Welcome to Worlds of Fun & Oceans of Fun!

We are glad you are here! At Worlds of Fun we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant guests, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Worlds of Fun’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.
**RIDE RATING SYSTEM**

A Ride Rating Program has been designed to provide a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

**Each ride/attraction is placed into one of five categories:**

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

**KEY TO SYMBOLS**

These symbols, along with the ride ratings, are used to define our rides on the following pages.

<table>
<thead>
<tr>
<th>SYMBOL</th>

</tbody>
</table>

PLEASE RIDE SAFELY

The state of Missouri Rider Responsibility Law (RSMO 316.230) requires that riders must obey all warnings regarding this ride and behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is a misdemeanor.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Worlds of Fun. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets, waist packs, left in a locker or with a non-rider. Worlds of Fun is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

ALTERNATE ACCESS ENTRANCES & ATTRACTION BOARDING PASSES

Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Worlds of Fun/Oceans of Fun. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person’s size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.
To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride’s exit or Fast Lane entrance) in order to avoid crowds and waiting in the regular lines.

Guests who are in possession of a Boarding Pass will obtain a boarding or “ride” time on the Boarding Pass that is equal to the anticipated wait time for a particular ride from the ride associate at the Alternate Access Entrance (usually a ride’s exit). Guests can then choose to rest comfortably away from the queue area, visit a shop, see a show, or play a game until their boarding time.

Information on where guests access the ride is posted on each Ride’s Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

Here’s How It Works

• The guest with a mobility impairment or ASD should visit Guest Services upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.

• In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.

• The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.

• The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.

• Guests may not accumulate more than one boarding time at a time.

ADDITIONAL INFORMATION AND SERVICES

Our goal is to make Worlds of Fun and Oceans of Fun as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Assisted Listening Devices

Assisted listening systems utilize a lightweight wireless device that receives a signal from a transmitter at certain locations to amplify sound. These devices are recommended for guests with a mild to moderate hearing loss. Assisted listening devices are available at Guest Services for use at select theater locations.

Braille & Large Print Guides

Braille and large print guides of the Park Map and Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-served basis.

Family Care Center

A Family Care Center is located in Planet Snoopy™ next to the Planet Snoopy™ Entrance for parents to feed young children and for lost children. Two family restrooms are also located inside the center.

First Aid

First Aid is located near the entrance of the Timber Wolf and is staffed from park open to park close. Medical equipment storage and refrigeration for guests with medication is offered at First Aid. In addition, First Aid is located at Oceans of Fun next to Surf City Wave Pool. This location is open during Oceans of Fun operating hours. Emergency medical care is available for overnight guests.

Interpretive Services

If requested at least one week in advance, Worlds of Fun will provide American Sign Language Interpretation at any of our shows. To arrange for sign language interpreting services, please call 816.454.4545 or email us at www.worldsoffun.com/contact-us. Live Show scripts or score sheets are available at each show venue upon request and must be returned at the end of the show.

Parking for Guests with Disabilities

Parking for guests with disabilities at Worlds of Fun is located in parking lot B and H on a first-come, first served basis. Oceans of Fun accessibility parking is located in the lower level parking lot near the Oceans of Fun Main Entrance. Proper vehicle identification must be displayed.

Quiet Room

Worlds of Fun offers a Quiet Room located in the Family Care Center for family members or caregivers to take a break and reduce sensory stimulation. Additionally there are sensory features provided for guest use.

Restrooms

Private restroom facilities for guests needing the assistance of another guest are available at Family Care Center, First Aid, Grand Pavilion and Coconut Cove. Wheelchair accessible stalls are located at all restrooms.
Service Animals
Service animals are welcome at Worlds of Fun and Oceans of Fun. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located near Prowler Photo.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Worlds of Fun Railroad and Grand Carrousel. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring soft coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchair, Scooter, Stroller & ECV Rental
A limited number of wheelchairs, electronic convenience vehicles (ECV) and strollers are available for rent at Stroller Rental near the Worlds of Fun entrance and Trader Nicks at Oceans of Fun. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to www.worldsoffun.com and visit the Rentals page under the Tickets tab. Rentals are also available at the park while supplies last. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services.

Definitions
Every ride entrance lists height requirements and special instructions regarding the ride. Worlds of Fun uses the following terms:

Supervising Companion: Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. Supervising companions are responsible for ensuring that the guest remains seated properly where applicable and follows all rules and regulations. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed for three people, the supervising companion can accompany two riders.

Ability to Hold On or Brace: Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.

