at Barefoot Beach (at ground level), Breakers Bay Wave Pool, and Splash Station. The water wheelchair may be used by multiple guests on the same day. While in the wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at Ripple Rapids. During your visit, please speak to a member of our Aquatics team to obtain access to the water wheelchair or pool lift and for further accessibility information.

## WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting water

## Breakers Plunge 4

Guests must be 48" tall in bare feet to ride.  
Maximum weight – 300 lb. per person.

Two high speed, straight, freefall slides 90 feet high, ending in a water-filled run out.

**Rider Criteria:** Required riding position is lying flat on back with arms crossed over chest and legs crossed at ankles, keeping your body straight throughout the entire ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, or any type of cast are not permitted to ride.

## Panic Falls Speed Slides 4

Guests must be 56" tall in bare feet to ride.

Two high speed, straight, freefall slides 50 feet high ending in a water-filled run out.

**Rider Criteria:** Required riding position is lying flat on back with arms crossed over chest and legs crossed at the ankles, keeping your body straight throughout the entire ride. Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Cervical collar, neck brace, broken collar bone, or any type of cast are not permitted. All riders with X are not permitted to ride.

**Rider Access:** No Alternate Access. Guests must be able to walk up 32 steps to reach top of tower.

**NOTE:** Swimwear with rivets, buttons, and rear or side zippers are not permitted. Eyewear, shirts, and aqua socks must be removed and held by rider during ride.

## **WARNING**

Many rides at Valleyfair are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Valleyfair does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE!**

All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow guests to ride.

**Information in this guide is subject to change.**