Hand Held Infants: Hand held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides as long as the infant has a supervising companion: Grand Carrousel (in a chariot), Worlds of Fun Railroad, Caribbean Cooler, Coconut Cove, Captain Kidds, Crocodile Isle, and Surf City Wave Pool (water depth and participation may be restricted). Hand-held infants and their supervising companion may also enjoy Paradise Falls, but may not participate on the elevated sections of the attraction.

Evacuations
Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. Remain seated until given instructions during all evacuations. In Oceans of Fun, guests may be asked to evacuate pools as quickly as possible using stairs or ladders.

If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

Guests of Larger Size
All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight,
and/or body proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Boomerang, Detonator, Cyclone Sams, Flying Ace Balloon Race, Kite Eating Tree, Patriot, Peanuts 500, Prowler, Snoopy’s Junction, Spinning Dragons, SteelHawk, and Timber Wolf.

Maximum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

The manufacturer requires a maximum rider height on the following rides:
- Sally’s Swing Set: 73”

**GUESTS USING WHEELCHAIRS**

Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of Worlds of Fun Railroad, where one wheelchair can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. Wheelchair lifts are available at Viking Voyager, Timber Wolf, Snoopy’s Rocket Express, and Prowler to transport a guest in a wheelchair and one companion to our 2nd story ride platforms. Please use the doorbell/phone at base of lift to request service. A standard elevator is available for self-service at Patriot. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Worlds of Fun personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Stroller and Locker Rental.

**HEALTH RESTRICTIONS**

Each ride is evaluated against 5 primary health restrictions. These restrictions are:
- Recent Surgery
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Back Trouble
- Pregnancy

If you are in doubt about your ability to safely experience a ride or would like more rider information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guides posted at each ride entrance and exit.

**HEIGHT REQUIREMENTS**

Height requirements and specific rider instructions are posted at the entrance to each attraction. Children may be “officially” measured at one of the Height Check stations at Guest Services at either main entrance. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your boarding time shorter by streamlining the rider height measurement process.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example, a child is not permitted to wear platform shoes to help meet a height requirement. Worlds of Fun reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

In Oceans of Fun height measurements are taken in bare feet. There is a separate height wristband system for Oceans of Fun.

**LOOSE ARTICLES**

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-rider. Worlds of Fun/Oceans of Fun is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the rider’s body.

For safety reasons, cell phone usage, taking pictures and filming on rides is prohibited.
Glasses must be secured on all rides. Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

**LOST AND FOUND**
All items found at Worlds of Fun/Oceans of Fun are turned in to Guest Services. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at Guest Services or at worldsoffun.com/lostandfound to ensure the item is returned to you if it is found.

**FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES.** You can be seriously injured if you enter an unauthorized area.

**MAGNETIC FIELDS**
Certain rides use magnetic fields for braking. These rides include Patriot, Prowler and Spinning Dragons. Magnetic gates are also used throughout the park. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.

**OXYGEN TANKS**
Due to the dynamics of our rides, oxygen tanks may be restricted. Please stop by Guest Services to identify any rides that may allow your tank. Oxygen tanks may be taken into all food, merchandise or entertainment buildings.

**PHOTOSENSITIVITY/STROBE LIGHTING**
Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include: Cyclone Sam’s, Fjord Fjarlane, Mamba, Nordic Chaser, Patriot, Prowler, Scandi Scrambler, Skyliner, SteelHawk, Viking Voyager and Woodstock Gliders.

**PREGNANCY**
Guests who are pregnant may only ride Grand Carrousel, Woodstock Gliders and Worlds of Fun Railroad and participate in Coconut Cove, Caribbean Cooler, Castaway Cove, Splash Island and Village Pool.

**PROPER ATTIRE**
Most rides at Worlds of Fun require proper riding attire including shirts and shoes. Shirts and shoes are required in queue lines and all park pathways. Swimwear is not permitted on rides outside of Oceans of Fun with the exception of Viking Voyager and Fury of the Nile. For your safety, loose clothing (including scarves and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding Detonator, Patriot, and SteelHawk.

Appropriate swimwear is required at Oceans of Fun. Thongs or transparent clothing are not permitted.

**PROSTHETICS**
Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Oceans of Fun attractions. Guests should visit Guest Services prior to riding to ensure a safe riding experience.

Prosthetics are NOT allowed on the following:
- Patriot (Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.)
- SteelHawk (a rider with more than one lower body prosthesis is prohibited)

Guests with prosthetics enjoying their day at Oceans of Fun should consult with a member of our Aquatics Supervisory team.

**RIDE DEVICES FOR GUESTS WITH DISABILITIES**
Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device:
- Boomerang
- Cosmic Coaster
- Flying Dutchman
- Mamba
- Patriot
- Snoopy’s Rocket Express
- Spinning Dragons
- TimberWolf

Stabilizing devices, when requested, can be used at designated rides to keep the ride unit from swaying during loading and unloading. These devices may further assist guests in transferring from their wheelchair to the ride unit. The following ride is equipped with a stabilizing device: Woodstock Gliders.

Body Harnesses, when requested, allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Patriot.

Please see an associate at each ride or Guest Services for assistance.
RIDER CRITERIA
Worlds of Fun’s Ride Admission Policy is designed to allow our guests to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each particular ride. It is our policy to allow anyone to ride who meets all of these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

Ability to exhibit independent seated postural control under the dynamic conditions of the ride:
The guest must have the body and spinal control to sit upright without the aid of other people or devices. The guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the guest’s thighs.

Appropriate center of gravity:
The guest’s body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm:
A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and enough strength to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms:
A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and enough strength to allow the guest to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with one functioning leg:
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs:
Guests must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

Minimum of two functioning extremities: Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities: Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

Ability to enter/exit ride within specified parameters without endangering self or others:
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance (the exit or Fast Lane entrance) or having someone aid you in boarding. For the safety of our associates and riders, ride operators are instructed not to perform any lifting of riders, other than in the children’s area.

Appropriate Observed Behavior:
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have the duty to:
• Exercise good judgment
• Act in a responsible manner while using amusement rides
• Obey all warnings prior to and during participation
• Not participate while under the influence of alcohol or drugs
• Properly use all ride safety equipment provided

CASTS & BRACES
Riders with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides at Worlds of Fun and Oceans of Fun. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on the slides in Oceans of Fun.
CASTS & BRACE CHART

The chart displays the cast and brace rules for all rides and attractions.

Symbol Key

Y – May ride with this condition.
C – Must ride in a chariot.
F – Cast/Brace must fit safely in the ride unit.
Z – Participation or water depth may be restricted if necessary.
O – Not permitted to participate on elevated activity areas.
ACCESS SYMBOLS
Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where guests may remain in their wheelchair. These rides include the Worlds of Fun Railroad.

This symbol identifies rides that can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where guests must be able to walk independently or be assisted by a member of their party. A wheelchair may be left in a designated position on or near the ride platform.

WORLDS OF FUN RIDE DESCRIPTIONS
The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized previously. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safety. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Autobahn
Guests must be 48” tall to ride.
A bumper car ride where guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing directions and forces.

Restraint System: An individual shoulder strap positioned across the chest and under the arm of each rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Bamboozler
Guests must be 46” to ride.
Guests stand in a high speed circular ride unit, which rises to a tilted position while rotating. Riders will experience strong accelerations and centrifugal forces.

Restraint System: A safety chain encapsulates the riders within their stall. A door further encloses all riders into the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning extremity must be a leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps up to the ride unit and remain standing during the entire ride cycle.

Beagle Brigade Airfield
Guests must be 36” tall to ride alone OR accompanied by a supervising companion to ride. Hand-held infants are not permitted. Maximum Weight – 386 lb. per unit. This ride only accommodates one adult per unit.
A set of WWII style suspended aircraft that whip around an oblong course.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.
Boomerang

Guests must be 48” to ride.

A high-speed, looping roller coaster which turns riders upside down three times forward, and then again while traveling backward. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self-upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Camp Bus

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 440 lb. per row. This ride only accommodates one adult per row.

PEANUTS™ themed bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Riders who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Charlie Brown’s™ Windup

Guests must be 36” tall AND less than 54” tall to ride.

A child-size chair swing with free hanging seats suspended from a gently rotating tower.

**Restraint System:** An individual lap bar and a between-the-legs safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of entering the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Cosmic Coaster

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

A children’s roller coaster with air time humps.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Riders who do not have appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon
request which may assist a rider out of a wheelchair and into the ride unit.

**Cyclone Sam’s**

Guests must be 48” tall to ride. Maximum weight – 384 lb. per row.

A high speed dark circular ride with wind and sound effects, which rises to a tilted position while rotating and produces strong accelerations with changing force and elevation.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seat belt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**WARNING:** This ride contains strobe lighting.

**Detonator**

Guests must be 48” tall to ride.

A tower ride with a chair lift-type seat where riders are propelled up at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Falcon’s Flight**

Guest must be 48” tall to ride alone OR 42” tall to ride with a supervising companion. Hand-held infants are not permitted.

A circular ride with three arms of gondolas moving counter-clockwise against the ride’s main clockwise direction. Riders will experience strong accelerations and side to side movement.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have at least one functioning extremity; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting.

**Fjord Fjarlane**

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

A high speed circular ride where guests ride in cars that rotate in a circle while alternately lifting and then dropping the cars relative to the center of the ride. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A shared seatbelt secures riders across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one
functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not have appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.

**Flying Ace™ Balloon Race**

*Riders must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 550 lb. per car. This ride only accommodates two adult per car.*

A tower with free hanging hot air balloons that are suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the car. Please use caution, as the ride unit may shift when entering and exiting.

**Fury of the Nile**

*Guests must be 46” tall to ride.*

A family water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down and into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with riders. These items will get wet. Please consider leaving loose articles with a non-rider.

**WARNING:** Boats may bump into the side of the trough and other boats.
Grand Carrousel

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are permitted but must ride in a chariot and be accompanied by a supervising companion.

An antique carrousel ride which features hand carved horsed—both stationary and moving up and down—and chariot seating mounted on a circular platform that rotates.

**Restraint System:** Children under 46” must be seated in a chariot or ride on the middle row of animals and be held by a supervising companion who is standing on the platform between the animals. Only one rider per animal.

**Rider Criteria:** Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Riders with a full leg cast must be seated in a chariot. Guests who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior must ride in a chariot with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up onto the ride platform and/or horse. Service animals are permitted to ride on the ride platform or chariots.

Kite Eating Tree

Guests must be 36” tall to ride. Maximum weight – 700 lb. per row. This ride only accommodates one adult per cycle.

A children’s ride that hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row with an individual seatbelt that secures riders across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42” tall to ride or be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Le Taxitour

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted.

This is an antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. Children under 48” must be seated in the passenger seat of the car.

**Rider Criteria:** Guests who are not able to steer and depress the accelerator must have a supervising companion accompany them to drive. Guests with a cervical collar or neck brace are not permitted to ride. Guests with a visual impairment must ride with a supervising companion who meets the requirements to drive.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car.

Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Linus™ Beetle Bugs

Guests must be less than 54” tall to ride. Hand-held infants are not permitted.

A children’s ride that has vehicles that go along a circular track with small bumps up and down.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the
assistance of a companion, and be capable of stepping up and
over the side of the ride unit.

**Linus™ Launcher**

Guests must be 42” tall to ride alone or 36” tall and accompanied by a supervising companion. Maximum Weight – 275 lb. per unit. This ride only accommodates one adult per vehicle.

A circular ride where riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise. This ride only accommodates one adult per vehicle.

**Restraint System:** A cage secures riders across the back, shoulders and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Mamba**

Guests must be 48” tall to ride.

An out and back hyper steel coaster with banked curves and airtime hills. Riders will experience weightlessness, and rapid movements from side to side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**Mustang Runner**

Guests must be 54” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A circular ride with three arms of gondolas moving counterclockwise against the ride’s main clockwise direction. Riders will experience weightlessness, strong accelerations, and side to side movement.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under
the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm casts are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Nordic Chaser**

Guests must be 48” tall to ride alone OR 40” tall and accompanied by a supervising companion.

A family ride with ship themed cars that go around a circular track with bumps up and down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A shared seatbelt secures riders across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion

**Patriot**

Guests must be 54” tall to ride.

A high-speed, inverted looping roller coaster which turns riders upside down four times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Prosthetics are not permitted on this ride. Guests with upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. An elevator is available at the entrance to transport guests to the ride platform.

**WARNING:** This ride contains strobe lighting.

**Peanuts™ 500**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum Weight 275 lb. per car. This ride only accommodates one adult per car.

A children’s ride allows guests to ride in their own race car that whips around an oblong track.

**Restraint System:** A shared seatbelt secures all riders across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**PEANUTS™ Road Rally**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not
permitted. Maximum weight – 440 lb. per truck. This ride only accommodates one adult per truck and the adult must sit in the back.

A children’s ride that is a miniature truck ride that follows an electric track in a “train-like” fashion.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

**Peanuts™ Turntyke**

Guests must be 36” tall AND less than 54” tall to ride. Hand-held infants are not permitted.

A children’s circular car and motorcycle ride.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**Prowler**

Guests must be 48” tall to ride.

A high speed wooden roller coaster with steep banked curves and fast transitions.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Casts are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. A wheelchair lift is available in the exit to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

**RipCord A Skycoaster® Experience**

Guests must be 42” to ride. Maximum weight – 850 lb. per flight.

A high-thrill Skycoaster® attraction made to simulate flight. Riders are hoisted 189 feet into the air. They control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds up to 80 miles per hour.

**Restraint System:** Riders wear a full body harness that supports the rider in a prone position. The harness is connected to the flight support cables.

**Rider Criteria:** Guests are required to have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is necessary that the rider possesses two arms sufficient for proper functioning of the flight suit to be maintained. Lower extremities must be of sufficient enough length to be contained and restrained by a leg strap. Proper functioning of the flight suit must be maintained for riders without appropriate center of gravity. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available via the ride entrance. Riders must be able to walk independently or be assisted by a member of their party.

**NOTE:** This is an extra charge attraction. $
Sally’s™ Swing Set

Guests must be 36” tall AND less than 73” tall to ride. This ride only accommodates 2 adults per row.

A large swing ride designed for children that produces a feeling of weightlessness.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual between-the-leg safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Scrambler

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion. Maximum Weight – 510 lb. per car.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg casts must fit safely in the ride unit.

**Rider Access:** Alternate access is available via the exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Sea Dragon

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 680 lb. per row.

A swinging boat ride, where riders will experience sudden speed changes and a feeling of weightlessness.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. Smaller riders must sit on the inside row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg casts must fit safely in the ride unit.

**Rider Access:** Alternate access is available via the exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Skyliner

Guests must be 54” tall to ride alone OR 36” tall and be accompanied by a supervising companion. Maximum weight – 450 lb. per car. Single riders are not permitted.

A ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one must be a functioning leg.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.
and into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.

**Snoopy™ vs. Red Baron**

Guests must be 36” tall AND less than 54” tall to ride.

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the ride unit.

**Snoopy’s™ Junction**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 440 lb. in locomotive and 825 lb. each in other cars. This ride only accommodates two adults per car and one adult in the locomotive car.

A children’s train ride that moves slowly along a winding track.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the ride unit.

**Snoopy’s™ Rocket Express**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 780 lb. per car. This ride only accommodates two adults per car.

Rockets that follow an elevated electric track through the Planet Snoopy area of the park.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Braced arm casts or full leg casts must fit safely in the ride unit.

**Rider Access:** Alternate access is available to the left of the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. A wheelchair lift is available to the left of the entrance to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance.

**Snoopy’s™ Space Buggies**

Guests must be 36” to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 382 lb. per car. This ride only accommodates one adult per car.

Space vehicles that jump up and down while rotating around a circular track.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.
Snoopy’s™ Yacht Club

Guests must be less than 54” to ride. Hand-held infants are not permitted.

A children’s circular boat ride.

**Restrainment System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

Spinning Dragons

Guests must be 48” tall to ride alone OR 43” tall and accompanied by a supervising companion. Maximum weight – 660 lb. per car.

Four seat roller coaster cars that traverse a steel track while rotating freely 360 degrees.

**Restrainment System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.**

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.

SteelHawk

Guests must be 52” tall to ride. Maximum weight – 304 lb. per gondola.

A chair swing that spins and swings riders to a 45 degree angle while ascending a giant 301 foot tower.

**Restrainment System:** An individual lap bar and a between-the-leg safety belt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit.

Timber Wolf

Guests must be 48” tall to ride.

A wooden rollercoaster with large drops and banked turns.

**Restrainment System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Casts are not permitted on this ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support as they will shift.
the ride unit. A wheelchair lift is available in the exit to transport guests to the ride platform. Please use the call button at the base of the lift to request assistance.

**Viking Voyager**

Guests must be 46” tall to ride alone OR 36” tall and accompanied by a supervising companion.

A water flume ride with viking themed boats, which travels through the woods and ends with a splash down. Riders will get wet!

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet. A wheelchair lift is available in the Fast Lane entrance to transport guests to the ride platform. Please speak with the Fast Lane associate to request assistance.

**WARNING:** Boats may bump into the side of channel and other boats.

**Woodstock™ Gliders**

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

A family circular ride, where guests ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.

**Restraint System:** A shared seatbelt secures each set of riders, fastening across the thighs and pelvis. The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Specific ride vehicles at this attraction are equipped with removable sides which may assist a rider in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle. Please use caution, as the ride unit may shift when entering and exiting.

**WARNING:** This ride contains strobe lighting.

**Woodstock™ Whirlybirds**

Guests must be 36” tall to ride alone OR be accompanied by a supervising companion. Hand-held infants are not permitted. Maximum weight – 550 lb. per car. This ride only accommodates two adults per car.

This is a family tea cup ride that travels a circular path while individual seats rotate on an axis.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**Worlds of Fun Railroad**

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Guests less than 46” tall must sit in the center of the bench.

A steam engine with 4 passenger cars, which travels around the park and through the woods.

**Rider Criteria:** Guests who do not have independent seated postural control, appropriate observed behavior, and
hand-held infants must ride in the center of the bench with a supervising companion.

**Rider Access:** Alternate access is available at the attraction exit. This attraction is wheelchair accessible. Service animals are permitted to ride this attraction.

**Zulu**

![Zulu Icon](image)

**Guests must be 54” tall to ride.**

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning riders upside down. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A door with a safety chain encapsulates the ride unit to secure riders.

**Rider Criteria:** Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

### OCEANS OF FUN

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Low Thrill Rides</strong></td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td><strong>Mild Thrill Rides</strong></td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td><strong>Moderate Thrill Rides</strong></td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td><strong>High Thrill Rides</strong></td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td><strong>Aggressive Thrill Rides</strong></td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>
**APPROPRIATE ATTIRE**

Appropriate swimwear is required. Thongs or transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. There can be no sharp objects, such as metal prosthesis, on the slides. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Guests with glasses should wear a safety strap on the slides. Contact lenses are not recommended.

Guests requiring special accommodation should speak to a member of the Aquatics management team. Specifically designed attire made out of lycra or nylon type materials will be considered. Due to attraction manufacturer requirements, some riding restrictions may apply.

**LIFE JACKETS**

Life jackets are required for children who are less than 48 inches tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all children needing special consideration. Children less than 42 inches tall must wear a life jacket and be accompanied by a supervising companion. This policy will be enforced at Surf City Wave Pool and Caribbean Cooler. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for guests who require one.

**ONGOING LIFEGUARD TRAINING**

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, Worlds of Fun routinely utilizes training exercises to improve our lifeguards’ skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins; the use of video surveillance equipment; internal and external audits, and active/inactive water rescues and/or first aid scenarios.

**SWIM DIAPERS**

Guests who require a diaper are required to wear Swim Diapers or diapers specifically designed for aquatic use.

**WATER WHEELCHAIR & POOL LIFTS**

A water wheelchair is available for guests requiring additional assistance when at Surf City Wave Pool or Coconut Cove. The water wheelchair may be used by multiple guests on the same day. While in the wave pool, the water level may not exceed the height of the seat on the chair. A pool lift is available at Caribbean Cooler, Castaway Cove, Coconut Cove, and the Village Pool. During your visit, please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair and for further accessibility information.

**OCEANS OF FUN ATTRACTIONS**

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safety. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

**Aruba Tuba**

Guests must be 42” tall in bare feet to ride. Maximum weight – 300 lb. per single tube or 400 lb. per double tube.

Two separate slides. One slide is totally enclosed twisting slide that only single riders may ride in a single tube. The other slide is a single or double tube slide with bumps and twists. Both slides end in a 3 foot deep pool of water.

**Rider Criteria:**

Guests must be seated in the tube with feet in the middle, facing forward, sitting up straight, and holding on to both handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast or full leg cast are not permitted to participate.

**Rider Access:**

Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Captain Kidds**

Guests must be less than 54” tall in bare feet to ride OR be accompanied by a child. Guests over 54” tall are not permitted on the slides.

An interactive pirate ship for children which features slides, water cannons and other play elements. Maximum water depth is 1½ feet.
**Rider Criteria:** Guests are required to maintain the proper riding position – slide on your back or in a seated feet first position. Guests who do not have seated postural control or appropriate observed behavior must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast or full leg cast are not permitted on the upper attractions and must be accompanied by a supervising companion in the pool. Hand-held infants are permitted in the pool if accompanied by a supervising companion.

**Rider Access:** Access to the slides requires climbing several rope steps. Guests will have to ascend the tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

---

**Caribbean Cooler**

Children must be 42” tall in bare feet to ride alone OR be accompanied by a supervising companion. Children under 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A supervising companion may accompany up to 2 children.

A slow moving, winding river tube ride at a depth of 3 ft. The river is approximately 800 feet long and passes under bridges.

**Rider Criteria:** Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand-held infants must be accompanied by a supervising companion. Guests who cannot enter/exit without endangering self or others must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate.

**Rider Access:** Access is available via the stairs or pool lift. Riders will have to transfer to the stairs, lift, on their own or with the assistance of a companion. Please speak to a member of our Aquatics team to obtain access to the pool lift.

---

**Castaway Cove**

Guests must be 21 years or older with ID to enter the pool and deck.

An adult pool with a water depth of 5 feet and swim up bar.

**Rider Criteria:** Guests without seated postural control or appropriate observed behavior must be accompanied by a supervising companion. Guests with a full arm cast, braced arm cast or full leg cast are not permitted to participate.

**Rider Access:** Access is available via the stairs or pool lift. Riders will have to transfer to the stairs, lift, on their own or with the assistance of a companion. Please speak to a member of our Aquatics team to obtain access to the pool lift.

---

**Constrictor**

Guests must be 48” tall in bare feet to ride. Maximum weight – 300 lb. per single tube or 400 lb. per double tube.

An enclosed twisting slide designed for single or double tubes. All slides end in a 3½ foot pool of water.

**Rider Criteria:** Guests must remain seated in the tube facing forward and holding onto the handles. Guests must have a minimum of three functioning extremities. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.
Crocodile Isle

Guests must be less than 54" tall in bare feet to participate.

A children’s activity pool that has slides and floating animals. Maximum water depth is 2 ft.

**Rider Criteria:** Guests are required to maintain the proper riding position – slide on your back or in a seated feet first position. Guests who do not have seated postural control or appropriate observed behavior must be accompanied by a supervising companion. Hand-held infants are permitted if accompanied by a supervising companion in the pool. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted on the slides and must be accompanied by a supervising companion in the pool.

**Rider Access:** Access to the attraction requires climbing several steps. Riders will have to ascend stairs and be capable of safely entering the slide, on their own or with the assistance of a companion.

Hurricane Falls

Guests must be 46” tall in bare feet to ride.

Maximum weight – 800 lb. per tube. Minimum of two riders; maximum of four riders.

Four person family raft waterslide, with banked turns and drops ending in a 2 ½ foot splash pool.

**Rider Criteria:** Guests are required to remain seated with back against the raft, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Monsoon

Guests must be 46” tall to ride

This is a water flume ride. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water. Riders will get wet!

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to participate.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps on their own or with the assistance of a companion, and be capable of stepping down in the ride unit. Watch your step, as the ride unit may be slippery and wet.

**WARNING:** Boats may bump into the side of the channel and other boats.

Paradise Falls – Slides

Guests must be 40” tall in bare feet to ride the large slides.

Guests must be 36” tall AND less than 48” tall in bare feet to ride the small slides. Maximum weight – 300 lb. per person.

Seven mild body slides, each starting at different height within the play structure; one of which is fully enclosed.

**Rider Criteria:** Guests must lay feet first with their arms across their chest, legs crossed at the ankles, and back flat against the slide. Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests must have sufficient upper extremities to maintain the proper riding position. Guests are required to remain seated with back against the raft, facing forward, and holding onto the handles. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Paradise Falls – Play Structure

Interactive water play structure with a large tipping bucket, water slides, and multiple levels connected by net crawls, bridges, and stairways.

**Rider Criteria:** Guests unable to maintain seated postural control must be accompanied by a supervising companion. Hand-held infants and guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

**Rider Access:** Access is available on the ground level. Access to the elevated levels require guests to walk up several flights of stairs.
**Predators’ Plunge**

Guests must be 48” in bare feet to ride. Maximum weight – 300 lb. per person. One single rider per tube.

Guests stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Maximum water depth is 24”.

**Rider Criteria:** Guests must stand with their head and back against the slide, legs firmly crossed at the ankles, with arms folded across the chest, and maintain position thorough out ride. Guests must have a minimum of four functioning extremities. Casts are not permitted on this attraction.

**Rider Access:** Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own, or with the assistance of a companion.

**NOTE:** Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

---

**Riptide Raceway**

Guests must be at least 42” tall in bare feet to ride. Maximum weight – 300 pounds per guest.

A 50 foot tall complex that has guests slide head first on a mat down four mat racing flumes. Slides descend into a runout.

**Rider Criteria:** Guests must lie stomach down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a mat. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

---

**Sharks’ Revenge**

Guests must be 48” tall in bare feet to ride. Maximum weight – 300 lb. per single tube or 400 lb. per double tube.

Two separate enclosed twisting tube slides designed for single and double tubes. Riders experience high speed drops and banks. All slides end in a 3½ foot pool of water.

**Rider Criteria:** Guests must remain seated in the tube facing forward and holding onto the handles. Guests must have a minimum of three functioning extremities. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

---

**Splash Island**

Guests must be 40” tall in bare feet to ride alone OR be accompanied by a supervising companion. Guests must be less than 54” tall in bare feet to ride in the slides.

A zero-depth water playground. Maximum water depth is 0–3 inches.

**Rider Criteria:** Guests who do not have the ability to safely enter and exit the attraction or appropriate observed behavior must be accompanied by a supervising companion. Hand-held infants must be accompanied by a supervising companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast or full leg cast are not permitted on the slides and must be accompanied by a supervising companion in the pool.

**Rider Access:** This attraction is wheelchair accessible by zero depth entrance.

---

**Surf City Wave Pool**

Children less than 48” tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42” tall in bare feet must wear a life jacket and be accompanied by a supervising companion. A supervising companion may accompany up to 2 children.

A large wave pool with depths ranging from 0 ft. to 6 ft. Waves are generated for 5 minutes on, and then 5 minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

**Rider Criteria:** Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a supervising companion. Guests must have a minimum of two functioning extremities. Hand-held infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction but participation
or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisor team to obtain access to the water wheelchair.

**WARNING:** Only strong swimmers are recommended in the deep water.

---

**Typhoon**

Guests must be 46” tall in bare feet to ride. Maximum weight – 300 lb. per rider.

Two high speed, straightaway, hump-backed slides ending in a 3 foot deep pool.

**Rider Criteria:** Guests are required to remain lying flat on their back with arms crossed over chest, legs crossed at the ankles, keeping your body straight throughout the entire ride. Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Casts are not permitted on this attraction.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

**NOTE:** Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

### SHOWS & ENTERTAINMENT

Due to the popularity of our shows, we suggest that you arrive early as seating may be limited. Show schedules are available at Guest Services and at any theater entrance. All Entertainment venues are accessible to guests who are mobility impaired. Assisted listening devices are available for guests who are hearing impaired. Large print scripts may also be available. Ask any associate at the venue for assistance.

**Tivoli Music Hall**

The Tivoli Music Hall, located next to Fjord Fjarlane in the Scandinavia section of the park, is an indoor theater with bench seating used for music festival competitions, presentations, and special event shows. Access to the theater is through the main entrance. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance. All guests exit through the exit doors.

**Moulin Rouge**

The Moulin Rouge, located in Europa, is an indoor theater featuring main stage show productions with bench seating. Entrance to the theater is through the main entrance doors. Doors typically open 15 minutes before show time and close promptly at the start of the show. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance. After the show an Usher will assist you with exiting the theater.

**Heart of America Theater**

The Heart of America Theater, located next to Detonator, is a large outdoor amphitheater used for music festivals, presentations, and special events. Access is through the main entrance. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.

**PEANUTS™ Showplace**

PEANUTS™ Showplace, located in Planet Snoopy™, is an indoor theater that can be accessed through Snoopy™ Boutique across from the Planet Snoopy™ Fountain. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance.
Worlds of Fun Halloween Haunt has Extreme Haunts that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, loud sound and dense fog. Please adhere to all posted and verbal warnings and directions. Some attractions may require Guests to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction. Strobe lighting may also be in effect at some attractions. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions. Characters inside our Haunt attractions will not touch you; please do not touch them in any manner. Those that do so will be removed from the park without refund. Rowdy behavior and profanity are also cause for removal from the park. For safety reasons, guests may not wear their own face paint, costumes or masks.

Select dates November 21 through December 31
(Closed Christmas Eve and Christmas Day)

WinterFest is an immersive holiday experience at Worlds of Fun. Miles of magnificently adorned trees, deluxe holiday décor and brilliant lights will be spread throughout the park. Along with the décor, world-class live entertainment, mouth-watering treats and heart-warming experiences will make WinterFest enjoyable for all ages.

Many areas of the park will have low lighting, fog, snow machines and strobe styled lighting. Guests with a history of seizures or epilepsy should use caution during this event. Limited rides and attractions will be open. For additional information about this event, please stop by Guest Services.

Snow Flake Lake

This traditional styled ice skating rink allows participants to skate in a counter-clockwise direction around the ice rink. Ice skates are required for all participants to be on the ice. Guests 10 years of age or younger must be accompanied by a Supervising Companion on the ice at all times. Speed skating, roughness, excessive speeding or weaving through other skaters is prohibited. Guests must have appropriate observed behavior to participate and guests with cervical collar or neck braces, full arm cast, braced arm cast, or full leg cast are not permitted to participate at this attraction.

Alternate Access is via the entrance to the attraction. Guests must be able to take several steps and step on to the ice on their own or with the assistance of a companion. Guests in wheelchairs can transfer and participate with the use of a chair designed to be on the ice. Please see ice rink associates for details. Wheelchair parking is located around the ice.
WARNING

Many rides at Worlds of Fun & Oceans of Fun are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speed, steep drops, sharp turns or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Worlds of Fun & Oceans of Fun do not. If you suspect your health could be at risk for any reason, or you could aggravate a preexisting condition of any kind, DO NOT RIDE!

All passenger restraint systems, including lap, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow guests to ride.

Information in this guide is subject to changes.
